**BIDDER QUESTIONS AND COMMENTS – Addendum No. 1**

The following written Bidder questions and comments were received between June 10, 2019 and June 21, 2019. Questions that are repetitive in content to previously answered questions have not been relisted. A response to each question or comment is inserted below the item in *italics*.

1. The scan of the Project Manual that was posted on the City’s FTP site is not good quality with some of the text too light to be read. It should be redone at a higher resolution so that it is more legible.

*Response: The Project Manual was rescanned in grayscale at twice the resolution of the original scan. The original low-resolution Project Manual file was removed from the City’s FTP site and replaced by a new significantly-larger size file of higher-resolution. It should be noted for the record that the content of the Project Manual file has not changed, just the resolution of scanning process.*

2. There is an existing extensive lightning protection system currently installed at most roof areas.
  1. Is existing system to be removed and disposed of?
  2. Is existing system to be removed and replaced?
  3. If system is to be removed and replaced does it need to be brought up to current code standards?
  4. If systems is removed and replaced will resistance testing be required?
  5. Will certification be required?
  6. If system is to be removed and replaced does the owner want to have temporary lightning protection installed during the course of the project?

*Response: It is the Owner’s intent that the existing lightning protection system components shall be removed and not reinstalled in designated areas as required to perform the new Work shown in the Contract Documents. As part of Addendum No. 1 we have inserted several paragraphs in Section 024119 Selective Demolition to define the extent of the required removal and disposal of the existing lightning protection system components.*
