Cut charge: Packaged in 30 yard bolts. Cut charge of \$3.00 per yard is applied to any order under 30 yards per color. No cut charge over 30 yards per color.

Return Policy: Only full, uncut bolts will be accepted for return with pre-authorization. 35% re-stocking fee; 45 days from date of invoice; maximum 300 yards per color. Applicable freight charges apply. No returns accepted on custom materials.

Wallcovering Permeability, Moisture and Mold: One of the characteristics of vinyl wallcovering is that it has little or no moisture permeability. This characteristic can be an important benefit in terms of durability, cleanability and wall protection. If the design, construction or maintenance of a building allows liquid or vapor moisture to accumulate in a wall or wall cavity, vinyl wallcovering can act as a vapor barrier restricting the escape of moisture and increasing the risk of mold growth. In all cases, moisture and sources of moisture accumulation must be eliminated before installing any wallcovering material. Vinyl wallcovering does contain additives to resist mold and other microbial growth on the product itself but these additives will not prevent mold growth.

Perforation/Microventing: Vinyl wallcovering permeability can be increased through perforation/microventing. Perforation/Microventing is available on a custom order basis, 30 yard minimum quantity per color, \$2.95 per yard additional cost.

Custom Digital Printed Wall Surfaces Design: Unique ability to create digitally printed wall surfaces designs, wall murals, art impressions, graphic images, photo murals, & logowall. Consult with your sales associate for the opportunity to explore and create digital wall surfaces.

General Information

Terms and Conditions

All prices contained herein are contract net prices in United States Dollars. There will be an export document charge for all Canadian and International shipments. Regular terms are Net 30 days from date of invoice. All invoices are dated the day of shipment. Regular terms do not apply to special pricing. Special pricing terms are Net 10 days from the date of the invoice. Prices shown in sample books may no longer be in effect and are subject to change without notice. All merchandise is shipped F.O.B. Orangeburg, or processing points. Applicable sales tax will be charged unless a resale certificate is on file at Arc-Com for the "ship to" state. No discounts are allowed on freight charges. Late payment charges of 1-1/2% per month, 18% per annum or the highest amount allowable by law will be applied to past due accounts. **To open a Net 30 Account**, fax a signed request along with the following information to the attention of the Credit Department; the name and address of five trade references, company bank information and resale number. If an open account has not been established, Proforma or CBD payment will be required for all orders. Deposits placed against purchase orders requiring partial shipments, will be applied proportionately to each shipment. Shipments requiring a specific delivery release schedule will be billed according to Arc-Com's policy of billing fabric as ready, regardless of when the shipment is released. No order will be accepted for less than one yard per pattern number. For orders other than cut yardage, Arc-Com reserves the right, within reasonable tolerances and in accordance with industry standards, to ship bolts closest in yardage to the actual purchase order requirement. Individual orders exceeding a maximum length of 108 inches, a maximum combined length plus girth of 165 inches, or the maximum actual weight of 150 pounds and not meeting the minimum requirement for transport carriers will be subject to an additional handling charge of \$50.00 as designated by both DHL and UPS. Arc-Com products are intended for use in the contract furnishings industry and not intended for use in the apparel industry. Textiles purchased to ship outside the United States may be subject to duty and taxes. Please contact Customer Service for additional information.

Applicable Laws

Arc-Com manufacturers and tests products for industry applicable standards and fire codes. Test results are available upon your request through our Customer Service Department. They may be used as guidelines for specifying individual products, but in no case should they be considered a guarantee.

If a test, standard or law on a federal, state, local or international level is required other than those that are listed as a part of the specifications outlined in our price list or on the product tag, you must advise us of the specific statute either before specifying it or by listing it on your purchase order under each individual line item so that we may test to see that the product complies. Additionally, we may be able to comply with your requirements using additional processes. In any case, we will confirm our results in written form.

Quality Control

Arc-Com examines all products. Manufacturers and fabricators should examine fabrics carefully before cutting to verify correct pattern, color and yardage. Arc-Com will not be responsible for any claim if fabric is cut. All Quality Control claims will be handled on an individual basis. Arc-Com sells its products without the knowledge of its end use and does not accept claims for any labor charges. Color samples must accompany purchase orders if a color match is requested. Arc-Com will advise as to its ability to comply. Variation in color cannot be avoided, as no two color lots are exactly the same. Arc-Com, as customary to the industry, reserves the right to substitute an alternate component having similar characteristics, without notice, if a raw material is unavailable for production.

Warranty

Arc-Com warrants that its products are manufactured in accordance with the Textile Fiber Products Identification Act. Arc-Com products meet or exceed the industry standards as defined by the Association for Contract Textile Guidelines (ACT). Our warranty is given expressly and in lieu of any and all other warranties either expressed or implied, including the warranties of merchantability and fitness for a particular purpose. **For detailed warranty information, please visit our website at www.arc-com.com.**

Returns

Requests to return fabric must be approved by Arc-Com. All returns are at the sole discretion of Arc-Com. Products approved for return will be issued a Return Authorization Number. A 35% restocking fee will be applied. For textiles, no orders of less than ten (10) yards will be accepted for return. For wallcoverings, no orders less than full pieces will be accepted for return. No return will be accepted on merchandise that has been cut, processed, or marked in any way. Fabric must be rolled on a tube as originally shipped. Special order fabric not regularly carried in stock may not be returned. All returns must be prepaid and include a return authorization number on the shipping label. No returns will be authorized beyond 60 days from date of shipment. Authorized returns must be received no later than 30 days from date of issue of a Return Authorization. Return Authorizations automatically expire 30 days from the date of issue.

Cancellation

Requests to cancel purchase orders must be made in writing. Each request will be considered on its own merit. Cancellations are not automatic and are valid only upon issuance of a cancellation number. Requests to place an existing order "on hold" are valid only upon issuance of an "on hold" authorization number.

General Information

Discontinued Items

Patterns that are being phased out or discontinued may be ordered if minimum yardage requirements are met and textile construction is available. Items not appearing in this price list may be available in limited quantities, or may be produced on a special order basis.

Placing an Order

To place an order, check stock or obtain additional information please contact your local Account Manager or Customer Service at 800-223-5466. Please include product name and number, color name and number, yardage requirement, name of firm originating specification and bill to and ship to address on all orders. This information can be faxed to your local showroom or Arc-Com Headquarters at 845-365-1285.

Credit Cards

Arc-Com accepts Visa, MasterCard and American Express. For additional information please contact the Credit Department.

Reserves

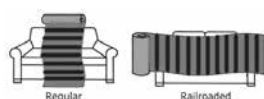

Reserves may be placed on product to assure prompt delivery. Reserves will be held for a maximum of five (5) business days and may be extended on the fifth day for an additional five (5) business days.

Samples

All samples remain the property of Arc-Com. Arc-Com reserves the right to update sample libraries or remove samples without prior notice.

Repeats / Railroaded

Pattern repeats vary. Repeats shown in price list and sample books are approximate. To avoid possible shortages, allowances should be made for all patterns with a repeat.

When  is displayed, it indicates that the pattern may be applied either vertically or horizontally. Example: If a stripe is woven side to side across the 54 inch width of a fabric, when  is affixed to it, it is a designation that the stripe is displayed and ticketed as a vertical stripe. When a jacquard pattern has  affixed it designates that the pattern is woven horizontally but ticketed and displayed as a vertical. When ordering fabric, instructions should accompany your order to the manufacturer as to the choice of direction of an application.

Copyrighted Designs

Arc-Com's designs are all copyrighted under U.S. and International copyright laws.

GSA Schedule

All drapery, cubicle, print and bedspread fabrics are available on GSA schedule. For information on how to specify our products on schedule, please contact our GSA administrator at our Orangeburg Headquarters location.

Primary Usage/Wallcovering Applications

Arc-Com lists its products alphabetically by the primary usage of the textile. Categories listed are Upholstery, Cubicle, Panel, and Wallcovering. Certain fabrics have been designed for multiple uses. Additional finishes may be required if the intended use of the fabric is not consistent with the primary use as designated herein. It is the purchaser's responsibility to determine code compliance for products used in any way other than the primary use as designated herein. With the exception of the wallcovering line, purchase orders for any products ordered for wall application, must be placed in writing and boldly marked "**For Wallcovering Application**". Arc-Com bears no responsibility for improperly marked purchase orders. Any problems arising from an improperly marked order for either product or labor will be the responsibility of the purchaser. To prevent potential installation problems, wallcovering applications should be reviewed with the installing contractor and your Arc-Com Account Manager prior to purchasing textiles. No credit memorandum will be issued for claims against product unless the Quality Control Department has examined the fabric and has determined a product defect exists.

Arc-Com Corporate Advantage® and Corporate Alliance Program®

Corporate Advantage and Corporate Alliance Programs are distinctive services designed to meet the needs of corporate end-users and furniture manufacturers. Corporate Advantage is a program tailored to assist Arc-Com's corporate end-users that provides a host of services including inventory reserve programs; dedicated customer service representatives; records of purchases by location; and guaranteed pricing. The Corporate Alliance Program is a partnering relationship with furniture manufacturers that facilitates the use of Arc-Com textiles on contract furniture. This program along with numerous Arc-Com grade-in programs, is promoted in conjunction with various furniture manufacturers.

Technical Services / COM Approvals

Technical Information

Fire code information is available in the form of a letter of certification from Arc-Com or certified test data from an independent testing facility. Test results are provided by Arc-Com solely as a guideline and are not to be construed as a guarantee. As test procedures and requirements may change, published test information may be invalid. For additional testing from an independent testing laboratory regarding a specific style number contact Customer Service. A purchase order will be required prior to testing and a fee will be quoted and charges applied.

Textile products, both natural and synthetic, are often treated during the spinning, dyeing, weaving and finishing processes. Proper consideration should be given to the general conditions relating to heat, humidity and ventilation waiting period necessary to aerate products before they are installed at the final destination.

Arc-Com products are sold without its knowledge of the end use or installation. Test results are provided by Arc-Com solely as a guideline and no guarantee or representations of any kind are made in such regard. If the intended application of product requires a specific test result, it may be possible for Arc-Com to provide a product that achieves the required test results. It is the purchaser's responsibility to advise Arc-Com in writing of any specific performance requirements at the time the order is placed. Contact Customer Service for further information.

Crypton® & Crypton®green

Arc-Com offers an extensive line of Woven Crypton® & Crypton® green high performance textiles for contract, healthcare, hospitality and institutional applications. Designed to maintain a soft comfortable hand, all Arc-Com Woven Cryptons® and Crypton® green fabrics are breathable, bacteria, stain and moisture resistant and meet extremely high durability standards. All Crypton® green fabrics are designed with a reduced environmental impact. All Arc-Com Crypton® and Crypton® green upholstery fabrics are noted in the price list. Please contact your local account representative or customer service for additional information or to inquire about custom Crypton® or Crypton® green patterns.

Seating COM Approvals

Arc-Com's fabrics are pre-approved for application on many furniture manufacturers' seating styles including a wide range of Steelcase, Haworth and Herman Miller products. A complete list of approvals is available by request from our Customer Service Department. Although Arc-Com continually updates this information, we recommend you verify COM approvals at the time of specification as these approvals are subject to change. Additional Arc-Com textiles can be tested at your request. Please contact your local Account Manager or our Customer Service Department.

Arc-Com textiles are also available through grade-in programs with various furniture manufacturers. Some of these manufacturers provide fabric cards with selected Arc-Com upholstery fabrics for your convenience and ease in specifying. A complete list of participating furniture manufacturers is available by request from our Customer Service Department. Manufacturers' cards featuring Arc-Com can be obtained from participating furniture suppliers.

System COM Approvals

Arc-Com panel fabrics are pre-approved for application on numerous manufacturers' furniture systems. A complete list of approvals is available by request from our Customer Service Department. Although Arc-Com continually updates this information, we recommend you verify COM approvals at the time of specification as these approvals are subject to change. Additional Arc-Com textiles can be tested at your request. Please contact your local Account Manager or our Customer Service Department with project name and all pertinent information.

Upholstery Cleaning Codes (Written instructions available upon request)

- S** Only mild pure water-free dry cleaning solvents may be used. Cleaning by a professional service is recommended.
- W** Clean only with water based shampoo or foam upholstery cleaner. Cleaning by a professional service is recommended.
- WS** Water based cleaning agents and foam may be used for cleaning. This fabric may also be cleaned with mild, water-free solvents. Cleaning by a professional service is recommended.

There are a variety of commercial chemical cleaners available on the market which should be scrutinized carefully as they may not be appropriate for woven textiles or coated products such as vinyl and polyurethane.

These products may come in liquid, wipes and spray bottles and may have some immediate positive results, however, over time there may be a filmy build up of the chemical and degradation of the product. This may not be apparent from your initial applications.

Please refer to the instructions of the manufacturers and note that many of these chemicals should be avoided on porous, soft surfaces. Refer to arc-com.com for product specific cleaning instructions.

Cubicle Curtain Laundering: Please visit www.arc-com.com for laundering instructions.

Special Processing

Overage Requirements

Due to working loss in all finishing processes, an additional 5% overage should be added to your original fabric requirement. For orders 15 yards and less we recommend you add 1 yard.

Nano-tex® Stain Resist Finish provides an invisible barrier that causes liquids to bead up and roll off textiles without penetrating the fibers. Liquids can be blotted off the face of the fabric to prevent staining. Fabric maintains its natural hand and breathability. Nano-tex® is environmentally friendly and recyclable. Nano-tex® can be applied to most Arc-Com fabrics, contact Customer Service at: 800-223-5466.

Nano-tex® Stain Resist (5 yard minimum)

5 - 73 yds: **\$215.00 minimum charge**
74+ yds: **\$2.95 per yd.**

DuraBlock™ Moisture Barrier (5 yard minimum)

Can be laminated to any textile that already has Nano-tex®. DuraBlock™ is a breathable barrier that prevents liquids from reaching the seat cushion. It is 100% antimony-free polyester and is recyclable. To add DuraBlock™ to fabric that already has Nano-tex®:

5 - 34 yds: **\$225.00 minimum charge**
35+ yds: **\$6.50 per yd.**

Nano-tex® and DuraBlock™ Combination (5 yard minimum)

5 - 31 yds: **\$250.00 minimum charge**
32+ yds: **\$8.00 per yd.**

Nano-Tex FR and Bio-Am® Antimicrobial Finish

Nano-Tex® FR can be added to any inherently flame resistant, cubicle fabric, such as 100% Trevira® CS, or FR Polyester. We recommend this be done in conjunction with our Bio-Am® Antimicrobial finish. Arc-Com offers a non-leaching antimicrobial that has been tested and proven effective against bacteria and microbes that can cause odor, staining, and deterioration commonly found in healthcare environments. Bio-Am® contains no phthalates, lead, triclosan, dioxins, arsenic, tin, heavy metals, biguanides, bischlorinated phenols or halogenated compounds. When applied to FR Polyester Cubicle fabrics, this finish is effective after 25 commercial launderings and is FR neutral to vertical flame tests. We recommend fabrics be treated with Nano-tex® Stain Resist in conjunction with Bio-Am®.

72" FR Cubicle Fabrics

Nano-tex® FR & Bio-Am® Combination

1 to 76 yds: **\$250.00 minimum charge**
77+ yds: **\$3.25 per yd.**

INCASE™ is an advanced stain and microbial resistant treatment, that works at the molecular level resulting in liquids immediately rolling away. INCASE™ allows both oil and water based stains to easily release from the fabric when cleaned. Only fabrics with no other finishes can be treated with INCASE™.

INCASE™ Fabric Protection (15 yard minimum)

\$2.75 per yd.

INCASE™ Fabric Protection FR (50 yard minimum)

\$3.50 per yd.

Special Processing

GreenShield® is an environmentally friendly stain resistant finish that provides superior water and oil repellency. GreenShield® uses a lower flourochemical content than most of the stain resistant technologies available in the market today. Only fabrics with no other finishes can be treated with GreenShield Stain Resist.

GreenShield® Stain Resist (10 yard minimum)
\$2.50 per yd.

Arc-Com Moisture Barrier (5 yard minimum)
 Recommended for use with fabrics that have INCASE™, GreenShield®, Teflon® & Generic Stain Resist finishes.
5 - 34 yds: \$225.00 minimum charge
35+ yds: \$6.50 per yd.

Fabrics treated for repellency fight off dry soil and nasty, unpredictable spills and splashes, allowing liquids to bead up and roll off. Liquid spills can easily be wiped away when blotted with a clean cloth, and dry soil can be brushed off easily.

Teflon® Stain Resist (Or equal to)
1 to 66 yds: \$100.00 minimum charge
67+ yds: \$1.50 per yd.

Acrylic Backing for Upholstery One Coat
1 to 80 yds: \$200.00 minimum charge
81+ yds: \$2.50 per yd.

One Coat Acrylic Backing with Teflon® Combination
1 to 57 yds: \$200.00 minimum charge
58+ yds: \$3.50 per yd.

Special Wallcovering Backing with Stain Resist Finish
 It is recommended that a special acrylic backing be applied when an upholstery fabric is being utilized as a wallcovering. These fabrics must also be treated with a stain resist finish:
1 to 50 yds: \$225.00 minimum charge
51+ yds: \$4.50 per yd.

Flameproofing

The fire code requirement, weight and content of a fabric relates directly to the price of flameproofing. Please confirm pricing before quoting a client. Most flameproofing treatments can withstand up to 20 dry cleanings without re-flameproofing.

Standard Flameproofing:
1 to 39 yards: \$125.00 minimum charge
40+ yards: \$3.25 per yd.

