-

1) Questions and Answers:

On page 15 of the RFP, it is identified that the Estimated MOUD Patients at Walker Reception Center is 150 annually. Is this a typo that is meant to state 150 people daily? If not, how many people are expected to be dosed per day?

Answer: The estimated MOUD patients for Walker Reception Center on page 15 of the RFP is 150 annually, not daily. The Department estimates that the number of patients to be treated per day will be approximately 25-30. Please keep in mind that this is only an estimate and could change based on the programs implemented as a result of this RFP process.
