

TOWN OF HAMDEN

CONNECTICUT

Addendum #5

Bid #2878

Stormwater Industrial General Permit Compliance Services and SPCC Training
Hamden, Connecticut

Question #1: What is the duration of the contract?

One year possible second year renewable.

Question #2: Please confirm performance and payment bonds are required from the selected environmental consultant. If the contract duration is more than a year, can the bonds be for one year's fees?

Performance and payment bonds are not required for this bid.

Question #3: The self-insured retention limit on the Umbrella coverage is \$10,000. Would the Town accept \$25,000?

No, the Town will not accept \$25,000

Question #4: Does the Stormwater Pollution Prevention Plan (SWPPP) at the Transfer Station include the landfill, leaf composting and brush management areas? Will these areas be inspected as part of the Transfer Station inspection?

Yes, it does include these area. Yes, include in inspections

Question #5: Please confirm how many outfalls there are at each facility, and which parameters are not exempt at each outfall.

- a. **Public Works Garage:** There are 4 outfalls, we are currently only required to sample 1, 3, and 6 (please see the last report and the SPCC p. 3 and 4). While we are not required to sample all of them at this time, please provide a unit price to sample each if we need to update and sample others.
- b. **PW Maintenance Garage:** There are 4 outfalls, while we are not required to sample at this time, please provide a unit price to sample each if we need to update and sample others.
- c. **Transfer Station/Landfill:** We are only required to sample outfall 1. While we are not required to sample all of them at this time, please provide a unit price to sample each if we need to update and sample others.

Question #6: Please confirm that the Town would like a proposal for conducting quarterly visual monitoring at both the Public Works Garage and Public Works Maintenance Garage and only semi-annual visual monitoring at the Transfer Station.

Please see Task 3.

Question #7: HRP's SMR and cover letter for the Transfer Station indicate that iron is a required parameter. Please clarify why iron is being sampled at a transfer station.

Required as per previous testing.

Question #8: HRP's cover letter also indicates that iron is collected at the Transfer Station on a quarterly basis. Please confirm if the Town would like to include this in the proposal.

Continue as per previous testing.

Question #9: Is the landfill completely closed and have there been any leachate outbreaks in the past three years?

Landfill is closed and there are no known leachate outbreaks

Question #10: We have been informed by the DEEP that the Industrial Stormwater General Permit will be extended for an additional two years without modifications (until September 2021). Does the Town still want us to include the SWPPP update and re-registration packages for the facilities in the proposal?

This is for permit renewal. The bid was released prior to formal notice of the renewal. We need price for renewal. While the permit is being indicated as being extended to 2021, formal response from the DEEP has not received the Town. The SWPPP is required to be reviewed annually with the education. Please see Task 1.