Flameproofing with Stain Release:
1 to 39 yards: \$150.00 minimum charge
40+ yards: \$4.00 per yd.

California Technical Bulletin 133

Only the furniture manufacturer can certify compliance with **California TB 133**. Fabric by itself or components can be tested or certified by the furniture manufacturer for use under the standards of California TB 133. Arc-Com can help you in attaining information and certification from the furniture manufacturer of your choice. Certain fabric can be treated to help pass TB 133 requirements. Please call Customer Service for assistance.

IMO

Arc-Com has many upholstery textiles that either pass IMO (International Maritime Organization) standards or when used with the appropriate components, can pass IMO standards. For other application, Arc-Com can alter fabric contents or treat fabrics to pass IMO. Please contact Customer Service for assistance.

Ordering Information

Customer Service	Phone: (800) 621-5250 (212) 686-6056 Extension 4 Fax: (212) 686-6014 Website: www.CoralFabrics.com Email: info@coralfabrics.com Hours: 9:00 AM - 5:00 PM EST
Bolt Sizes	On bolt orders every effort will be made to ship close to the requested yardage. However, industry standards do allow for up to a 5% overage due to bolt sizes.
Memo Samples	Memo samples of all of CORAL'S patterns are available. For a quick view, or to request particular memo samples please visit our website www.coralfabrics.com or call or fax our New York office at 800-621-5250, fax 212-686-6014.
Cancellations	If you wish to cancel an order, each request will be examined on its own merit. You must be issued a cancellation number. In no case may a cancellation be assumed.
Care And Maintenance Instructions	Maintenance instructions are listed on the back of our sample books. If additional information is required please contact our Customer Service Department.
Color Matching	Fabrics should be examined carefully before cutting to verify that color and pattern are as ordered. Since no two print runs or dye lots can be color matched identically during processing, there is bound to be a slight amount of variation. We will however, always attempt to ship a satisfactory commercial match. Any fabric that is cut cannot be accepted for return. Should an exact match be required, please submit a cutting with your order.
Custom Capabilities	As is industry standard, custom products are sold by the bolt with a maximum overage of 10%. Production minimums vary, and developmental charges may apply . Please consult your local representative or the Coral Customer Service Department for complete details.
Returns	Returns are not acceptable without Return Authorization. Reasonable requests for returns must be received within 30 days of invoice. There will be a 25% restocking charge plus freight charges, unless the fault is Coral's. Merchandise authorized for return must be received within 30 days. Credit will not be issued unless the fabric is received within 30 days from the date of authorization. If return is not received within 30 days, authorization is immediately revoked. Absolutely no cancellation or return on materials which have been specially processed, fabricated or custom ordered. Under no circumstances will cuts of less than 15 yards be accepted for return. Returns will not be accepted if shipped to our New York Office.
Terms and Conditions	Terms are net 30 day upon Factor approval. No discounts are allowed on freight or sales taxes. Applicable sales taxes are charged unless a resale card is on file at Coral. It is against our policy to accept claims for any labor charges. Price subject to change without notice. Freight: FOB Spartanburg, SC or points of processing. Not responsible for typographical errors.

Processing Information

Acrylic Backing with Soil & Stain Repellent Finish	In order to add an acrylic backing, all fabrics must be treated with a Stain Repellent Finish The below prices reflect both processes. Upholstery 1-50 yards \$200.00 min. 50+ yards \$4.00 per yard
Anti-Microbial Finish with Nanotex Stain Repellent	The combination of Nanotex / Anti-microbial Immersion Finish resists the development and growth of a wide range of bacteria and fungi while protecting against water and oil-based stains and airborne dirt. \$4.00 per yard or \$200.00 min.
Anti-Microbial Finish with Moisture Barrier	Our Anti-Microbial Moisture Barrier is a product that we can laminate to the under side of most of our fabrics for protection against fluids penetrating into the cushion. It contains specific agents effective against many bacterial and fungal microorganisms. \$9.00 per yard - 1 piece /50 yards min.
Upholstery Fabric Fire Barrier Treatment	Most of our upholstery fabrics can be processed with a fire barrier treatment. This treatment will eliminate the double upholstery process required when a fire barrier fabric is being used. Upholstery fabrics when processed with the fire barrier treatment, and used in combination with other compatible furniture components, have been shown to perform well under the fire test conditions of the California Bulletin 133. Information regarding the upholstery fabrics recommended to be Fire Barrier treated can be obtained through the Customer Service Department.
Flame Retardant Treatment	Flame retardant treatment or immersion of a fabric in a special chemical bath renders most fabrics flame resistant. 10 yard minimum. Drapery Treatment 10-59 yards \$300.00 min. 60 yards+ \$3.50 per yard Drapery NFPA 701 Certification - \$300 Upholstery Treatment 10-50 yards \$300.00 min. (NFPA 260 or MVSS-302) 50 yards+ \$4.00 per yard *Check with customer service if fabric can be successfully treated.
Soil & Stain Repellent Treatment	Generic Soil & Stain treatment or Nanotex Treatment 1-50 yards \$200.00 min. 50+ yards \$3.00 per yard

A.C.T. Performance Standards

ACT has developed the following Performance Guidelines to make fabric specification easier. The 5 symbols give architects, designers, and end-users a vast amount of performance information in a concise visual way. The test method for each icon is explained below.

Please contact your Coral Customer Service Team for an ACT Performance Guide.

Flame Resistance refers to a fabric's ability to resist burning.

Upholstery California Bulletin 117 Section E Direct Glue Wall coverings ASTM E 84 (adhered method) Panels and Upholstered Walls ASTM E 84 (unadhered method) Drapery N.F.P.A. 701 Small Scale - 2004 Edition

Colorfastness is a fabric's ability to retain color in various conditions. Crocking refers to the rubbing off of color from a fabric when subjected to abrasion.

Upholstery AATCC 8 Dry Crocking, Class 4 minimum Wet Crocking, Class 3 minimum

Direct Glue Wall coverings AATCC 8, Class 3 minimum Panels and Upholstered Walls AATCC 8, Class 3 minimum Drapery AATCC 8 (solids), AATCC 116 (prints), Class 3 minimum

Colorfastness to light refers to a fabric's ability to resist fading when exposed to light.

Upholstery AATCC 16A or AATCC 16E, Class 4 minimum at 40 hours Direct Glue Wall coverings AATCC 16A or AATCC 16E, Class 4 minimum at 40 hours Panels and Upholstered Walls AATCC 16A or AATCC 16E, Class 4 minimum at 40 hours Drapery AATCC 16A or AATCC 16E, Class 4 minimum at 60 hours

Pilling is the formation of fuzzy balls on the surface of the fabric. Pilling occurs when loose fibers in the fabric are worked to the surface after the fabric is subjected to abrasion.

Breaking Strength measures a fabric's ability to resist tearing or breaking when subjected to tension.

Seam Slippage refers to the condition when fabrics pull apart at a sewn seam.

Upholstery Brush Pill ASTM D3511, Class 3 minimum Breaking Strength ASTM D3597-D 1682-64, 50 lbs. minimum in warp and weft Seam Slippage ASTM D3597-D434, 25 lbs. minimum in warp and weft

Panels and Breaking Strength D5034 Grab Method, 35 lbs. minimum in warp and weft Upholstered Walls Seam Slippage ASTM 3597-434, 25 lbs. minimum in warp and weft

Drapery Seam Slippage ASTM D3597-434 for fabrics over 6 oz. / sq. yard, 25 lbs. minimum in warp and weft Seam Slippage ASTM D3597-434 for fabrics under 6 oz. / sq. yard, 15 lbs. minimum in warp and weft

Abrasion resistance is the ability of a fabric to withstand surface wear from rubbing.

Upholstery ASTM D4966 (21 oz. weight) 20,000 rubs Martindale method

Heavy Duty Upholstery ASTM D4157-02 modified (#10 cotton duck) 30,000 double rubs Wyzenbeek method ASTM D4966 (21 oz. weight) 40,000 rubs Martindale method

Upholstery Fabrics

*Our Crypton prints are available on all of our drapery weight print ground cloths for a minimum of one piece. Please call your local representative or the New York Office for assistance.

Barrier Upholstery

Crypton®, Fail Safe® and Nanotex + Durablock are revolutionary, technologically advanced fabric systems which involve special finishes and preparation. The technology adds protective features to fabrics while still retaining their original texture, surface characteristics, breathable comfort and hand. These Barrier fabrics are engineered for high performance; they feature excellent stain resistance, a total moisture barrier, anti-bacterial protection, strength and durability, a luxurious texture and the ability to meet upholstery flammability requirements. Beautiful and luxurious, yet miraculously strong and durable, Crypton®, Fail Safe® and Nanotex + Durablock fabrics are among the most versatile, and practical, fabrics ever created. They solve design problems, will stay clean, and last longer than any other textile you've ever used.

Please note that any of our in-line upholstery fabrics can be treated with the Nanotex + Durablock finish to make the fabric a moisture barrier product.

Featuring:

Alternate Crypton® Ground Cloths ...

Crypton® print designs, denoted by an asterisk (*) on the pages following, are available from stock on their upholstery "host base cloth" or any of our alternate Crypton® print cloths. The minimum order required for a change in base cloth is 5 yards. Please contact your sales representative or Customer Service for additional information.

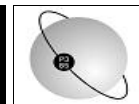

Serenade 16 Ounces per linear yard, 54" wide, 100% Polyester textured "Linen" weave. Permanently encased yarns in Crypton® copolymer formula. Engineered for stain, moisture, and bacteria repellency. Cleanable with powdered enzyme detergent, and water. Tough and flexible. Durability to 100,000 double rubs on the Wyzenbeek ASTM D 3597 abrasion test with cotton duck. Complies with the California Bulletin 117 Section E, UFAC Class 1, NFPA 260. FR specifications. Recommended for upholstery applications.

Titanium 12 Ounces per linear yard, 54" wide, 100% Polyester textured crepe weave. Permanently encased yarns in Crypton® copolymer formula. Engineered for stain, moisture and bacteria repellency. Cleanable with powdered enzyme detergent and water. Tough and flexible. Exceeds 100,000 double rubs on the Wyzenbeek ASTM D 3597 abrasion test with cotton duck. Complies with the California Technical Bulletin 117 Section E, UFAC Class 1, NFPA 260. FR specifications. Recommended for upholstery applications.

U. S. Patents 5,565,265 & 5,747,392 & 6,024,823 and 6,165,920. Other U. S. and Foreign Patents Pending CRYPTON® is a Registered Trademark of Hi-Tex, Inc.

For **maintenance and light cleaning**, brush off dirt. Add a quarter cup of mild soap to a gallon of lukewarm water. Use a sponge or soft brush to apply the solution, allowing it to soak into fabric. Rinse thoroughly with clean water, then air dry. **Removable umbrella and cushion covers** may be machine washed in cold water using normal amounts of mild soap. Air dry. To **spot clean**, spray with a mist of water and mild soap, then clean vigorously with a sponge, brush or clean towel. Rinse thoroughly in clean water, then air dry, blot or remove, use a **wet vacuum**. Repeat final steps until all soap residue is gone. To **clean stubborn stains and/or mildew**, use 1 cup bleach and 1/4 cup of mild soap per gallon of clean water (increase for severe stains). Soak affected area for 20 minutes before using sponge or clean towel to remove stain. Rinse well and air dry. **Removable umbrella and cushion covers** may be machine washed in cold water using normal amounts of mild soap and 1 cup of bleach. Air dry. **DO NOT DRY CLEAN. IF NECESSARY, CAREFULLY IRON ON SYNTHETIC SETTING; DO NOT USE STEAM.**

Green Print Cloth Collection Alternate Ground Cloths...

- Greenbay** 4.4 ounces per linear yard, 54" wide. 100% **Recycled** Polyester with permanent flame resistance. Sheeting weave made from recycled textured filament yarns warp and filling. Washable and dry cleanable, dimensionally stable with less than 2% residual shrinkage. Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Recommended for drapery and bedding applications.
- Greenwood** 9 ounces per linear yard, 54" wide. 100% **Recycled** Polyester with permanent flame resistance. Hookweave texture made from recycled textured filament yarns warp and filling. Washable and dry cleanable, dimensionally stable with less than 2% residual shrinkage. Complies with the following FR specifications: NFPA 701, 2004 Edition, City of Boston and New York fire codes. Recommended for drapery and bedding applications.
- Greenland** 9 ounces per linear yard, 54" wide. 100% **Recycled** Polyester with permanent flame resistance. Oxford weave made from recycled textured filament yarns warp and filling. Washable and dry cleanable, dimensionally stable with less than 2% residual shrinkage. Complies with the following FR specifications: NFPA 701, 2004 Edition, City of Boston and New York fire codes. Recommended for drapery and bedding applications.
- Greenfield** 9.5 ounces per linear yard, 54" wide. 100% **Recycled** Polyester with permanent flame resistance. Sateen weave made from recycled textured filament yarns warp and filling. Washable and dry cleanable, dimensionally stable with less than 2% residual shrinkage. Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Recommended for drapery and bedding applications.
- Greenway** 12 Ounces per linear yard, 54" wide. 55% Recycled Polyester - 45% FR Polyester, flame resistant. Double Sided Satin with Light Dimming qualities. Excellent insulating and sound-baffling characteristics. Greenway is treated with an Antibacterial and Antimicrobial finish. Washable and dry cleanable. Complies with the following FR specifications: NFPA 701, 1989 and 2004 Editions, City of Boston, New York, and the State of California Title 19. Recommended for drapery and Cubicle Curtain applications.

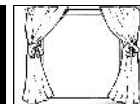

*Please note: all of our drapery prints are available on various alternate base cloths. For Crypton base cloths the minimum order required is 5 yards. For drapery weight alternate base cloths the minimum order required is 75 yards.

Alternate Ground Cloths...

Please note that all of our prints are stocked on a "Host" base cloth as shown in our sample books. However, most are available on alternate base cloths for a minimum of one piece. Specifications for the alternate print grounds follow; please contact your local representative or our New York office for pricing and particulars.

- Ballet** 12 Ounces per linear yard, 54" wide, "All spun basket weave with the softness and resilience of a cotton duck fabric" 100% spun polyester with an "Intrinsic™" permanent flame resistance. Passes over 50,000 double rubs (ASTM D-3597 M). Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Recommended for draperies, bedspreads and upholstery applications
- Crescendo** 8 Ounces per linear yard, 54" wide, "Dobby Texture", 100% FR Polyester - inherently flame resistant. Washable and dry cleanable. Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York, and the State of California Title 19. Recommended for drapery and bedspread applications.
- Applause** 5.25 Ounces per linear yard, 54" wide, textured filament warp and filling Sheeting weave, 100% Polyester, "Intrinsic™" permanent flame resistance, Visa® soil and stain release finish. Washable and dry cleanable. Permanently FR and complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Recommended for drapery and bedspread applications.
- Concerto** 10 Ounces per linear yard, 54" wide, poplin cotton like weave and textured. 100% Polyester, "Intrinsic™" Permanently flame resistant. Passes NFPA 701, 1989 and 2004 Editions of flame resistance test methods and complies with other major FR specifications, Visa® soil and stain release finish. Washable and dry cleanable. Dimensionally stable. Passes over 50,000 double rubs on the Wyzenbeek #10 cotton duck abrasion test - ASTM-D-3597-M Recommended for drapery, bedspread and upholstery applications
- Maestro** 7.5 Ounces per linear yard, 54" wide, 100% Textured Polyester, "Intrinsic™" Permanently Flame Resistant. Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Visa® soil and stain release finish. Washable and dry cleanable. Easy care. Dimensionally stable. Recommended for drapery and bedspread applications.
- Cantata** 12 Ounces per linear yard, 54" wide, 100% Polyester. Sanded face, "Stain Smart™", a new permanent treatment provides Excellent repellency. Liquid spills bead up and wipe right off. Soil and stains wipe away. Ground-in stains wash out easily. Visa® soil and stain release finish. Machine washable. Easy care. Dimensionally stable. Cleaning Code: WS, "Intrinsic™". Permanently flame resistant. Complies with the following FR specifications: NFPA 701, 1989 and 2004 Editions, City of Boston, New York and the State of California Title 19. Passes over 50,000 double rubs on the Wyzenbeek #10 cotton duck abrasion test - ASTM-D-3597-M. Recommended for draperies, cubicle privacy curtains, bedspreads and upholstery applications.
- Soprano** 7.5 Ounces per linear yard, 54" wide Textured filament warp, textured filament filling, Ottoman weave. 100% Polyester FR blend. Inherently flame resistant. Complies with the following FR specifications: NFPA 701 Small Scale, 1989 and 2004, City of Boston, New York and the State of California Title 19. Washable and dry cleanable. Recommended for drapery and bedspread applications.
- Vespers** 12 Ounces per linear yard, 54" wide. Double Sided Satin with Light Dimout qualities. Excellent insulating and sound-baffling characteristics. 100% Polyester. Flame resistant. Washable and dry cleanable. Complies with the following FR specifications: NFPA 701, 1989 and 2004 Editions, City of Boston, New York, and the State of California Title 19. Recommended for drapery applications.
- Medley** 12 Ounces per linear yard, 54" wide. Textured filament warp and filling yarns with a natural "Linen" texture weave. 100% Polyester FR Blend Inherently Flame Resistant. Complies with NFPA 701-2010. Washable and dry cleanable. Recommended for drapery and bedspread applications.
- Eclipse** 14 ounces per linear yard, 54" wide. 100% Polyester Sateen like face with Three Pass Blackout FR Acrylic Backing. This fabric provides 100% Light Blackout while also providing noise reduction properties as well as thermal insulation.

