Applicants must provide a copy of their current approved Classification status by the State of Connecticut Department of Administrative Services ("DAS"), with their Application as a prequalified **DAS Telecommunications Systems Contractor Classification**. This certificate must be included with your application and must be valid as of the due date of this Application.

Only Contractors pre-qualified by both the DAS, in the classification required for this specific project, and the University of Connecticut ("University") through this Prequalification Application, will be eligible to submit bids for this project.

### **Scope of Work**

The purpose of this solicitation is to prequalify telecommunications contractors for the opportunity to bid on projects which have an estimated construction value of less than \$500,000 as this need arises at the University. Most projects will be at the Storrs Campus, but could also include other University of Connecticut campus locations, including, but not limited to, Avery Point Groton, Hartford, West Hartford, Stamford, Waterbury, and the University of Connecticut Health Center, (UCH) in Farmington.

The type of projects may include voice, video, data, and fiber optic cabling, as well as telecommunications infrastructure and system installation services. This solicitation is not intended for fire alarm or security systems and cabling installation.

### **Program Description: On-Call Trade Contractor Program Details (for projects less than \$500,000)**

#### **For projects with an estimated construction value between \$50,000 and \$500,000:**

- The University shall issue an invitation to bid and form of proposal to all pre-qualified bidders in the respective trade package for which the University is soliciting bids. All interested pre-qualified bidders shall return the completed form of proposal along with any other required information and documentation as deemed appropriate by the University or required by CT State Law.
- A bidding requirement prerequisite for each individual project will be that the awarded Contractor must self-perform a minimum of ten percent (10%) of their submitted bid amount. Also, in the bidding of most deferred maintenance, major renovation, and new construction projects, contractors are advised that they must award thirty percent (30%) or more of the value of their awarded contract to certified SBE's and, of that amount, one-third (10% of the total award) or more must be awarded to SBE's who are also MBE's. The contractors are responsible for ensuring that they and the SBE's they have elected are eligible contractors and that they meet state requirements.
- The prevailing wage law will apply where the total cost of all work to be performed by all contractors and subcontractors in connection with new construction of a public works project is equal to or larger than one million (\$1,000,000) dollars, and any remodeling, refinishing, refurbishing, rehabilitation, alteration or repair of any public works project equal to or larger than one hundred thousand (\$100,000) dollars.
- Projects are awarded for a lump sum cost to the lowest qualified responsible bidder.
- An individual contract is issued for each project awarded utilizing the AIA 101 Owner Contractor Agreement and the AIA 201 General Conditions as modified.

#### **For projects with an estimated construction value less than \$50,000:**

- Projects may be awarded either:
  - Using a rotational equalization basis where the construction cost is based on time and materials. The cost will include a combination of unit prices for standard items and material x labor rate for remaining items and work. The University is committed to an equalization system that will ensure fair utilization of all contractors within the program. Through this process, CFPF will provide ongoing oversight of contractor utilization and performance and select the next available contractor to provide a time and material quotation for the project.

- Competitively bid to the pool where the award is based on a lump sum cost to the lowest qualified, responsible bidder. An individual contract is issued for each project awarded utilizing the AIA 101 Owner Contractor Agreement and the AIA 201 General Conditions as modified.

**Project Schedule/Duration:**

- The Master Agreement will commence in the Winter 2020 (approximate date: February 2020).
- Master Agreement duration: The term of the Master Agreement will be for an initial three (3) year term with an option to extend the contract for an additional two (2) one-year terms.
