	<input type="checkbox"/> <b>Design-Build (D-B):</b> A Design-Build Criteria Architect (DBCA) is selected to produce D-B Request for Proposals (RFP) documents for a Major Capital Project. The Design-Builder with the "Best Value Total Cost Proposal" is awarded a contract by the State to design and build the Project.
--	---

<p><b>11</b></p> <p><b>Project Description:</b></p>	<p>The Department of Administrative services (DAS) Construction Services is seeking the services of a highly talented and experienced Architectural/Engineering (A/E) Consultant team. The team will provide design and construction administration services to the Department in support of the New Parking Garage at Central Connecticut State University in New Britain, CT.</p> <ul style="list-style-type: none"> <li>• This project provides for the design and construction of a new 500-600 car parking garage. The site is located on a 2.2 acre site in the Southwest quadrant of the campus and is bordered by Paul Manafort Drive to the North, Stratford Road to the South, Charter Oak College to the East, and private retail businesses to the West. The parking garage will be constructed to meet structural design criteria and designed with materials consistent with CCSU campus standards for similar applications, including concrete and steel structure, brick veneer, metal roofs, and insulated glazing. This project will include sustainable design systems and components which may include photovoltaic panels supported along portions of the roof. The garage is required to have security fencing at all openings and at the roof perimeter. The project will include parking control access gates with a state-of-the-art electronic parking monitoring system and associated signage to indicate available spaces per floor. The garage structure will be designed to minimize impact to the surrounding neighborhood by recessing the first level approximately 1/3 story below grade to reduce the apparent height. The parking garage foundations and structure may be designed to support (2) future parking levels. The project will incorporate an enclosed pedestrian bridge to allow safe passage across Manafort Drive, connecting the garage to the Willard/DiLoreto building. Code-required fire separations, egress stairs, and ADA accessible elevators will be included into the bridge design.</li> <li>• The garage will be designed to meet or exceed all applicable fire and life safety codes, and all ADA regulations, and will include the installation of an ADA accessible elevator system at all levels and accessible route requirements. Signage and graphics shall be in conformance with CCSU standards as well as ADA requirements. LED lighting systems throughout shall meet or exceed the requirements of the Illumination Engineers Society (IES) guidelines and will include a lighting system to provide emergency lighting throughout the garage. Site improvements shall be required to provide effective access, circulation signalization, lighting and all utility relocations. All work associate with traffic studies and approvals, vehicular controls, signals, crosswalks, signage, site lighting, site utilities, and street crossings will be incorporated into the project. The site shall be landscaped in a manner appropriate to enhance the building, integrate it with the campus surroundings and adjacent neighborhood. The project will allow for surface parking on portions of the remainder of the site as applicable.</li> <li>• The communication systems shall comply with CCSU telecommunication guidelines and applicable codes. It will include emergency phones connected directly to the campus security office to ensure safety. Security Cameras will be installed which will allow for remote monitoring.</li> </ul>