Shower Curtains

The Splash Collection is comprised of 72" wide decorative Dobby and Jacquard solid designs. The collection consists of ten (10) patterns in thirty-one (31) color ways. All patterns in this program are ideal for shower curtain, drapery, bed skirt and top-of-the-bed applications. In addition, all patterns are inherently flame resistant and feature anti-microbial and anti-bacterial properties. The Splash Collection may be purchased as fabric and/or a finished shower curtain. Product may also be purchased as Bath-in-a-Bag, complete with 72" fabric, liner, and hooks, assembled and ready to be installed.

Bedding Encasement Products Quick Reference

SOFTCOVER ULTIMATE: 100% Polyester, patent pending Exclusive Zipper / Hook Lock bed bug proof locking zipper. 100% Waterproof and Dust Mite Proof on all six sides (this is best for properties that flip the mattress). They are breathable. Impermeable to Mold and Bacteria. The mattress thickness (9"- 15") must be specified when ordered. They are guaranteed for 100 launderings up to 220 degrees. They are Class "B" FR although FR is not required for this product. They are manufactured in the USA.

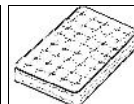

SOFTCOVER SUPERIOR: 100% Polyester, patent pending Exclusive Zipper / Hook Lock bed bug proof zipper. Waterproof top (from the zipper up). Protects against Bed Bugs, Dust Mites, Mold and Bacteria. They stretch to accommodate any mattress thickness from (9"-15"). They are guaranteed for 100 launderings up to 220 degrees. They are Class "B" FR, although FR is not required for this product. This product is manufactured in the USA and/or imported.

KLEENCOVER SUPERIOR: 100% Polyester, patent pending Exclusive Zipper / Hook Lock bed bug proof locking zipper. Waterproof top (from the zipper up). Protects against Bed Bugs, Dust Mites, Mold and Bacteria. They stretch to accommodate any mattress thickness from (9"-15"). They are guaranteed for 50 launderings up to 120 degrees. This product is imported.

BED BUG PROOF BOX SPRING COVER: 100% Polypropylene Total Encasement. Exclusive Zipper / Hook Lock. Protects against Bed Bugs, Dust Mites, Mold and Bacteria. This product is imported.

KLEENCOVER PILLOWSAFE: 100% Polyester. Total pillow encasement. Waterproof, Breathable, Non-Allergenic, Bed Bug Proof, Impermeable to Dust Mites, Mold and Bacteria. This product is imported.

READY SHIP
DRAPERY HARDWARE COLLECTION
PRICE LIST

JUNE 2015

GRABER®

GENERAL INFORMATION

RECOMMENDED ROD PLACEMENT

We recommend mounting your drapery pole 6 1/2" to 7" above the glass. Allow at least 3" on each side of the window for you to be able to open draperies completely.

HOW TO ORDER

For wood order by part number and finish (XX).

For example:

3-706-01 = 1 3/8" Ball Finial with White Finish

3-700-14 = 1 3/8" Smooth 4' Pole with Caramel Finish

Complete listing of wood part numbers shown in brochure. All wood finials, rods, brackets and accessories sold separately.

For metal order by part number. Rod sets not available in multiple finishes. The rods are sold as sets that include a telescoping rod, finials, brackets and mounting hardware.

DELIVERY & RUSH ORDERS

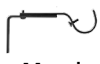

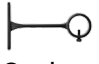

All items will be shipped within 1 week following receipt of order.

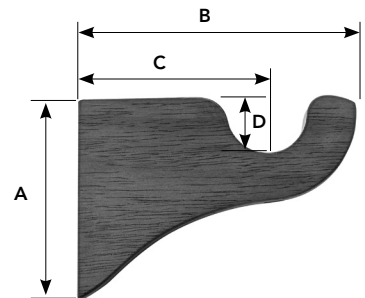

RECEIPT OF GOODS

Do not accept any damaged boxes from Carrier.

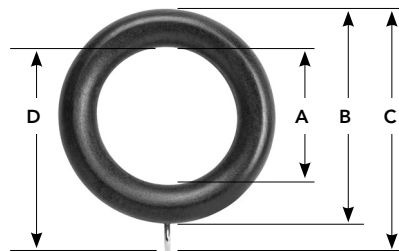

Inspect all products upon receipt or damage claims may be denied.

WARRANTY

SPRINGS WINDOW FASHIONS ARTISAN DRAPERY HARDWARE WARRANTY

TYPE OF WARRANTY

Limited Lifetime on:

- All drapery hardware products using all drapery hardware components

WHAT IS COVERED

This product is warranted against original defects in materials or workmanship for as long as the original purchaser owns the product provided that:

1. the product was properly installed in a residential dwelling;
2. the product was made or assembled exclusively from Springs Window Fashions materials and components;
3. Springs Window Fashions recommendations were followed with regard to limitations and specifications.

WHO IS COVERED

This warranty extends only to you as the original purchaser of the above stated product.

OBLIGATIONS TO THE CONSUMER

The obligations of Springs Window Fashions are limited to the repair or replacement of parts or products found to be defective.

Springs Window Fashions is not responsible for shipping costs or labor costs, for measuring and taking the product down or for remeasuring or reinstalling the product.

If repairs are made under this warranty, the repairs will be made with like or similar parts.

WHAT THE WARRANTY DOES NOT COVER

This warranty does not cover conditions or damages caused by abuse, accidents, alterations, misuse or failure to follow instructions for measurement, installation, use, cleaning or maintenance. Normal wear and tear, including but not limited to the items or occurrences below, is not covered by the warranty.

- Some slight warpage, as well as natural variations in color and grain, are normal with a wood product and are not considered defects.
- Some loss of color intensity or discoloration may occur in wood finishes when exposed to direct sunlight over long periods of time.
- All cords will eventually wear out.

Springs Window Fashions considers these items and occurrences normal wear and tear and they are not covered by this warranty.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WRITTEN OR ORAL WARRANTIES OR OBLIGATIONS AND LIABILITIES.

No person is authorized to extend or alter this warranty.

SPRINGS WINDOW FASHIONS SHALL HAVE NO LIABILITY WHATSOEVER FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so this limitation or exclusion may not apply to you.

SERVICE

Warranty claims must be accompanied by the original sales receipt as well as details regarding the nature of the problem, location of the product, etc. To obtain warranty service contact:

A nominal processing and handling fee of \$15 Net will be applied to all orders requesting third party freight.

Ordering Information

To expedite order entry and to ensure proper service, mail, fax, or email all orders direct to orders@hbftextiles.com.
HBF Textiles, 900 12th Street Drive NW, Hickory, NC 28601, 828.485.2690 Fax.
All orders faxed and then mailed to HBF Textiles must be marked "Confirmation".
HBF Textiles will not be responsible for duplicate orders left unmarked.

All fabrics are sold in one-half (1/2) yard increments. There is a two (2) yard minimum per colorway per order.

All leathers are sold by the whole hide. There is a whole hide minimum per colorway per order. For additional half-hide requests, add a \$25.00 Net cutting fee. Due to the irregular size of hides exact square footage will fall within a tolerance of one-half hide.

Orders are subject to our acceptance with issuance of a formal order confirmation. Our order confirmation is final and binding. Any subsequent changes must be requested in writing and subject to our ability to incorporate the requested change.

Note: There will be a \$50.00 Net processing fee for orders that are requested to be processed and shipped the same day as received.

Terms of Payment

If credit has not been established, full payment, including shipping (see HBF Textiles Guaranteed Freight Program), must accompany the order. Credit may be established upon acceptance of satisfactory credit references. HBF Textiles also accepts MasterCard, Visa and American Express. When order is placed please provide account number, expiration date and name of card holder. Open account terms; NET 30 days, FOB Manufacturer. HBF Textiles may cancel or change credit terms or may request a pre-payment at anytime.

Reserves

HBF Textiles will reserve fabrics for up to ten (10) working days upon request and intent to order. The reserve will delete on the tenth (10th) day at which time the fabric will become available for sale. Only one five (5) working day re-reserve is allowed.

Cancellations

Orders may not be cancelled without the written consent of HBF Textiles. If fabric has not been cut, cancellations are subject to a 15% handling charge. No cancellations are accepted once the fabric has been cut.

Returns

No returns will be accepted without written authorization. Credit will not be issued unless the fabric is received on our premises within thirty (30) days from the date of the written return authorization. Authorized returns will be subject to a 25% restocking fee and must be returned in a usable condition. No returns will be accepted after merchandise has been cut. Special order merchandise is not subject to return.

Samples

HBF Textiles will be pleased to send upholstery, wrapped panel, coated fabric, drapery or leather memo samples upon request.

Because of natural variations in fibers, yarns, dyes, weaves and hides, samples may not match existing inventory. Dye lot samples will be sent upon request and receipt of order.

Special Finishes

As an accommodation to our customers, HBF Textiles can have special finishes and acrylic backing applied at an additional charge. Refer to Special Finishes section under Price Lists at www.hbftextiles.com.

Custom Fabrics

HBF Textiles has the resources to develop special colors in any of our standard patterns. HBF Textiles' designs can also be translated into other fiber combinations to accommodate pricing or special applications.

Upon receipt of order for custom fabrics a 50% deposit is required. Custom fabrics and/or special colors are sold by the full piece only (piece sizes vary according to mill). The customer is responsible for purchasing production overage (not to exceed 10% of the total yardage ordered).

On many discontinued items, yardage may still remain or a special order may be placed if piece minimum requirements are met.

Fabric Maintenance

HBF Textiles upholstery fabrics should occasionally be vacuumed to maintain their quality and appearance. For cleaning spots, consult a professional cleaning service. For cleaning of draperies, sheers and wallcovering, consult a professional cleaning service to obtain proper care and maintenance information.

Warranty

HBF Textiles' fabrics and goods are subject to continuing guarantees filed with the Federal Trade Commission under the Textile Fiber Products Identification Act and the Wool Products Labeling Act of 1939.

HBF Textiles may substitute fiber content and/or yarns at its discretion, and change sources and country of origin when it deems necessary without notification. HBF Textiles is not responsible for dye lot variations, reverse crocking, or discrepancies in widths of fabrics. HBF Textiles does not warrant, guarantee or represent an exact match to cuttings, memos or any samples.

HBF Textiles makes no implied warranties, including any warranty of merchantability or fitness for any particular purpose. Except as expressly provided in this warranty, HBF Textiles is not responsible for any damages, including, consequential, punitive or incidental damages.

Claims

All HBF Textiles are carefully inspected and securely packed prior to shipment from Hickory, NC. They are accepted as such by the carrier. Liability ceases as shipments are delivered to the transportation company. HBF Textiles is not responsible for damages incurred in transit or storage. Before accepting goods from the carrier, examine the shipment carefully. If there is any loss or visible damage to the containers, insist that a notation be made on the delivery slip. Claims for damage or loss must be filed immediately with the carrier. In case of concealed damage, you are protected if a claim is filed within five (5) days of delivery. Other claims against HBF Textiles for defects, errors or shortages must be filed with HBF Textiles in writing within ten (10) days of delivery. Failure to make such a claim shall constitute full acceptance of the yardage and waiver of all defects, errors or shortages. Cutting of the textiles will be deemed acceptance of the yardage and waiver of all defects, errors or shortages.

SPECIAL FABRIC FINISHES

STAIN REPELLENT

1-30 yards.....\$1.25/yd
31 yards and over.....\$1.10/yd

Stain repellent can be applied to upholstery fabric, at the time of flame proofing, for an additional charge of \$2.00/yd. All special fabric finish orders must be in full yard increments.

Nano-*Tex*[®] + Durablock[®]

Fabrics finished with Nano-*Tex*[®] + Durablock[®] offer permanent spill and stain resistance with a breathable moisture barrier. Our unique molecular formula imparts permanent performance characteristics designed to attach to each fiber, thus maintaining the original feel of the fabric and never losing breathability.

Fabrics finished with Nano-*Tex*[®] offer permanent spill and stain resistance without sacrificing a natural hand.

Nano-*Tex*[®] + Durablock[®]

5-9 yards.....	\$30.00/yd	20-24 yards.....	\$8.00/yd
10-14 yards.....	\$15.00/yd	25-49 yards.....	\$6.25/yd
15-19 yards.....	\$10.00/yd	50 yards & over.	\$5.50/yd

Nano-*Tex*[®]

5-19 yards.....	Minimum Charge \$150.00
20-49 yards.....	\$4.00/yd
50 yards & over	\$2.75/yd

FLAMEPROOFING (FR)

Drapery.....	\$1.75/yd
Upholstery	\$2.50/yd
118" Sheers	\$3.50/yd
Trims.....	\$2.50/yd
FAA Regulation.....	\$14.75/yd

(Please note, we do not test or certify for Class A)

LAMINATING

An additional yard is required for this process

Matte Vinyl Laminate

5-29 yards.....	Minimum Charge \$179.95
30 yards and over.....	\$8.85/yd

BACKING

Acrylic Backing or Flame Retardant Acrylic Backing
(Upholstery).....\$2.50/yd

Cotton Knit Backing

5-29 yards.....	Minimum Charge \$179.95
30 yards and over.....	\$8.85/yd

HOW TO CARE FOR FABRICS

The following basic rules of Fabric Care have been compiled by the Decorative Fabric Association. They are only intended as a guide to the Interior Designer. A certain amount of preventative maintenance on the part of the individual homeowner is highly recommended, but the actual cleaning of draperies and upholstery must be performed by a Professional Dry Cleaner who specializes in home furnishings.

1. Fabrics must be protected from the sun.

Draperies should be lined, and also interlined, when fragile fabrics are used. Shades should be drawn during the day, and awnings should be used whenever possible. Window glass magnifies the destructive elements in the rays of the sun. The winter sun and reflection from the snow are even more harmful than the summer sun. Trees and shrubbery help protect windows. Colors can fade by oxidation, "gas fading", if fabrics are kept in storage for too long a period without airing. Some colors are more fugitive than others. Impurities in the air may cause as much fading as the direct rays of the sun.

2. Use a reputable dry cleaner who specializes in home furnishings.

Dust has impurities which affect fabrics. Vacuum fabrics often. Dry cleaning should be done at regular intervals before excessive soil has accumulated. Very few fabrics are washable. Interior Designers should recommend professional dry cleaners to their clients. Clients should not try to remove spots themselves.

3. Be tolerant of normal fluctuations in lengths of draperies.

Few fabrics are completely stable. Fabrics breathe and absorb moisture, resulting in stretching or shrinking. It is reasonable to expect as much as a 3% change in any drapery length. In a 3-yard length (108 inches), this would amount to 3 inches up or down under various conditions. Fabrics placed over or near heating and cooling vents may react to a much greater degree.

4. Fabrics wear out - they are not indestructible.

Wear will vary with the amount of use. Some weaves are stronger than others. A favorite chair will not last as long as a seldom used show piece.

5. Applied finishes may help fabrics resist soil and stain.

Finishes help fabrics resist spotting, but they are not necessarily the end-all to every problem. Light colors are likely to benefit most. Dining room chairs will soil no matter what is used. A finish does not eliminate the necessity of properly caring for fabrics. Spots should be given immediate attention by a professional dry cleaner.

6. Synthetic fibers.

Synthetic yarns have made impressive strides in advancing the technology of weaving, but they cannot perform miracles. Performance will vary with the construction of the fabric and its application.

7. Multiple-width draperies, wallcoverings and bedspreads.

Because fabric, unlike paper, is not a completely stable "substance", it cannot be taken for granted that, whether printed or woven, the pattern will invariably be completely "square" upon the cloth. Although, in printing, every effort is made to avoid distortion, occasionally it will exist. Therefore, when planning multiple-width fabrications, please make certain, before cutting, that pattern alignment is adequate to produce a satisfactory result. This also applies to woven fabrics.

8. In the final analysis, as it is in every industry, the integrity and experience of your supplier is your best assurance as to the integrity value of a fabric, but it must be combined with knowledge and understanding on the part of the consumer.

As compiled by the Decorative Fabrics Association

CLEANABILITY CODE INFORMATION

The following recommended cleaning codes are devised as the results of tests performed by the fabric manufacturers having adhered to the methods requested by the Joint Industry Standards Committee. They in no way intend to imply that we are in any way guaranteeing these fabrics or the cleanability thereof.

CODE S

Dry clean only. Light brushing/vacuuming is recommended.

CODE SW

Dry cleaning is recommended. Spot treat water-based stains with non-chlorinated water-based cleaners/oil-based stains with solvent-based cleaners. Do not launder.

CODE W

Dry cleaning is recommended. Spot treat with non-chlorinated water-based cleaners. Do not launder.

CODE X

Light brushing/vacuuming is recommended. Do not launder. Do not dry clean.

CODE HH

Wash warm (water not to exceed 120°F), tumble dry medium setting, remove promptly, iron as needed, low heat. Do not launder or dry with other products. Do not dry clean. Do not bleach or use softeners.

CODE BL

Clean using 10% bleach solution (10% sodium hypochlorite, 90% water). Condition 5 minutes. Rinse with fresh water.

Any cleaning agent should be tested in an obscure area before proceeding.

SPECIAL FABRIC FINISHES

STAIN REPELLENT

1-30 yards.....\$1.25/yd
 31 yards and over.....\$1.10/yd

Stain repellent can be applied to upholstery fabric, at the time of flame proofing, for an additional charge of \$2.00/yd. All special fabric finish orders must be in full yard increments.

