

UConn Health - UCHC4-128502138 Lab Coats,Scrub Shirts,Pants&Jackets with Embroidery Services

<u>UConn Health RFP Section</u>	<u>Supplier Question</u>	<u>UConn Health Response</u>
Scope of Work	1. What color (s) are the items to be?	The majority of lab coats are ordered in the color white. Scrubs and warm up jackets are ordered in multiple colors depending on the needs of the various ordering departments.
Scope of Work	2. Is there going to be a choice of Medline vs Landau, or will the choice include both Brands? As they are very different in quality and scope I am wondering why they are placed together in this bid?	UConn Health currently purchases both Medline and Landau products as listed in the price section. These brands are the current minimal acceptable standards. Please see Scope of Work Section 2 line item 14.
Scope of Work	3. What is UCONN Health's inbound freight system? Triose?	No. Triose will review and approve any proposed third party shipping costs included in your proposal. Triose will either approve the use of your freight account or advise using UConn Health's freight account. See Scope of Work Section G. Shipping/Freight item number 1.
Scope of Work	4. Is embroidery on the garments to be listed separately from the cost of the garment, as the line item for those states NA or is embroidery not to be included?	Embroidery costs are to be priced separately for UConn Health review and comparison only as not every garment requires embroidery. While the embroidery, patch and logo need to meet UConn Health brand standards, some flexibility in customizing garments is allowed. Line item pricing is needed and will be added to the cost of the garment depending on the departmental needs for the garments.
