Subject: Application for Approval of Alternative Work Practice at Synergy School, 40 Butternut Drive
East Hartford, CT

Dear Mr. Romejko:

This letter is provided in response to an application from you dated September 20, 2018 requesting approval of an alternative work practice for the abatement of **21,000** square feet (sf) of asbestos-containing floor tile and associated mastic and 70 mudded fittings from the Level 2 Office Space in the subject property.

Based upon the information provided in the application describing the proposed alternative work practice to be used on this project, approval is granted by the DPH. This approval is based upon the understanding that the application requests a variance from the requirements of Subsection 19a-332a-5(e) of the Standards for Asbestos Abatement regulation. In lieu of the requirements of Subsection 19a-332a-5(e), the work area is to be isolated from the non-work area by barriers as outlined in Subsection 19a-332a-5(c). Additionally, a single layer of 4 or 6 mil polyethylene sheeting shall be used to seal the wall surfaces in the work area.

Mudded fittings shall be removed by the glove bag procedure, 29 CFR 1926.1101, OSHA. Surrounding the glove bags shall be an airtight barrier of six-mil polyethylene sheeting covering or forming the walls and covering the floor. Where physical limitations do not allow for the use of the glove bag procedure negative pressure enclosure(s), constructed of two layers of 6 mil polyethylene sheeting, shall be used. Where this containment does not extend to the ceiling, the layer of six mil polyethylene sheeting shall create a ceiling.

Except as noted in this letter, all other work practices specified in the Standards for Asbestos Abatement regulation are mandatory. This approval is specific for the removal of asbestos-containing materials at the facility identified in this application. **Please note that, in accordance with the provisions of Subsection 19a-333-7(a) of the Asbestos-Containing Materials in Schools regulation, no asbestos abatement shall be performed in a school building while school is in session without the prior written approval of the**

DPH. This approval does not relieve the contractor or facility owner from satisfying the requirements of any other federal, state or municipal regulation. The DPH reserves the right to rescind this approval should it determine that equivalent means of asbestos emission control are not maintained.
Please contact this office should you wish to discuss this matter further.

Sincerely,

Laschone P. Garrison