Nano-Tex® + Durablock®

Fabrics finished with Nano-Tex® + Durablock® offer permanent spill and stain resistance with a breathable moisture barrier. Our unique molecular formula imparts permanent performance characteristics designed to attach to each fiber, thus maintaining the original feel of the fabric and never losing breathability.

Fabrics finished with Nano-Tex® offer permanent spill and stain resistance without sacrificing a natural hand.

The Nano-Tex® + Durablock® and Nano-Tex® finishes are available for application to most Robert Allen fabrics. Please note that it is not suitable for application to prints, velvets or delicate fabrics. Please contact Customer Service for further information.

Nano-Tex® + Durablock®

5-9 yards..... \$30.00/yd 20-24 yards..... \$8.00/yd
 10-14 yards..... \$15.00/yd 25-49 yards..... \$6.25/yd
 15-19 yards..... \$10.00/yd 50 yards & over \$5.50/yd

Nano-Tex®

5-19 yards..... Minimum Charge \$150.00
 20-49 yards..... \$4.00/yd
 50 yards & over \$2.75/yd

In addition to the Nano-Tex® + Durablock®, The Robert Allen Group offers a range of finishing options from authorized special finishing agents. All billing for these add-on services will come directly from the authorized agent. The Robert Allen Group will not bill directly for these services.

Please feel free to contact our authorized agent for the following special finishing services
 at **1-888-830-4908** (toll free - exclusively for The Robert Allen Group customers)

FLAMEPROOFING (FR)

Upholstery \$2.50/yd
 Drapery 48" and 54" \$1.75/yd
 Drapery 106" and 118" \$3.50/yd
 Tassel tiebacks & garnishments One price - \$2.50/ea
 Trim: brush, loop & tassel fringe/cording & bouillon One price - \$2.50/yd

To insure that the proper treatment is applied, please provide specific local code requirements. Code requirements may be obtained from the local fire department where fabric will be installed.

BACKING

Acrylic Backing or Flame Retardant Acrylic Backing (Upholstery) \$2.50/yd

Please feel free to contact our authorized agent for the following special finishing services
 at **1-877-379-9332** (toll free - exclusively for The Robert Allen Group customers)

- 1" brackets have a 3.5" projection. 1.5" brackets have a 3.75" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods are available in 1" & 1.5" diameters, and 4' & 8' lengths. Reversible one-way draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" and 1.5" rods include rust-proof roller glides for smooth and easy movement of draperies.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so that draw can either be from the left side or the right side.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

- 1" brackets have a 3.5" projection. 1.5" brackets have a 3.75" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods available in 1" & 1.5" diameters, and 4' & 8' lengths. One-way draw and center draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" rod includes nylon glides; 1.5" rod includes roller glides with ball bearings.
- 1" traverse rod cannot be used with finials. Can only be utilized with end caps, inside mounts, or as a secondary rod in conjunction with the double bracket.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so draw can either be from the left side or the right side.
- Center draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, pair of master carriers with overlap arm and standard arm, and 2 end stops. The master carrier arms (standard and overlap) are reversible that so that the overlap can be left over right or right over left.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

- 1.5" standard brackets have a 4" projection. 2.25" brackets have a 4.25" projection. 1.5" standard double brackets have a 5" projection for the front rod and a 2.5" projection for the back rod. 2.25" standard double brackets have a 5.5" projection for the front rod and a 2.5" for the back rod.
- Brackets are sold separately. 2 standard brackets are recommended for 4ft and 6ft rods, 3 standard brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Premium, single and double track, center-draw traverse rod systems are available in 4', 6' and 8' lengths.
- Heavy-duty aluminum tracks are of the highest quality.
- Superior strength performance. Maximum fabric weight: 6 pounds per foot.
- Tracks are powder-coated inside and out in a brown finish, and sealed with a factory-applied dry-lubricant. This patented finishing technique allows for smooth operation and effortless glide of drapery across the rod.
- Premium hand-draw traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, and end stops.
- Premium corded traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, right-side cord control with 6' cord drop, mounted cord pulley, and end stops.
- C-ring system includes same as other traverse systems except track is threaded with c-ring glides and master carriers.
- 2.25" Wood Traverse Rods, C-rings, Wands, and Brackets are sold separately.
- Single track brackets are 3" long with a 2.5" projection. The double track brackets are 6" long with 5.5" projection for the front track and 1.75" projection for the back track.
- 3 traverse brackets are recommended for 4ft and 6ft rods, 4 traverse brackets are recommended for 8ft rods.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

FERRAFORTE COLLECTION *continued***

Description	Finishes	Wholesale
1" Traverse Rod Connector .. N/A.....		<i>EACH</i> \$18.00
1" Corner Angle Connector	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$38.00
1" End Cap	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$12.00
Wand	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$46.00

- Standard brackets have a 3.5" projection. Extended brackets 5.5" have a 5.5" projection. Extended brackets 8" have a 8" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods available in 1" diameters, and in 4' & 8' lengths. One-way draw and center draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" rod includes nylon glides.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so draw can either be from the left side or the right side.
- Center draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, pair of master carriers with overlap arm and standard arm, and 2 end stops. The master carrier arms (standard and overlap) are reversible that so that the overlap can be left over right or right over left.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

Master Carrier With Straight Arm White				\$8.00

- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft and 6ft rods, 3 brackets are recommended for 8ft rods.
- Choose either a 2" bracket projection or a 4" bracket projection. A 2" Extension Rod can be used in conjunction with a 4" bracket for a total of 6" of bracket projection.

PREMIUM TRAVERSE SYSTEM FEATURES

- One way hand-draw traverse rod systems are available in 1.125" diameter rods, and in 4', 6' and 8' lengths.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed rear-mount brackets.
- 1.125" traverse rod includes nylon glides. Roller glides are available separately for purchase for heavier treatments.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods, 24 glides for 6' rods, and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- The master carrier with overlap arm is reversible that so that the draw can either be from the left side or the right side.
- The master carrier with straight arm is available separately for purchase to reconfigure the track for center draw operation.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

- 1.5" standard brackets have a 3.625" projection. 2.25" brackets have a 4" projection. 1.5" standard double brackets have a 4.625" projection for the front rod and a 2.375" projection for the back rod.
- Brackets are sold separately. 2 standard brackets are recommended for 4ft and 6ft rods, 3 standard brackets are recommended for 8ft rods

PREMIUM TRAVERSE SYSTEM FEATURES

- Premium, single and double track, center-draw traverse rod systems are available in 4', 6' and 8' lengths.
- Heavy-duty aluminum tracks are of the highest quality.
- Superior strength performance. Maximum fabric weight: 6 pounds per foot.
- Tracks are powder-coated inside and out in a brown finish, and sealed with a factory-applied dry-lubricant. This patented finishing technique allows for smooth operation and effortless glide of drapery across the rod.
- Premium hand-draw traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, and end stops.
- Premium corded traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, right-side cord control with 6' cord drop, mounted cord pulley, and end stops.
- C-ring system includes same as other traverse systems except track is threaded with c-ring glides and master carriers.
- 2.25" Wood Traverse Rods, C-rings, Wands, and Brackets are sold separately.
- Single track brackets are 3" long with a 2.5" projection. The double track brackets are 6" long with 5.5" projection for the front track and 1.75" projection for the back track.
- 3 traverse brackets are recommended for 4ft and 6ft rods, 4 traverse brackets are recommended for 8ft rods.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

ROBERT ALLEN TERMS AND CONDITIONS OF SALE

ACCEPTANCE OF TERMS AND CONDITIONS

These terms and conditions of sale shall govern this order and buyer shall be deemed to have agreed to them. Any attempt to change or add to these terms by buyer, or any conflicting terms on any correspondence, purchase order, or other form sent by buyer is hereby objected to and rejected. Buyer shall be deemed to have agreed to these terms and conditions of sale by issuance of an order, by accepting delivery or by making payment hereunder. No oral agreement, course of prior dealings between the parties or trade usage shall amend or supplement any of the terms or conditions herein. All of the terms and conditions of this order and sale appear on this form and no additions or modifications can be made except in a writing signed by both parties that expressly references the amendment of these terms. All references herein to the seller or the company shall mean The Robert Allen Group.

MINIMUM ORDERS

Minimum order requirements for all cut yardage is one yard for fabrics and trim. Incremental yardage is 1/4 yard. Orders received for cuts other than 1/4 yard will be rounded up to the next 1/4 yard increment and billed at that amount. Leather is sold by full hides. Certain hardware is sold in pairs.

DYE LOT AND OTHER VARIATIONS; INHERENT IMPERFECTIONS

Color will vary from piece to piece and the company does not guarantee the dye lot. For exact match, request cutting and reserve for approval. In the absence of such request and reserve, the company shall have no liability for variations in color, dye lot or shade. Some collections contain products that are hand-painted or manufactured by hand; slight variances in color, texture and/or weave may occur. There may also be inherent imperfections in certain fibers, metals, leathers or fabrics. None of the foregoing shall be considered defects.

CLIMATIC CONDITIONS; SUITABLE APPLICATIONS; C.O.M. FABRIC

Climatic conditions, including heat, light and humidity levels, within the user's environment, can affect fabric and wood, and may lead to fading, stretching, shrinking or other damage. Fabric displayed in sample books and memo samples describes the intended application thereof. Hardware is considered a decorative product; while it is also functional, some collections are more appropriate for stationary treatments and others for windows requiring functionality. The selection of hardware, furniture or fabrics for specific placements or applications is made at the discretion and sole risk of the buyer and the company shall have no liability for such selections. Accordingly, buyers are urged to review the suitability of such choices and any other questions with the company's Customer Service Department before ordering and to allow sufficient fabric for environmental effects. The company shall have no liability for the buyer's C.O.M. fabric, its suitability, performance or condition. The company does not guarantee roll direction and is not responsible for errors in application due to roll direction.

FLAME RETARDANT PROPERTIES; TOPICAL TREATMENTS

In accordance with the provisions of the Flammable Fabrics Act, as amended, this merchandise is not intended for use in the manufacture of wearing apparel. Flame retardant chemicals can cause skin irritation, fabric spotting and/or stitching problems. In addition, all of the flame retardancy may be removed through machine washing and/or dry cleaning of the fabric. Accordingly, the company shall have no liability for any losses, claims or damage resulting from flame retardant chemicals. Adding topical treatments to any fabric may alter the performance, quality, color or hand. The company shall have no responsibility for damage to any fabric treated beyond regular finishes applied at the mill level.

CREDIT AND PAYMENT TERMS; OFFSETS

Acceptance of orders and shipments shall at all times be subject to approval by the company's Credit Department, which may at any time in its sole discretion decline to make any shipment except upon terms and conditions satisfactory to it. Subject to credit approval, terms of payment for all goods other than furniture or custom orders are net 30 days from the date of the invoice. All orders are subject to the absolute right of the company to require payment of all or any part of the purchase price in advance of delivery. Furniture and custom orders require a minimum deposit of 50% with order and payment of the balance in full prior to shipment. Interest will be charged on all past due accounts at the maximum rate permitted by applicable law. Seller accepts credit cards on new orders only. Credit cards cannot be used to pay open balances. Any indebtedness of buyer to the company may at the company's option be credited against amounts owed by the company to buyer. Payments received by the company from the buyer may be applied to any past due invoice or account of the buyer.

DELIVERY SCHEDULES; SHIPPING AND CHARGES; TITLE

In stock cut yardage orders are generally shipped within 24 hours from receipt of a credit-approved order. Furniture, custom, special-order and non-stock orders have longer lead times. Delivery dates supplied by the company represent its best estimate, but are in no way guarantees of delivery. Accordingly, the company shall have no liability for delays in delivery or failure to meet estimated delivery dates. Sometimes circumstances beyond our control affect availability; therefore, the company reserves the right to cancel any backorder. All shipments are made F.O.B. point of origin. All orders are subject to shipping and/or handling charges. Title to goods passes upon payment in full; risk of loss passes upon delivery to buyer's common carrier.

NON-DELIVERY OF FURNITURE

The company shall charge a storage fee to the buyer for any furniture for which the balance has not been paid in full and/or for which delivery instructions have not been given within thirty (30) days after receipt by the receiver. If full payment and delivery arrangements have not been made by Buyer within sixty (60) days after receipt by the receiver, the company shall have the right to sell or otherwise dispose of such furniture in a commercially reasonable manner. In such event, the company's sole liability to buyer (or buyer's customer or the end-user) shall be to reimburse the buyer for payments made after deduction by the company for its cost of goods, its customary profit thereon and all unreimbursed expenses of shipping, storage and sale thereof.

CANCELLATIONS OF ORDERS

Any cancellation of an order must be made in writing within five (5) business days of the order date. Notwithstanding the foregoing, no cancellations will be accepted if production of the order has commenced, including without limitation, cutting of fabric. If production has not commenced and the cancellation is accepted, the buyer's deposit will be refunded.

RETURNS AND CLAIMS

No merchandise may be returned without the company's prior approval and instruction. No returns on Beacon Hill fabric under 1 yard; for all others, no returns on upholstery fabric under 5 yards or drapery fabric under 9 yards. No returns of floor samples or sale items, which are sold "as is" and for which all sales are final. No returns of goods that have been cut, treated, altered, processed, subject to abuse or misuse, or damaged after shipment by seller. No returns of velvets, custom products or special-ordered goods. All authorized returns must be in original wrapping materials in the same condition as when received by buyer. All authorized returns within 30 days of invoice date will be subject to in/out freight and handling charges. All authorized returns after 30 days but within 60 days of invoice date will be subject to a 25% restocking charge, plus in/out freight and handling charges. No returns for any reason after 60 days. Claims for damage to furniture in transit for delivery to buyer or buyer's customer, workroom or other agent are buyer's responsibility; all goods should be inspected upon arrival and a claim filed with the carrier if damage has occurred in shipment.

NO THIRD PARTY BENEFICIARIES

No third party shall have any rights with respect to this sale transaction, on any legal or equitable theory of reliance, contract or otherwise, and the company shall have no liability to any such third party, including without limitation, a customer of the buyer or an end user of the company's products. The company sells "to the trade" only and not directly to consumers; any signatures or payments made by consumers with respect to this transaction shall be deemed to have been made as a convenience only as agent for the trade buyer named herein.

NON-CONFORMING OR DEFECTIVE PRODUCTS

The company reserves the right to repair or replace any defective or non-conforming product, as provided below. All products must be inspected by the buyer or buyer's customer, workroom or other agent, within ten (10) days after receipt and all defects or damages not sustained in shipment must be promptly reported to the company's Customer Service Department. All shipments received and signed for by buyer's receiver must be inspected for damage prior to acceptance and the company must be notified promptly of any problem. All returns for defects must have prior authorization and instructions from the company and must be returned in their original package and in the same condition as when received. If verified by the company to be defective, products will be accepted within sixty (60) days after receipt for repair or replacement, at the company's sole option. The company will pay all return in/out freight and handling charges in such verified cases. If, upon inspection of an authorized return, the company determines that the claim is unsubstantiated, the return will be rejected and return in/out freight, handling and restocking charges will be assessed. Charges for local repairs will not be accepted without prior authorization from the company. The foregoing provisions shall constitute the buyer's sole remedy with respect to defective or non-conforming goods. In no event shall seller be liable for any customary variations within industry standards or for imperfections inherent in certain fibers, leathers, metals, fabrics or woods.

ADVERTISING

All advertising of the company's products must be dignified, tasteful and professional. Use of seller's trademarks, tradenames, logos, copyrighted materials, digital images or other proprietary materials, in any medium (including without limitation, over the internet), without prior written approval by the company, is strictly prohibited and may subject an unauthorized user to legal action by the company. By purchasing the Goods, Buyer agrees to abide by Seller's minimum advertised pricing policy, available at www.robertalldesign.com/terms.html.

DISCLAIMER OF WARRANTIES; LIMITATION ON LIABILITY

UNLESS OTHERWISE EXPRESSLY OFFERED BY THE FABRIC, HARDWARE OR FURNITURE MANUFACTURER AND INDICATED IN WRITING BY THE COMPANY, SELLER DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR OF MERCHANTABILITY. IN THE EVENT OF SELLER'S LIABILITY, WHETHER BASED IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, BUYER'S SOLE AND EXCLUSIVE REMEDY WILL BE LIMITED AS SET FORTH IN THE SECTION ENTITLED "NON-CONFORMING OR DEFECTIVE PRODUCTS", TO REPAIR OR REPLACEMENT BY SELLER OF ANY DEFECTIVE OR NON-CONFORMING GOODS FOR WHICH TIMELY CLAIM MAY BE MADE BY BUYER. SELLER EXPRESSLY DISCLAIMS ANY LIABILITY TO BUYER, ITS CUSTOMERS OR TO END USERS OF ITS PRODUCTS, FOR SPECIAL, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, INCLUDING DAMAGE TO OR LOSS OF OTHER PROPERTY OR EQUIPMENT, PERSONAL INJURY, LOSS OF PROFITS, BUSINESS OR REVENUES, OR COST OR OTHER DAMAGE, LOSS OR EXPENSE FROM ANY CAUSE WHATSOEVER, ARISING OUT OF OR IN ANY WAY CONNECTED WITH THE SALE OR USE OF ITS PRODUCTS. THE MAXIMUM LIABILITY, IF ANY, OF SELLER FOR ALL DAMAGES HEREUNDER IS LIMITED TO THE PURCHASE PRICE OF THE DEFECTIVE OR NON-CONFORMING PRODUCTS SOLD PURSUANT TO THIS TRANSACTION. ANY ACTION ARISING HEREUNDER MUST BE BROUGHT WITHIN ONE YEAR FROM THE DATE OF SALE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF WARRANTIES, CONSEQUENTIAL DAMAGES OR REMEDIES, OR LIMITATION ON THE TIME FRAMES INVOLVED IN SAME, IN WHICH EVENT THESE LIMITATIONS MAY NOT APPLY TO YOU.

COLLECTION; GOVERNING LAW; FORCE MAJEURE

In any action for the collection of, or to enforce payment of, all or part of the purchase price of the products sold to buyer, seller shall be entitled to recover all reasonable collection fees, attorney's fees and costs, to the extent permitted by law. This transaction shall be governed by and enforced in accordance with the substantive laws of the State of New York, without regard to principles of conflicts of laws, and buyer hereby consents to the personal jurisdiction of the federal and state courts located in New York, New York. The company shall not be liable for delay or failure in performance hereunder arising from any act of God or nature, strike, labor disruption, government action, lack of materials or other cause not within its control.

- 1" brackets have a 3.5" projection. 1.5" brackets have a 3.75" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods are available in 1" & 1.5" diameters, and 4' & 8' lengths. Reversible one-way draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" and 1.5" rods include rust-proof roller glides for smooth and easy movement of draperies.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so that draw can either be from the left side or the right side.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

PACKAGE		
1.5" Ring	Antique, Antique Gold, Earth Rust, Watermark Silver	(10 Rings).....\$35.00
2" Ring	Antique, Antique Gold, Earth Rust, Watermark Silver	(10 Rings).....\$39.00
1" Traverse Rod Glides	N/A.....	(10 Glides).....\$6.00
1.5" Traverse Rod Glides	N/A.....	(10 Glides).....\$19.00
EACH		
Wand	Antique, Antique Gold, Earth Rust, Watermark Silver	\$46.00

- 1" brackets have a 3.5" projection. 1.5" brackets have a 3.75" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods available in 1" & 1.5" diameters, and 4' & 8' lengths. One-way draw and center draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" rod includes nylon glides; 1.5" rod includes roller glides with ball bearings.
- 1" traverse rod cannot be used with finials. Can only be utilized with end caps, inside mounts, or as a secondary rod in conjunction with the double bracket.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so draw can either be from the left side or the right side.
- Center draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, pair of master carriers with overlap arm and standard arm, and 2 end stops. The master carrier arms (standard and overlap) are reversible that so that the overlap can be left over right or right over left.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

ROBERT ALLEN DRAPERY HARDWARE
FERRAFORTE COLLECTION *continued*

Description	Finishes	Wholesale
1" Traverse Rod Connector .. N/A.....		<i>EACH</i> \$18.00
1" Corner Angle Connector	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$38.00
1" End Cap	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$12.00
Wand	Antique Brass, Black, Earth Rust, Georgian Copper, Georgian Gold, Pewter	\$46.00

- Standard brackets have a 3.5" projection. Extended brackets 5.5" have a 5.5" projection. Extended brackets 8" have a 8" projection.
- Brackets are sold separately for standard and traverse rods. 2 brackets are recommended for 4ft rods, 3 brackets are recommended for 8ft rods.

PREMIUM TRAVERSE SYSTEM FEATURES

- Hand-draw traverse rods available in 1" diameters, and in 4' & 8' lengths. One-way draw and center draw traverse options available.
- Hand-draw traverse adds the utility of full drapery movement across the entire rod due to specially-designed top-mount brackets.
- 1" rod includes nylon glides.
- One-way hand-draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, one master carrier with arm and 2 end stops.
- One-way draw features reversible master carrier arm so draw can either be from the left side or the right side.
- Center draw traverse rod system includes 16 glides for 4' rods and 32 glides for 8' rods, pair of master carriers with overlap arm and standard arm, and 2 end stops. The master carrier arms (standard and overlap) are reversible that so that the overlap can be left over right or right over left.
- The use of a wand is strongly recommended for traverse rods.
- Use a splice to connect two traverse rods together.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

- 1.5" standard brackets have a 3.625" projection. 2.25" brackets have a 4" projection. 1.5" standard double brackets have a 4.625" projection for the front rod and a 2.375" projection for the back rod.
- Brackets are sold separately. 2 standard brackets are recommended for 4ft and 6ft rods, 3 standard brackets are recommended for 8ft rods

PREMIUM TRAVERSE SYSTEM FEATURES

- Premium, single and double track, center-draw traverse rod systems are available in 4', 6' and 8' lengths.
- Heavy-duty aluminum tracks are of the highest quality.
- Superior strength performance. Maximum fabric weight: 6 pounds per foot.
- Tracks are powder-coated inside and out in a brown finish, and sealed with a factory-applied dry-lubricant. This patented finishing technique allows for smooth operation and effortless glide of drapery across the rod.
- Premium hand-draw traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, and end stops.
- Premium corded traverse system includes aluminum track(s), Klick glides (14 with 4', 22 with 6' and 28 with 8'), left and right master carriers, right-side cord control with 6' cord drop, mounted cord pulley, and end stops.
- C-ring system includes same as other traverse systems except track is threaded with c-ring glides and master carriers.
- 2.25" Wood Traverse Rods, C-rings, Wands, and Brackets are sold separately.
- Single track brackets are 3" long with a 2.5" projection. The double track brackets are 6" long with 5.5" projection for the front track and 1.75" projection for the back track.
- 3 traverse brackets are recommended for 4ft and 6ft rods, 4 traverse brackets are recommended for 8ft rods.

Standard drapery rods are considered to be decorative drapery hardware, while traverse rod options provide both decorative and functional capabilities. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. This collection was designed to be special and unique for the designer to achieve a truly beautiful design statement, yet functional when the traverse rod option is selected. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

Custom Finish Options - choose from one of 10 additional finishes that have been selected to complement the design aesthetic of this elegant collection (Silver w/Gold, Cappuccino, Soft Gold, Walnut w/Black, Flat Black w/Gold, Silver w/Black Wipe, Ivory w/Umber Rub, Venetian Gold, Bronze w/Copper, Statuary Bronze). An additional charge applies to these finishes and lead times vary from 2-4 weeks for shipment. Strike off samples will be provided for approval upon customer request.

Custom Finish Program - Send us a sample of your favorite finish and we will match it! You can also specify any Sherwin-Williams paint color and we can match that too! Additional charges apply for this service and will be quoted based on custom paint costs. Lead times vary from 3-6 weeks for shipment. Strike off samples will be provided for approval upon customer request.

Standard drapery rods are considered to be decorative drapery hardware. While standard drapery rods are also functional, some collections are more appropriate for stationary treatments than others. Standard drapery rods may be less appropriate for windows that require day-to-day functionality. Please contact Robert Allen Customer Service for further information.

Shipping Information.....	249
Warranty.....	250

CUSTOM-MADE: A LUXURY IN ITSELF!

flair21 window treatments are one-of-a-kind, uniquely hand-crafted to your specifications and come with features that are only available in true custom sewing.

DRAPERY

- Three pleat styles to choose from: Pinch Pleat, Bohemian Pleat, Goblet Pleat
- Three flat styles to choose from: Grommet, Ring Top, Rod Pocket
- Choose Eurohem or double-turned hem
- Draperies may be lined or unlined (chart pricing based on option selected)
- Room-darkening lining and interlining are available on select fabrics (surcharge)
- Extra-long lengths (surcharge) with seams hidden on the back of folds

TOP TREATMENTS

- Board mount, rod mount and swags with 20 styles to choose from
- Velcro attachment on select styles (surcharge)
- Pattern matching

RIPPLEFOLD

- Choose Eurohem or double turned hem
- Unlined, lined or self lined (chart pricing based on option selected)
- Extra-long lengths (surcharge) with seams hidden on the back of folds

CORDON

- Panels (up to 236" tall) are easily trimmed to any desired length / width and even angled or patterned (surcharge)
- Available with a velcro, rod pocket, shirring tape, grommet or snap tape header (surcharge)
- Use multiple colors in a linear or stacked method for a truly bold statement (surcharge)

VERTICAL WRAP

- Any width seamless¹ up to 19'
- Extra-long lengths (surcharge) with seams hidden on the back of folds
- Eurohem for a perfect hang

PANEL GLIDE

- Any width up to 19' with weighted bottoms
- Fabric protection shield sewn on the top of every panel
- Extra-long lengths available (surcharge)
- Unlined, lined or self lined (chart pricing based on option selected)

FABRIC SHADE

- Choice of board mount (with matching face fabric) or headrail mount (with built-in Velcro® attachment)
- Number of scallops variable (surcharge depending on fabric yardage)
- Repeat matching on multiple shades
- Valance and returns available on select styles

EMBELLISHMENTS (surcharges apply)

- Tiebacks:
 - Made out of fabric: 3 shapes, fabric of your choice
 - Tassel tiebacks: 2 styles, 12 colors
- Trim: 11 styles, 12 colors
- Banding: Fabric of your choice

Quality is always guaranteed with our policy to inspect every treatment prior to shipment! But in case we do miss something, our lifetime limited warranty² will catch it!

WE WISH YOU A LIFETIME OF ENJOYMENT WITH YOUR *flair21* CUSTOM WINDOW TREATMENTS!

¹Not seamless in the case of extra-long. ²Please refer to the last page of this document for details.

DICTIONARY OF TERMS

Banding — Strips of fabric that can be made from coordinating or contrasting fabric. The raw edges are turned under, and the fabric band is then attached to the treatment as a decorative accent.

Baton Draw — When a drapery is opened or closed by a hand-held baton attached to the master on the rod.

Baton Reinforcement — A plastic reinforcement, or stiffener, designed to strengthen the heading of a drapery for baton draw. The plastic is molded in such a way as to fit into the master on the rod. The baton is attached with a screw, through the fabric and reinforcement, into the master. This reinforcement is not used with clip-on baton.

Bias Cut — Fabric cut on the diagonal direction of the fabric. Fabrics have more give on the bias than straight up and down, or across the grain. Swags hang better when cut on the bias.

Board Mount — Referring to a top treatment or a shade being stapled to a dust board.

Board Width — The measurement of the actual face width of the board.

Bracket to Bracket — Measurement from the outside of one bracket to the outside of the opposite bracket.

Break — A small amount of fabric that lies on the floor.

Buckram — A stiffening material used in drapery headings to help hold the shape of the product.

Cascades — Fabric which is folded and falls in a zigzag fashion down the sides of a top treatment. Cascades are most commonly used with swags, and sometimes referred to as 'jabots.'

Center Draw — A pair of draperies which open and close from the center of the window. Also called a 'split draw' or 'center split.'

Contrast Lining — Fabric used to line a treatment, which is different from the face fabric. This term usually refers to fabric other than standard lining.

Cut Length — The length to which the fabric is cut. The size will include the finished length of the treatment as well as hems, headings, and any necessary allowance for pattern repeat.

Decorative Rod — A rod designed to show as part of the overall window treatment. It can be wood or metal in various finishes and colors.

Dust Board — A piece of wood, covered with fabric, and used as a base to hold a Top Treatment or Shade.

Dye Lot — A complete color run of a bolt of fabric in a specific dye batch. Dye lots may vary slightly from one batch to the next.

Eurohem — A bottom-sewn, weighted hem that provides an ideal drapery hang.

Finished Length — This is the total length of the finished treatment.

Finished Width — This is the total width (including face width, returns and overlaps) of a finished treatment.

Fullness — Extra fabric (pleated or gathered) on a drapery or top treatment to give volume and dimension.

Grommet — Metal rings attached to fabric in two pieces, with fabric sandwiched in between.

Heading — The top edge of a drapery or valance.

Headrail — Used to house controls and mount wraps, ripplefolds, glides, and certain shades. It is comprised of the track and all components necessary for the specific treatment.

Horizontal Trim or Band — Trim applied in a side-to-side fashion.

Jabot — Fabric which is folded and falls decoratively between two sections in a top treatment. The term 'jabot' is also sometimes used for fabric that is folded and falls in a zigzag fashion down the sides of a top treatment.

Leading Edge — The side of a curtain or drapery which faces the center of the window.

Leading Edge Allowance — An addition to the width of a one-way drapery to allow for the leading edge of the drapery to go beyond the end of the rod when closed.

Master — A piece of metal or plastic on the leading edge of the carriers on a drapery rod. The master pushes / pulls the carriers to open / close the drapery.

DICTIONARY OF TERMS

Overlap — The area in the center of a split-draw drapery where the two halves cross over one another in order to reduce the amount of light showing between the two. For panel glides, this is the area where one panel crosses over the next to reduce the light gap.

Panel — One-way drapery that opens from one side. Commonly used for patio or sliding doors. The term 'panel' also can refer to half of a pair or one section on a panel glide.

Pleats — A technique to create volume by folding the fabric and tacking it to hold the shape. There are many different types of pleats including Pinch Pleat, Bohemian and Goblet.

Pin Setting — Space between the top of the drapery pin and the top of drapery panel.

Pouf — Fabric gathered and shaped to form a 'rosette', which is used to finish a top treatment.

Puddle — A large amount of excess fabric that lies on the floor.

Railroad — When fabric is railroaded, the width of the fabric becomes the length. See the Fabric Pricing Guide for more information.

Repeats — The distance between the beginning of one complete pattern and the beginning of the next identical pattern. Fabrics may have a vertical repeat, horizontal repeat or both.

Returns — The distance from the front of the rod or board, back to the wall. On a pleated drapery, it is the space from the last pleat to the side of the panel.

Rod Mount — A top treatment being installed on a rod.

Rod Width — The size of the face of the rod (not including any returns or overlap). Can also be called the face width of the rod.

Rod Pocket Drapery — Draperies with a pocket sewn into the top (and sometimes the bottom) to allow a rod to slide through for a gathered treatment.

Sash Rod — A small rod designed to be mounted inside a window frame.

Self-Lined — Lining a treatment with the same fabric which is being used on the face of the treatment.

Selvage — A fabric edge that is woven to prevent fraying.

Shirred — When a fabric is gathered at the top of a treatment or on a rod.

Sill — A ledge on the bottom of a window opening.

Spring Back — When a panel is baton or hand drawn, it is common for the fabric to 'spring back' when released.

Straight Cut — Fabric cut in the direction in which it comes of the roll.

Stack Back — Amount of space taken up by the draperies when in the open position.

Swag — A top treatment which uses draping fabric folded to form pleats and a scallop shape on the bottom.

Tails — Fabric gathered on the ends of certain top treatments, usually with straight sides and bottom.

Take Up — The amount of length lost on a rod pocket drapery due to the thickness / dimension of the rod.

Tiebacks — Designed to hold draperies back from the window in a decorative way.

Top Treatment — A decorative feature installed at the top of a window. These can be board mount, rod mount, or hung by rings / hooks.

Traverse Rod — A drapery rod with a pulley mechanism to draw draperies open and closed. This type of rod is utilitarian in design and commonly hidden with a top treatment.

Valance — A top treatment, usually referring to one installed on a rod.

Vertical Trim or Band — Indicates that the band or trim will be applied in a vertical or up-and-down fashion.

Welt — A twisted, cotton cord, covered with fabric and applied to the treatment.

Width — A single cut of fabric. This term is usually used in connection with 54" or other non-railroaded fabrics. The term 'width' is also used when referring to the 'rod width' or 'finished width.'

HOW TO ORDER CUSTOM WINDOW TREATMENTS

- 1- Begin with the order form for the treatment style you have selected.
- 2- The following information is required on each order form:
 - Account name
 - Account number (If you do not yet have an account number, please contact customer service)
 - Shipping information
 - Sidemark on the order and purchase order number (if you use one)
 - Fabric and color number to be used for the order
 - Quantity and size information
 - Specify if the treatment will be motorized
 - Please fill in every applicable column on the order form. If you have any additional information or upgrades, please record it under 'special instructions'. For assistance please call Customer Service at 800.845.0918.
- 3- Send orders to flair21 by fax or email:
 - Fax: 888.574.2747
888.766.5895
888.245.1185
 - Email: customerservice@flair21.us
- 4- **You must sign the order**

ORDER CONFIRMATIONS

In our continual efforts to provide flawless service, you must verify all the information on your fax or email confirmation. This will ensure that we correctly interpret and follow your fabrication instructions. This helps eliminate errors before we begin fabrication of your drapery orders. Failure to check the order confirmation for accuracy will cost everyone time and money. Fabrication will begin on your product after sending the order confirmation by fax or email. Any changes will result in a change charge plus possible rework charges. Cancellations subject to accumulated charges.

Each order confirmation includes the following information:

- flair21 order number
- Account number
- Bill to and ship to information
- Estimated ship date
- PO number
- Sidemark for the order
- Payment Terms
- Carrier and delivery method
- Description of the fabric or fabrication
- Quantity of the fabric or fabrication order
- Total price of the order

NOTE: Our price charts make it easy to estimate the price of your window treatment based on standard widths and lengths. If your measurements fall in-between two sizes, your actual price (stated on the order confirmation) will be based on the EXACT width and length of your order. Pricing Charts do NOT reflect the additional yardage that may be required for pattern matching.

Shipping charges will be added at a \$20 flat-rate per order, with the exception of oversized/overweight shipments requiring LTL (see page 249 in this guide for additional information).

PLEATED & FLAT DRAPERIES

- Most flair21 and ADO Goldkante Collection fabrics offer the choice of Eurohem or a double-turned hem.
- Décor 54 fabrics always have a double-turned hem (4" is the standard turn, but larger sizes available upon request as an upgrade).
- Available unlined or lined (all of these linings are available with Eurohem or a double-turned hem):
 - flair21's 01000 lining in your choice of white (10), antique white (11), alabaster (12) or cream (15)
 - flair21's room-darkening 01002 lining in white (10) or antique white (11) (Only in combination with select flair21 fabrics; refer to the Style Recommendations at flair21.com)
- Interlining is recommended for use with silks, because this natural fiber is very UV sensitive. Interlining is also available for use with other lightweight fabrics. Interlining is always an upgrade.
- Panels are finished with corner weights (with the exception of open-weave fabrics).
- Double 1 ½" side hem is standard. Side hems are blind stitched (with the exception of open-weave fabrics).
- Lengths up to 126" will have a ¼" tolerance. Lengths over 126" will have a 1" tolerance.
- Maximum finished lengths are determined by the fabric collection and drapery style—see the details above each pricing chart. For extra long lengths, contact Customer Service for pricing.
- Trim or banding is available as an upgrade.

HOW TO MEASURE FOR DRAPERIES & PANELS

DECORATIVE RODS are designed to show as part of the overall window treatment. They can be wood or metal in a variety of colors and finishes. Many finial and end cap shapes and sizes are available to complement and complete the design statement. These rods can be used for draperies, side panels or top treatments.

Pleats will ride below the rod. Decorative rods are used with rings for pleated and ring top draperies, side panels or valances; they are used without rings for grommet and rod pocket draperies, valances or other top treatments. Select styles can be fitted with traverse hardware to be cord draw.

STANDARD TRAVERSE ROD is a metal rod strung with cords for controlling the draw of the draperies. The rod can be made to accommodate a split draw (for a pair of draperies), or a one way draw (for a single panel). The pleats will ride in front of the rod as they traverse. Standard traverse rods are only used for pleated draperies.

Decorator Tip: This rod is utilitarian in design, and it is common to hide it with a valance or other type of top treatment.

DRAPERY LENGTH

- Inside mount — Measure inside the casing to the floor or casing at the bottom of the window. Measure in three places, each side and middle. Use the smallest measurement. Subtract 1" for clearance to arrive at the finished length.
- Outside mount — Measure at least 2" to 4" above the window to the floor. Measure in three places, and use the smallest measurement. Subtract 1" for clearance, to arrive at the finished length.

PUDDLED DRAPERIES are a style in which the bottom hem rests on the floor. There are two looks within this relaxed style:

- Break — To create a break on the floor, add 2" to 4" to the length of the draperies instead of subtracting for clearance.
- Puddle — For a puddle effect, add 8" to 18" depending on the amount of puddle desired and the scale of the window.
- When ordering, be sure to include the amount of break or puddle, in the finished length. Breaking or Puddling draperies creates a very dramatic look. For safety, please be sure that there is ample floor space, for fabric to rest on the floor.

HOW TO MEASURE FOR DRAPERIES & PANELS

MEASURING A DECORATIVE ROD WITHOUT RINGS

- Measure the width of the space you want the panels to occupy on the rod.
- When ordering a stationary panel for each end of the rod, they are commonly ordered as two separate panels, or you can add the two together for a pair measurement.
- Remember to add return(s) if you desire and your panel style allows.
- For measuring length, see directions under each style description.

MEASURING A DECORATIVE ROD WITH RINGS—CENTER SPLIT / SPLIT DRAW

- The first / last ring should be between the bracket and the finial or end cap.
- The width of the rod is measured from the outside edge of the ring on one end of the rod, to outside edge of the ring on the opposite end of the rod. This is the face width or rod width.
- At the ends of the rod, measure the distance from the center of the rod to the wall, this is the return.
- If your decorative rod is fitted with traverse cord controls, the masters will cross over each other in the center of the rod, when closed. The space where they cross over is the overlap; the most common overlap size is 3 ½".
- For hand draw or baton draw, please note that the rings will not cross over each other in the center of the rod. However, you will still want to allow for a little extra fabric to overlap, which reduces the light gap in the center of your window. This is the overlap.
- When a panel is hand or baton drawn, it is common for the fabric to 'spring back' when released. Many decorators add extra in the width to allow for this. It is your choice whether or not to make this addition, and if so, how much.
- Add together the rod width, two returns (one on each end), one overlap and spring back (if desired). These will equal the finished width.
- Divide the finished width by 2, to find the width of each half of the pair or left and right panels.
- For length, measure from the bottom of the ring to your desired length.

MEASURING A DECORATIVE ROD WITH RINGS—ONE WAY DRAW

- The width of the rod is measured from the outside edge of the ring on the return end (this last ring should be between the bracket and finial or end cap) to the space between the bracket and finial or end cap on the opposite end of the rod. This is the face width or rod width.
- At the end of the rod, measure the distance from the center of the rod to the wall, this is the return.
- On the leading edge of the panel, there will be a space from the side of the panel to the first pleat, the standard size for this space is 3 ½". The minimum is 1 ½". You can enter the desired size in the box marked for overlap.
- When a panel is hand or baton drawn, it is common for the fabric to 'spring back' when released. Many decorators add extra in the width to allow for this. It is your choice whether or not to make this addition, and if so, how much.
- Add together the rod width, one return and spring back (if desired). These will equal the finished width.
- For length, measure from the bottom of the ring to your desired length

MEASURING A STANDARD TRAVERSE ROD—CENTER SPLIT / SPLIT DRAW

- Measure the width of the rod from end to end, this is the face width or rod width.
- At the ends of the rod, measure the distance from the front of the rod to the wall, this is the return.
- The masters will cross over each other in the center of the rod when closed. The space they cross over is the overlap. The most common overlap size is 3 ½".
- Add together the rod width, two returns (one on each end) and one overlap. These will equal the finished width.
- Divide the finished width by 2, to find the width of each half of the pair or left and right panels.
- For length, measure from the top of the rod to your desired length.

MEASURING A STANDARD TRAVERSE ROD—ONE WAY DRAW

- Measure the width of the rod from end to end, this is the face width or rod width.
- At the end of the rod, measure the distance from the front of the rod to the wall, this is the return.
- If you desire, you can add for the leading edge of the drapery to go beyond the end of the rod when closed. This is the leading edge allowance. It is your choice whether or not to make this addition, and if so, how much.
- On the leading edge of the panel, there will be a space from the side of the panel to the first pleat, the standard size for this space is 3 ½". The minimum is 1 ½". You can enter the desired space in the box marked for overlap.
- Add together the rod width, one return and the leading edge allowance (if desired). These equal the finished width.
- For length, measure from the top of the rod to your desired length.

PLEATED DRAPERIES

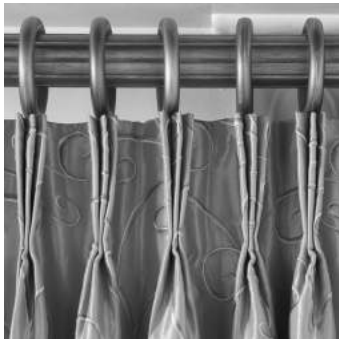

The pricing charts on the following pages are for pinch, goblet, bohemian, box, windsor, pencil and cartridge pleated draperies. Featured below are our top-selling pleat styles.

- A 4" buckram is standard, 5" buckram is available at no additional charge and an 8" or 10" buckram is available as an upgrade.
- Transparent buckram is available upon request; it is softer (and therefore less rigid) than the standard buckram.
- Specify your desired return size; the most common is 3 ½" and the minimum is 1 ½".
- The standard overlap is 3 ½", with a minimum of 1 ½". Please specify if other than standard.
- Draperies are pre-pinned, so please specify the pin setting.
- For pleated draperies being installed on a decorative rod, measure the length from the bottom of the ring to your desired length.
- For pleated draperies being installed on a standard traverse rod, measure the length from the top of the rod to your desired length.

SHIPPING: Pleated draperies will be fan folded with the buckram between the pleats, folded toward the back.

INSTALLING: When installing on a decorative rod with rings, do not re-fold the buckram. For a standard traverse rod, please re-fold the buckram toward the front, so the draperies can traverse correctly on the rod.

PINCH PLEAT DRAPERIES

- Standard 3-finger pinch pleats (3pp) are hand folded to form 3 equal fingers.
- The fingers are folded together and tacked ½" up from bottom of the buckram (approximately 1" from the top). However, if the fabric is too thick, the tack will be below the buckram.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.

Pleat Recommendations Based on Fullness:

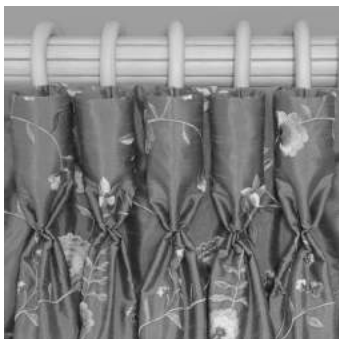

- 2 ½ – 4 fullness: 3pp
- >4 fullness: 4pp or 5pp

BOHEMIAN PLEAT DRAPERIES

- Pleats are hand folded to form 3 equal fingers.
- Pleats are tacked ½" down from top and ¼" in from the front.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.

GOBLET PLEAT DRAPERIES

- Pleats are hand folded to form 3 equal fingers.
- Tack will be ½" below the buckram.
- At installation, the pleat is opened and filled with plastic tubes (included with order), to fill the goblets.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.
- The minimum buckram for Goblet pleats is 5".
- 2 ½" fullness is recommended.

Decorator Tip: The pleats will not stack tight because of the goblets' dimension; those dimensions are determined by the fullness and fabric weight. Please allow for this when estimating stack space for your client.

ORDERING PLEATED DRAPERIES

- 1- Determine the quantity, and if it is a pair or single panel.
- 2- Choose a pleat style and fullness.
- 3- Select a fabric design and color for your pleated draperies. (Make sure your selection is suitable for drapery treatments. See the Recommended Applications at flair21.com.)
- 4- Mark the desired hem style (Eurohem or double-turned hem, as the fabric allows) and size.
- 5- Select a lining design, color and hem. NOTE: room-darkening lining cannot be used with sheer fabrics.
- 6- Indicate if interlining is desired. NOTE: Interlining is recommended for select silks and faux silks (see the Properties and Recommended Applications at flair21.com).
- 7- Determine the finished width and length of your drapery (including rod width, overlap, return(s) and any other additions).
- 8- Record the return size and overlap size.
- 9- Calculate the width of the left and/or right panels.
- 10- Indicate your desired pin setting (please refer to the [flair21](http://flair21.com) Drapery Order Form for available choices).
- 11- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the chart matching your fabric width (wide- or narrow-width), fullness, lining and hem selections. Follow down the left column to your series number and go across to your width (if your width is between sizes, go up to the next higher size). For narrow-width fabrics, you will need to locate the correct chart for your series number, and then find the price based on your length and width.
- 12- Choose (if desired) tieback(s) shape and finish with pricing on pages 87–89 and 212-213 in this Chart Pricing Guide.
- 13- Add the subtotals from steps 11 and 12 to determine your total retail price.

PRICE EXAMPLE: PLEATED DRAPERIES

- 1- One pair
- 2- Bohemian Pleat, 2 ½ fullness
- 3- Fabric 1212 0/362-51 (Narrow-Width)
- 4- All Décor 54 fabrics have double-turned, 4" standard hems
- 5- Lining 01000 0/10-118 with 3" hem (the lining hem is typically 1" less than the face fabric hem)
- 6- No interlining desired
- 7- Finished width 60", finished length 92"
- 8- Return: 3 ½", overlap: 3 ½"
- 9- Left panel: 30", right panel: 30"
- 10- Pin setting: ¼"
- 11- Series 14 (found in Fabric Pricing Guide). Go to page 146 for pleated draperies (using narrow-width fabric) with 2.5 fullness, lined. Look at the chart for Series 14, go down the left side to 96" (must round up) and across to 63" (again, rounding up) = \$790.
- 12- No tiebacks desired.
- 13- \$790 (Estimated) Total

FLAT DRAPERIES

- Flat draperies do not have pleats—the fullness on the rod should be dressed as desired by the decorator.
- Since flat draperies need to be dressed every time they are moved, they work best as stationary panels.
- When ordering a stationary panel for each end of the rod, they are commonly ordered as two separate panels, or you can add the two together for a pair measurement.

SHIPPING: Flat draperies are flat folded for shipment.

GROMMET DRAPERIES

- The top features a fabric-covered buckram, sandwiched between 2 round metal pieces, forming the grommet. Visit flair21.com to view the grommet color selections available.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.
- We suggest you allow at least $\frac{3}{8}$ " of space between the inside diameter (ID) of grommet and the diameter of the rod. This space is necessary for the grommets to easily slide on the rod.
NOTE: Grommets slide easiest on a metal rod with ample clearance.
- Space between grommets will depend on the width of panel, the size of the grommet, and the number of grommets.
- There must be an even number of grommets on each panel.

• We suggest spacing the grommets approximately 6" apart. Customer service can compute the number of grommets, or you can request a certain number of grommets and customer service will compute for viability.

• The minimum space required from the side of the panel to the edge of the first / last grommet is $1\frac{1}{2}$ ", this is also the standard. A larger space can be requested.

• 3" grommets require a minimum of 5" buckram.

• If you desire a return, please indicate on the order form. The return is measured from the edge of the last grommet to the side of the panel.

MEASURING LENGTH: Measure from the top of the rod to your desired length. The top of the panel will be slightly above the top of the rod. To find the amount to add for this, please see the column "Add for Finished Length" in the chart below. **Your ordered length will be the flat finished length of the drapery; flair21 makes no additions or subtractions.**

GROMMET SIZE #	INSIDE DIAMETER	OUTSIDE DIAMETER	MAX. ROD DIAMETER	ADD FOR FINISHED LENGTH	GROMMET COLORS AVAILABLE					
					BRASS	NICKEL	BLACK	SATIN	GOLD	COPPER
#2	$\frac{3}{8}$ "	$\frac{3}{4}$ "	Euro Wire Rod	$\frac{5}{8}$ "	✓	✓	✓	✓		
#4	$\frac{1}{2}$ "	1"	Wire Rod - $\frac{1}{4}$ "	$\frac{3}{4}$ "	✓	✓	✓			
#6	$\frac{3}{4}$ "	$1\frac{1}{4}$ "	$\frac{1}{4}$ " - $\frac{1}{2}$ "	$\frac{3}{4}$ "	✓	✓	✓	✓	✓	✓
#8	$1\frac{1}{8}$ "	$1\frac{13}{16}$ "	$\frac{1}{2}$ " - $\frac{7}{8}$ "	$\frac{7}{8}$ "	✓	✓	✓	✓	✓	✓

#15	2"	$2\frac{7}{8}$ "	$1\frac{1}{2}$ "	1"	✓	✓	✓	✓	✓	✓
#18	$2\frac{1}{2}$ "	$3\frac{3}{4}$ "	2"	$1\frac{1}{8}$ "	✓	✓	✓	✓	✓	✓
#20	3"	$4\frac{1}{4}$ "	$2\frac{1}{2}$ "	$1\frac{1}{8}$ "	✓	✓	✓	✓	✓	✓

ORDERING GROMMET DRAPERIES

- 1- Determine the quantity, and if it is a pair or single panel.
- 2- Choose desired fullness and grommet size, color and approximate spacing.
- 3- Select a fabric design and color for your grommet draperies. (Make sure your selection is suitable for drapery treatments. See the Recommended Applications at flair21.com.)
- 4- Mark the desired hem style (Eurohem or double-turned hem, as the fabric allows) and size.
- 5- Select a lining design, color and hem. NOTE: room-darkening lining cannot be used with sheer fabrics.
- 6- Indicate if interlining is desired. NOTE: Interlining is recommended for select silks and faux silks (see the Properties and Recommended Applications at flair21.com).
- 7- Determine the finished width and length of your drapery.
- 8- Calculate the width of the left and/or right panels.
- 9- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the chart matching your fabric width (wide- or narrow-width), fullness, lining and hem selections. Follow down the left column to your series number and go across to your width (if your width is between sizes, go up to the next higher size). For narrow-width fabrics, you will need to locate the correct chart for your series number, and then find the price based on your length and width.
- 10- Choose (if desired) tieback(s) shape and finish with pricing on pages 88–90 and 213-214 in this Chart Pricing Guide.
- 11- Add the subtotals from steps 9 and 10 to determine your total retail price.

PRICE EXAMPLE: GROMMET DRAPERIES

- 1- One panel
- 2- 2 ½ fullness — 2" Nickel Grommets with 6" spacing
- 3- Fabric 00117 1/12-118 (Wide-Width)
- 4- Eurohem chosen
- 5- Lining 01000 1/10-118 with Eurohem
- 6- No interlining
- 7- Finished width 40", finished length 92"
- 8- Left panel: 40"
- 9- Series 22 (found in Fabric Pricing Guide). Go to page 53 for grommet draperies (using wide-width fabric) with 2.5 fullness, lined with Eurohem. Go down the left side to Series 22 and across to 48" (round up) = \$579.
- 10- No tiebacks desired.
- 11- \$579 (Estimated) Total

RING TOP DRAPERIES

- The top of each panel is soft—no buckram is used—it is finished with a fabric-covered micro welt. There is a 4" fabric face on the back of the panel at the top.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.
- Clip rings are suggested for use on the top (not included with draperies).
- The number of clip rings used is a design feature to be decided by the decorator. The larger the space, the more the top will relax. Relaxing at the top can cause a slight relaxing at the bottom of the drapery, so be sure to allow enough clearance at the bottom of your drapery.
- Any desired return can be achieved by where the last clip ring is attached.
- A contrasting, fabric-covered micro welt is available as an upgrade.

MEASURING LENGTH: Measure from inside the clip, which will hold the fabric, to your desired length.

ORDERING RING TOP DRAPERIES

- 1- Determine the quantity, and if it is a pair or single panel.
- 2- Choose desired fullness.
- 3- Select a fabric design and color for your ring top draperies. (Make sure your selection is suitable for drapery treatments. See the Recommended Applications at flair21.com.)
- 4- Mark the desired hem style (Eurohem or double-turned hem, as the fabric allows) and size.
- 5- Select a lining design, color and hem. NOTE: room-darkening lining cannot be used with sheer fabrics.
- 6- Indicate if interlining is desired. NOTE: Interlining is recommended for select silks and faux silks (see the Properties and Recommended Applications at flair21.com).
- 7- Determine the finished width and length of your drapery.
- 8- Calculate the width of the left and/or right panels.
- 9- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the chart matching your fabric width (wide- or narrow-width), fullness, lining and hem selections. Follow down the left column to your series number and go across to your width (if your width is between sizes, go up to the next higher size). For narrow-width fabrics, you will need to locate the correct chart for your series number, and then find the price based on your length and width.
- 10- Choose (if desired) tieback(s) shape and finish with pricing on pages 88–90 and 213–214 in this Chart Pricing Guide.
- 11- Add the subtotals from steps 9 and 10 to determine your total retail price.

PRICE EXAMPLE: RING TOP DRAPERIES

- 1- One panel
- 2- 2 ½ fullness
- 3- Fabric 00116 1/10-118 (Wide-Width)
- 4- Eurohem chosen
- 5- Unlined
- 6- No interlining
- 7- Finished width 40", finished length 92"
- 8- Right panel: 40"
- 9- Series 24 (found in Fabric Pricing Guide). Go to page 60 for ring top draperies (using wide-width fabric) with 2.5 fullness, unlined with Eurohem. Go down the left side to Series 24 and across to 48" (rounding up) = \$469.
- 10- No tiebacks desired.
- 11- \$469 (Estimated) Total

ROD POCKET DRAPERIES

- The soft top can be made with a pocket alone, or a pocket with a heading.
- When the drapery is gathered on the rod, the heading appears as a ruffle.
- Remember to include the heading when calculating the finished length.
- There are no returns on rod pocket draperies.
- When the fabric is gathered on the rod, it causes the overall length to draw up, this is called “rod take-up”.
- We recommend you add to your length to allow for this loss, but it is your choice to make this addition, and if so, how much.
- The amount of loss is influenced by: diameter of the rod, size of the pocket, fullness of the drapery and thickness of the fabric.

- See the chart below for approximate rod take-up and suggested pocket size for various rod types and sizes.
- If your selected fabric is thick or your drapery has a high fullness, you may want to order a larger pocket.
- Your ordered length will be the flat finished length (including pocket and any heading); flair21 makes no additions or subtractions.

SINGLE POCKET

- This style has a pocket on the top of the drapery.
- It can be made with or without a heading.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.

MEASURING LENGTH: Measure from the top of the rod to your desired length, and make any desired additions for rod take-up and/or heading.

DOUBLE POCKET

- This style has a pocket on both the top and bottom of the panel.
- It can be made with or without headings.

MEASURING LENGTH: Measure from the top of the top rod to the bottom of the bottom rod, and make any desired additions for rod take-up and/or heading.

HOURGLASS PANEL

- A double pocket with the center angled to achieve an hourglass shape.
- Gathered center area is 1/3 of the total rod width. A straight tieback with Velcro closure finishes the center.
- It can be made with or without headings.

MEASURING LENGTH: Measure from the top of the top rod to the bottom of the bottom rod, and make any desired additions for rod take-up and/or heading. flair21 will make all calculations for hourglass shape.

ROD TYPE	ROD SIZE	SUGGESTED POCKET SIZE	APPROX. ROD TAKE-UP
Sash Rod / Standard Curtain Rod	1"	1 1/2"	1/2"
Round Pole—Wood or Metal	1"	2 3/8"	5/8"
Round Pole—Wood or Metal	1 1/4"	2 3/4"	3/4"
Round Pole—Wood or Metal	1 3/8"	3"	1"
Round Pole—Wood or Metal	2"	4 1/4"	1 1/4"
Round Pole—Wood or Metal	2 1/2"	5"	1 3/4"
Round Pole—Wood or Metal	3"	5 3/4"	2 1/4"
Continental I	4 1/4"	5 1/2"	5/8"
Continental I	2 1/4"	4 1/4"	5/8"
Faux Wood Valance	3 5/8"	5"	3/4"

ORDERING ROD POCKET DRAPERIES

- 1- Determine the quantity, and if it is a pair or single panel.
- 2- Choose desired fullness, and specify single or double pocket, pocket size(s) (top/bottom) and heading size (if applicable).
- 3- Select a fabric design and color for your rod pocket draperies. (Make sure your selection is suitable for drapery treatments. See the Recommended Applications at flair21.com.)
- 4- Mark the desired hem style (Eurohem or double-turned hem, as the fabric allows) and size.
- 5- Select a lining design, color and hem. NOTE: room-darkening lining cannot be used with sheer fabrics.
- 6- Indicate if interlining is desired. NOTE: Interlining is recommended for select silks and faux silks (see the Properties and Recommended Applications at flair21.com).
- 7- Determine the finished length and width of your drapery.
- 8- Calculate the width of the left and/or right panels.
- 9- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then in this Chart Pricing Guide find the chart matching your fabric width (wide- or narrow-width), pocket/hem, fullness and lining selections. Follow down the left column to your series number and go across to your width (if your width is between sizes, go up to the next higher size). For narrow-width fabrics, you will need to locate the correct chart for your series number, and then find the price based on your length and width.
- 10- Choose (if desired) tieback(s) shape and finish with pricing on pages 88–90 and 213-214 in this Chart Pricing Guide.
- 11- Add the subtotals from steps 9 and 10 to determine your total retail price.

PRICE EXAMPLE: ROD POCKET DRAPERIES

- 1- One panel
- 2- 2 ½ fullness — 3" Double Pockets
- 3- Fabric 03005 0/11-118 (Wide-Width)
- 4- Double Pocket—no bottom hem
- 5- Lining 01000 0/10-118
- 6- No interlining
- 7- Finished length 92", finished width 40"
- 8- Left panel: 40"
- 9- Series 10 (found in Fabric Pricing Guide). Go to page 75 for double rod pocket draperies (using wide-width fabric) with 2.5 fullness, lined. Go down the left side to Series 10 and across to 48" (round up) = \$377.
- 10- No tiebacks desired.
- 11- \$377 (Estimated) Total.

TIEBACKS

- Tiebacks have Dacron filling inside for a slightly padded effect. (Buckram can be requested instead, at no additional charge).
- Small rings are sewn on the back for installation (with the exception of tiebacks for an hourglass panel, which have Velcro® closure).
- Tiebacks are available in three standard widths. Please indicate on the order form if you want a size other than standard.

BOARD MOUNT TOP TREATMENTS

- Treatment styles, details and pictures below.
- 3 ½" return is standard, 5 ½" and 7 ½" returns available as an upgrade.
- Maximum width for one section is up to 92" (depending on the style chosen); oversized widths 92" – 184" will be hinged.
- Oversized boards shipped without hinging will be shipped LTL with additional charges.

SHAPED KICK PLEAT VALANCE

- Center scallop with angled ends, self lined
- Evenly spaced kick pleats approximately 16"
- Board mounted, not a washable treatment
- Top finished with ¼" welt
- Optional Velcro® with no welt (only with wide-width fabric)
- Number of scallops will be determined by the treatment width
- Specify length of center scallop; short point will be 2" shorter, ends will be 2" longer.

UPGRADES: Interlining • Contrast welt • Trim • Contrast lined • Specify number of scallops

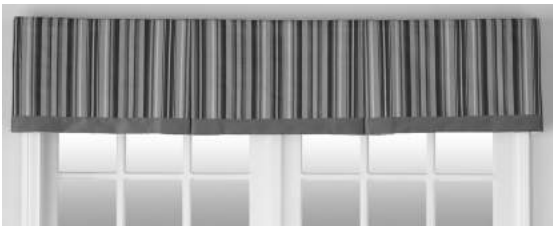

ARCH-SHAPED VALANCE

- Board mounted, not a washable treatment
- Top finished with ¼" welt
- Optional Velcro® with no welt (only with wide-width fabric)
- Self lined
- Specify short point, long point will be 13 ½" longer
- Number of center box pleats will be determined by the treatment width

UPGRADES: Interlining • Contrast welt • Trim • Contrast lined • Specify number of box pleats

BOX PLEATED VALANCE

- A tailored, box pleated valance (shown with band on bottom)
- Board mounted, not a washable treatment
- Self lined
- Specify length 10" – 24"
- Pleats spaced approximately 17" apart
- Half pleat on corner

UPGRADES: Interlining • Trim • Band on bottom • Specify pleat spacing • Velcro (only with wide-width fabrics)

SCALLOP-SHAPED VALANCE

- Board mounted, not a washable treatment
- Top finished with ½" welt
- Optional Velcro® with no welt (only with wide-width fabric)
- Self lined
- Space between jabots is approximately 15"
- Specify length of scallops; jabots will be 2" shorter than scallops

UPGRADES: Interlining • Trim • Contrast welt • Contrast lining • Specify pleat spacing

ROD MOUNT TOP TREATMENTS

Rods not included. Treatment styles, details and pictures below.

GATHERED SLEEVE VALANCE

- 3 ½" sleeve
 - 5 ½" sleeve
 - Sheers will be 3X fullness
 - Drapery weight fabrics will be 2.5X fullness
 - Double layer (available only with wide-width fabrics) if specified
- UPGRADES: Specify fullness • Specify alternate pocket size

GROMMET VALANCE

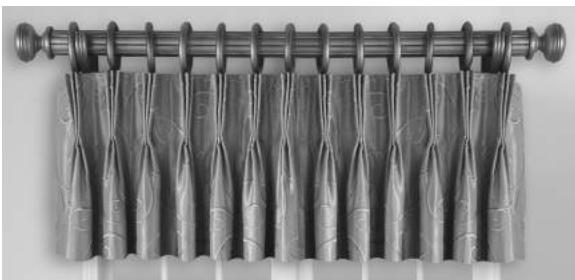

- Length up to 24"
 - Lined
 - Specify grommet size and color
 - Space between grommets is approximately 6"
- UPGRADES: Interlining • Trim • Banding • Lengths over 24"

GATHERED SLEEVE VALANCE (WITH TOP & BOTTOM HEADERS)

- 3 ½" sleeve has 1 ½" headings on top and bottom
 - 5 ½" sleeve has 2" headings on top and bottom
 - Sheers will be 3X fullness
 - Drapery weight fabrics will be 2.5X fullness
 - Double layer (available only with wide-width fabrics) if specified
- UPGRADES: Specify fullness • Alternate pocket size • Alternate header size

PLEATED VALANCE

- Length up to 24"
 - Lined
 - Specify pleat style
 - Pinch and bohemian pleat will have a 4" buckram
 - Goblet pleat will have a 5" buckram
- UPGRADES: Interlining • Trim • Banding • Length over 24"

RING TOP VALANCE

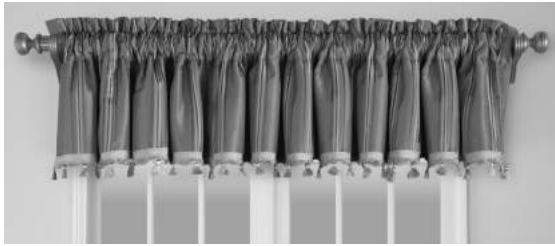

- Length up to 24"
 - Lined
 - Micro welt covered in same fabric
 - Clip rings are suggested for use on the top (not included)
 - The number of clips used is a design feature determined by the decorator
- UPGRADES: Interlining • Trim • Banding • Length over 24" • Contrast-covered micro welt

ROD MOUNT TOP TREATMENTS

Rods not included. Treatment styles, details and pictures below.

ROD POCKET VALANCE

- Length up to 24"
- Lined
- Specify pocket size
- Specify header size (if desired)

UPGRADES: Interlining • Trim • Banding • Lengths over 24" • Contrast covered micro welt

BOARD MOUNT SWAGS

- Treatment styles, details and pictures below.
- 3 ½" return is standard, 5 ½" and 7 ½" returns available as an upgrade.
- Maximum width for one section is up to 92" (depending on the style chosen); oversized widths 92" – 184" will be hinged.
- Oversized boards shipped without hinging will be shipped LTL with additional charges.

BELL SWAG VALANCE

- Board mounted, not a washable treatment
- Contrast lined
- Swags are cut on the bias, unless otherwise requested
- Specify length: 16", 18" or 20"
- Swag width approximately 26"
- Number of swags determined by treatment width — minimum width is 31"

UPGRADES: Interlining • Trim • Banding • Specify number of swags • Velcro (only with wide-width fabrics)

TRADITIONAL SWAG VALANCE

- Board mounted, not a washable treatment
- Cascades contrast lined
- Swags are cut on the bias, unless otherwise requested
- Swag lined with standard lining
- Swag length is 18"
- Cascades up to 36"
- Number of swags determined by treatment width — minimum width is 30"
- For multiple swags, please specify swag placement (see page 19 for a diagram)

UPGRADES: Interlining • Trim • Banding on bottom of swag
Specify number of swags • Velcro (only with wide-width fabrics)
• Choice of lining on swag and/or cascade • Cascade length up to 110"

ROD MOUNT SWAGS

Rods not included. Treatment styles, details and pictures below.

ROUNDED SWAG VALANCE WITH CASCADE

- Swags are cut on the bias, unless otherwise requested
- Self lined
- One cascade (left OR right) — (two shown with contrast lining over pleated panels)

UPGRADES: Interlining • Trim • Contrast lining

POLE SWAG

- Swags are cut on the bias, unless otherwise requested
- Self lined
- Velcro provided for mounting to the rod
- Number of swags determined by treatment width
- Specify swag placement (see page 19 for a diagram)

- Swag sets 60" – 80" will have an 18" drop with cascades 12" wide
- Swag sets 80" – 144" will have a 24" drop with cascades 16" wide
- Cascades up to 36" long, please specify desired length

UPGRADES: Interlining • Trim • Specify number of swags • Returns
• Cascades up to 110" long

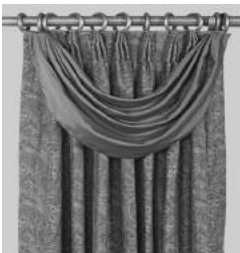

POINTED BELL SWAG

- Swags are cut on the bias, unless otherwise requested
- Bell swag is self lined

UPGRADES: Interlining • Trim • Contrast lining

ROUNDED SWAG

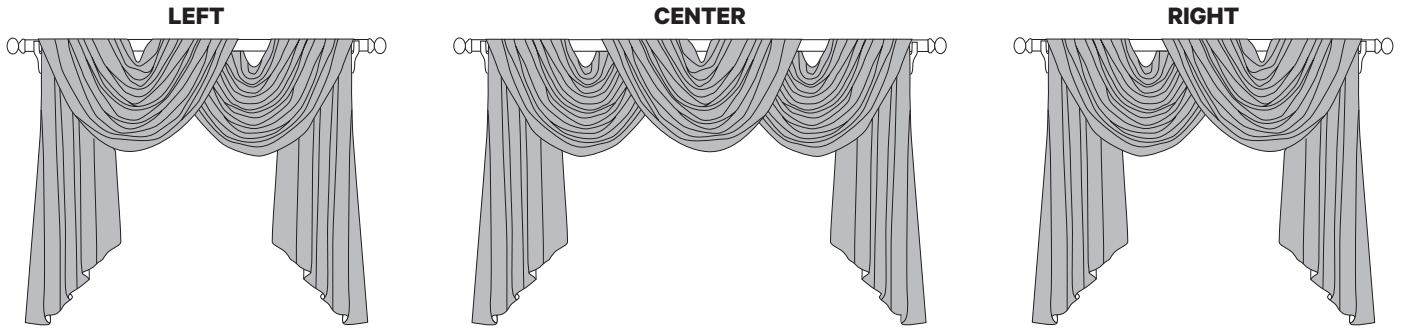

- Swags are cut on the bias, unless otherwise requested
- The swag is self lined

UPGRADES: Interlining • Trim

POUF SWAGS

Rods not included. Treatment styles, details and pictures below.

STRAIGHT TOP, MULTIPLE SWAG WITH TAILS AND POUFS

- Wide-width fabric only
- Number of swags determined by treatment width; swags are cut on the bias
- Self lined
- Tails and poufs attached
- Tail length up to 36", please specify
- Ring mount, please specify ring-to-ring measurement
- Minimum width is 48" — Maximum width is 144"

UPGRADES: Tails up to 110" long • Specify the number of swags • Use 2 colors of the same fabric

RELAXED TOP, SINGLE SWAG WITH TAILS AND POUFS

- Wide-width fabric only
- Swags are cut on the bias
- Self lined
- Tails and poufs attached
- Tail length up to 36", please specify
- Ring mount, please specify ring-to-ring measurement
- Minimum width is 36" — Maximum width is 120"

UPGRADES: Tails up to 110" long • Use 2 colors of the same fabric

RELAXED TOP, MULTIPLE SWAG WITH TAILS AND POUFS

- Wide-width fabric only
- Number of swags determined by treatment width; swags are cut on the bias
- Self lined
- Tails and poufs attached
- Tail length up to 36", please specify
- Ring mount, please specify ring-to-ring measurement
- Minimum width is 48" — Maximum width is 144"

UPGRADES: Tails up to 110" long • Specify the number of swags • Use 2 colors of the same fabric

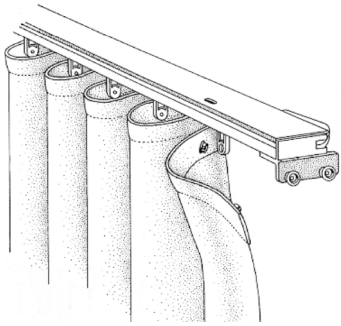

STRAIGHT TOP, SINGLE SWAG WITH TAILS AND POUFS

- Wide-width fabric only
- Number of swags determined by treatment width; swags are cut on the bias
- Self lined
- Tails and poufs attached
- Tail length up to 36", please specify
- Ring mount, please specify ring-to-ring measurement
- Minimum width is 36" — Maximum width is 120"

UPGRADES: Tails up to 110" long • Use 2 colors of the same fabric

RIPPLEFOLD

- Panels manufactured specifically for the Kirsch Ripplefold drapery snap system. The drapery panels snap onto carriers that swivel, eliminating 'flat' drapery areas. flair21 uses Kirsch specifications when making Ripplefold draperies.
- A permanently stiffened, nylon snap tape is stitched to the top of a flat panel.
- The snaps on the nylon snap tape are 4 ¼" on center (regardless of the drapery fullness).
- Headings suspended under the track cannot tip or sag.
- The bottom of the drapery will have a Eurohem or a double-turned hem—your choice, as the fabric allows.
- Available unlined or lined (all of these linings are available with a Eurohem or double-turned hem):
 - flair21's O1000 lining in your choice of white (10), antique white (11), alabaster (12) or cream (15)
 - flair21's room-darkening O1002 lining (cannot be used with sheer fabrics) in white (10) or antique white (11)
- Interlining is recommended for use with silks, because this natural fiber is very UV sensitive. Interlining is also available for use with other lightweight fabrics. Interlining is always an upgrade.
- Panels are finished with corner weights (with the exception of open-weave fabrics).
- Double 1 ½" side hem is standard. Side hems are blind stitched (with the exception of open-weave fabrics).
- Lengths up to 134" will have a ¼" tolerance. Lengths over 134" will have a 1" tolerance.
- Maximum finished lengths are determined by the fabric design and hem—see the details above each pricing chart. Extra long lengths are available, for pricing, please submit a quote request via fax or email.
- Trim or banding applied to the leading edge or the hem, is available as an upgrade.
- The fullness is determined by the spacing of the carriers on the rod (not by the snap tape), draperies can be 60%, 80%, 100% or 120% fullness
- On the rod, there is a master on each leading edge. One on a one-way draw, two on a split draw. There are two different types of master:
 - Butt-Master (this type cannot be baton draw): Butt together in center for a continuous looking flow in drapery folds, on a split draw. Butt master is to be used for a one-way draw.
 - Overlap Master (can be cord draw or baton draw): Overlap in center for best privacy, also assures less light gap.
- flair21 will add an extra snap on the leading edge or return end of the drapery, according to Kirsch directions, depending on the type of master.

HOW TO MEASURE FOR RIPPLEFOLD

- Measure the width of the rod from end to end; this is the face width or rod width. Do not add for return or overlap.
- Divide this number in half to find the panel size, left and right.
- To determine the fullness on an existing rod. Measure the space between carriers.
 - 60% (1.6 Fullness) = 2 5/8" space
 - 80% (1.8 Fullness) = 2 3/8" space
 - 100% (2 Fullness) = 2 1/8" space
 - 120% (2.2 Fullness) = 1 7/8" space
- You will need to determine the type of master for the order form:
 - Butt Master: each master will have two snaps on the side. The two snaps on the left master will 'butt' up to the two snaps on the right master.
 - Overlap Master: the masters will cross over each other in the center of the rod when closed.
- Overlap Masters are available with two types of batons:
 - Clip on style: the baton clips onto the master (no baton reinforcement is used).
 - Screw in style: the baton is attached through the fabric and into the master with a screw. This style needs a baton reinforcement attached to the leading edge of the drapery. A baton reinforcement is an upgrade.
- The Kirsch specifications include fabric to go around the end of the rod. The fabric will hide the end of the rod, but will not go all the way to the wall. If you would like the fabric return to go all the way to the wall, please tell us the amount we need to add. On the return end of the rod, measure from the back of the rod end cap to the wall. (Please enter this amount separately; do NOT add it to the rod/face width. flair21 will add this extra amount as necessary.)
- Length: Measure from the bottom of the rod to your desired length.

ORDERING RIPPLEFOLD

- 1- Determine the quantity, and if it is a pair or a panel.
- 2- Select a fabric design and color for your Ripplefold treatment. (Make sure your selection is suitable for Ripplefold. See the Recommended Applications at flair21.com.)
- 3- Mark the desired hem style (Eurohem or double-turned hem, as the fabric allows) and size.
- 4- Select a lining design, color and hem. NOTE: room-darkening lining cannot be used with sheer fabrics.
- 5- Indicate if interlining is desired. NOTE: Interlining is recommended for select silks and faux silks (see the Properties and Recommended Applications at flair21.com).
- 6- Choose your desired type of master: Butt Master or Overlap Master.
- 7- Determine your desired fullness: 60%, 80%, 100% or 120%.
- 8- Determine your rod width and finished length.
- 9- Calculate the width of the left and/or right panels.
- 10- Indicate any extra fabric desired on the return.
- 11- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the chart matching your fabric width (wide- or narrow-width), fullness, lining and hem selections. Follow down the left column to your series number and go across to your width (if your width is between sizes, go up to the next higher size). For narrow-width fabrics, you will need to find your price based on the length and width.

PRICE EXAMPLE: RIPPLEFOLD

- 1- One panel
- 2- Fabric 00101 1/602-118 (Wide-Width)
- 3- Eurohem
- 4- Unlined
- 5- No interlining
- 6- Overlap Master
- 7- 120% Fullness
- 8- Rod width 92", finished length 86"
- 9- Right panel: 92"
- 10- No extra on return
- 11- Series 24 (found in Fabric Pricing Guide). Go to page 97 for Ripplefold treatments (using wide-width fabric), 120% fullness, unlined with Eurohem. Go down the left side to series 24 and across to 96" (must round up) = \$843 (Estimated) Total.

CORDON

Cordon's wide range of colors and unique design makes it easy to create a modern, elegant statement in residential and commercial spaces. Cordon catches the eye and makes a bold statement in offices, stores, suites and exhibition stands—as window treatments, room partitions or a variety of other uses.

- Sold in various lengths (see below), per yard, with a 4" header, or upgrade with a velcro, rod pocket, shirring tape, grommet or snap tape header.
- Guaranteed five years not to shrink, stretch or fade.
- Fiber Content: 100% Polyester — Inherently Flame Retardant (IFR)
- Available in 15 unique colors with everything from black and white to gold and candy apple red.

TO CLEAN: Before washing, remove any drapery hooks and tie the single strings together at the top, middle and bottom. Wash on the warm cycle in a lingerie bag or pillow case. After washing, remove the ties and re-hang damp. **Do not put in the dryer.**

ITEM	LENGTH	RETAIL PRICE / YARD	SERIES NUMBER
Cordon 9705	90"	\$140	34
	106"	\$178	37
	126"	\$178	37
	157"	\$200	38
	197"	\$200	38
	236"	\$200	38

FINISHING OPTIONS & PRICING

For finished, ready-to-hang panels, choose your desired length, multiply by the number of yards required, and then add the (per yard) finishing prices below. **NOTE:** Remember to multiply the desired finishing option(s) by the number of yards ordered.

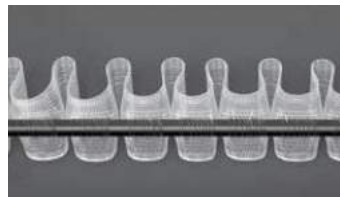

Special finishing, such as pattern cuts and multicolor panels (linear or stacked), is available; contact customer service for details.

CUT TO LENGTH: \$41 PER YARD

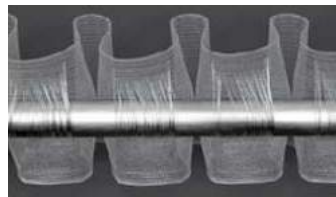

VELCRO, TAPE OR ROD POCKET HEADER: \$54 PER YARD

SHIRRING TAPE

2" BACK-TAB TAPE

4" BACK-TAB TAPE

VELCRO TAPE

GROMMET HEADER: \$94 PER YARD

- Metal grommets
- Choose 1" or 1.5" (inside) diameter
- Colors: Brass, Brushed Brass, Copper, Black, Steel or Chrome
- Typical spacing between grommets is 5.5"-7", or you may specify
- MUST have an even number of grommets

VERTICAL WRAP FOR EXISTING SYSTEMS

- Like a slipcover that easily installs over existing verticals.
 - The fabric has a snap tape sewn across the top and a tack at the bottom to make a pocket.
 - Snap the fabric over the top of the vane, and then slip the vane into the bottom pocket.
- **For existing vertical blinds with 3 ½" vanes only.**
- **Maximum vane length is 114". flair21 will add ¼" of fabric to cover the vane.** Extra long wraps (for vanes longer than 114") are available, for pricing, please submit a quote request via fax or email.
- **All Vertical Wraps feature Eurohem only. The Eurohem will hang just below the vane.**
 - A ¼" is added to the specified vane length to completely cover the vane.
 - It is important to verify that there is sufficient clearance between the bottom of the vane and the floor or window sill to accommodate the Eurohem.

TO CLEAN: simply unsnap, wash in warm water on the gentle cycle, re-hang damp, smooth any folds (to minimize wrinkles) and air dry.

TO STEAM: leave the fabric attached at the top, remove the vane from the bottom tack, hold the fabric away from the vanes, and steam from top to bottom. Do not put steam directly onto the PVC vanes, as this may cause the vanes to warp. After steaming the fabric, reinsert the vane into the bottom of the wrap.

NOTE: When installing Vertical Wraps on an existing vertical, keep in mind that if the corners of your vanes are not rounded they may snag the fabric. Therefore, take care when slipping the vanes into the bottom pockets. **Snags in the fabric pocket are NOT a manufacturing defect**, and no credit will be issued.

ORDERING A VERTICAL WRAP FOR EXISTING SYSTEMS

- 1- Determine quantity needed (for a split draw, you will need to order two panels).
- 2- Select a fabric design and color for your Vertical Wrap. (Make sure your selection is suitable for a Vertical Wrap. See the Recommended Applications at flair21.com.)
- 3- Give the number of vanes and the exact length of the vanes. **NOTE: The treatment will be ¼" longer to completely cover the vanes; WATCH OUT FOR CLEARANCE TO FLOOR/WINDOW SILL!**
- 4- For a quick customer estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, match that series number with the number of vanes from the existing vertical.
- 5- You can also order a Shirred sleeve for a valance when ordering a Vertical Wrap without the hardware. Specify rod width, fullness, pocket size and header size (if necessary) when ordering. We suggest ordering the sleeve slightly larger than the valance that you are covering to allow for smooth installation and adjustments.

PRICE EXAMPLE: VERTICAL WRAP FOR EXISTING SYSTEMS

- 1- Pricing for one panel
- 2- Fabric: 03005 1/901-118 (Wide-Width)
- 3- Number of vanes: 22, and length of vanes: 87"
- 4- Series 10 (found in Fabric Pricing Guide). Go to the Vertical Wrap chart on page 99. Since the number of vanes is 22, you will need to go up to 25. Go down the left side to series 10 and across to 25 = \$576 (Estimated) Total
- 5- No Shirred sleeve desired

VERTICAL WRAP COMPLETE

- Heavy-duty vertical track system capable of rotating and traversing at widths up to 240" for residential and commercial applications.
- The system is completed with the flair21 fabric of your choice.
- The fabric has snap tape sewn across the top, a tack at the bottom to make a pocket, and Eurohem, to hang below the bottom of the vane.
- Each system comes with your choice of valance: Shirred fabric sleeve (matching your wrap), faux wood valance (in white or ivory) or (with a surcharge) reeded hardwood valance (choice of four colors).
- The vanes are 3 1/2" flat with rounded corners, and available in three colors: white, ivory, and alabaster.

• **Maximum width is 240". Maximum overall length (from top of headrail to bottom of Eurohem) is 114", and the minimum overall length is 55".** Extra long wraps are available up to 192", for pricing, please submit a quote request via fax or email.

OPERATION: Child-safe cord, baton or motorized. Available stack configurations: one-way or split. The (24", 36", 48" or 60" white) baton-controlled system is only available on one-way systems. There is a surcharge for motorized tracks, call customer service for more info.

HEAD RAIL: Made of extruded aluminum alloy, 1 1/2" wide X 1" high. The extrusion has a wall thickness of .045" with a brushed aluminum finish.

TILT SHAFT: Made of extruded aluminum alloy, 1/4" diameter, single groove.

CARRIER: Each carrier is 5/16" wide with two wheels, molded of self lubricating plastic. The carriers have a geared clutch system for overload protection and a steel clutch spring to reinforce positive action. There also is a unique stabilizer bar designed to provide smooth traversing. The hooks of the carrier are made of clear, ultra-violet resistant lexan and are replaceable even while the unit is installed. The carriers provide the vanes with 185° rotation capability to provide full vane closure and will stay in position unless reset. Maximum vane weight 1 1/4 pounds.

CONTROL CHAIN: The control chain is made of Celcon beads molded onto a nylon cord. One full cycle of the chain will self align the vanes.

SPACER LINKS: The spacers, made of flexible, corrosion proof, stainless steel, are interlocked between carriers to provide smooth traversing.

END CAPS: All Vertical Wrap tracks are manufactured with completely covered end caps, concealing internal parts for a custom, finished appearance. The end caps are molded of self lubrication plastic and their unique design allows for only 1/4" light gap on the control end of an inside mount vertical. The Vertical Wrap system comes with a 4-to-1 ratio rotation mechanism (46" of control chain required to rotate 180°).

Headrail	
Depth:	1 1/2"
Height:	1"

Space from Center of Carrier to Wall	
Minimum:	2 5/8"
Maximum:	4 3/4"

Space Required for Inside Mount (IB)	
Flush Mount	4"
Fully Recessed (including vanes)	5"

Maximum Space Between Mounting Brackets:	15"
---	-----

Minimum Width:	10"
-----------------------	-----

Maximum Width (Split Draw):	240"
------------------------------------	------

Maximum Width (One-Way Draw):	170"
--------------------------------------	------

Maximum Weight (Baton Control):	14 lbs.
--	---------

Minimum Overall Length:	55"
--------------------------------	-----

Maximum Vane Length:	192"
-----------------------------	------

STACK: 5/16" wide carrier and 1/4" light gap end cap allows for very tight stacking. A 122" one-way draw track stacks to just 15" of space. (See stack back chart on page 27)

TO CLEAN: simply unsnap, wash in warm water on the gentle cycle, rehang damp, smooth any folds (to minimize wrinkles) and air dry.

TO STEAM: leave the fabric attached at the top, remove the vane from the bottom tack, hold the fabric away from the vanes, and steam from top to bottom. Do not put steam directly onto the PVC vanes, as this may cause the vanes to warp. After steaming the fabric, reinsert the vane into the bottom of the wrap.

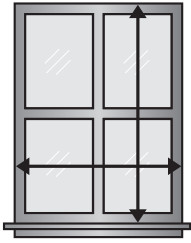

NOTE: The final vane count for Vertical Wrap complete systems is dependent upon the mount and type of draw chosen.

Keep in mind that the corners of the vanes may snag the fabric. Therefore, take care when slipping the vanes into the bottom pockets. **Snags in the fabric pocket are NOT a manufacturing defect**, and no credit will be issued.

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

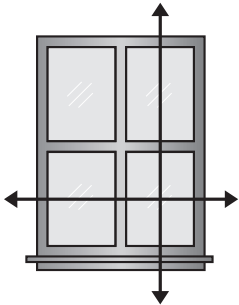

HOW TO MEASURE FOR VERTICAL WRAP SYSTEMS

INSIDE MOUNT

- For the **length**, use the smallest measurement from inside the top casing of the window to inside the bottom casing or the floor.
- To find the **width**, measure inside the window casing from left to right.
- **flair21 will take $\frac{3}{8}$ " deduction for width and length** to allow for clearance.
- Standard return for the valance on an inside mount is 3 $\frac{1}{2}$ ", if no return is needed please specify.
- Inside mount Vertical Wraps will have a 'false vane' on the return side (i.e. a one-way draw will have one false vane and a split draw will have two false vanes). The false vane(s) will not turn with the true vanes—this helps eliminate any light gap. If you choose not to have a false vane(s), please indicate on your order.

OUTSIDE MOUNT

- Measure the **width** and **length** you wish to cover (NOTE: This is typically 2" to 4" from the outside edge of the window—from the top of the headrail, to the bottom of the Eurohem).
- **flair21 does NOT make any deductions** or additions.

DESIGNER'S TIP

- For the **length**, it is good to **measure from 4" to 6" above the casing** to just above the floor. Hanging your treatment higher will give your room the illusion of taller ceilings and bigger windows.
- You can also create the illusion of larger windows by **allowing the treatment to stack next to the window** instead of covering it. The track should **extend beyond the window**—depending on the width of the treatment—to allow for stack-back. See the chart on the next page to help determine the stack back space required.

ORDERING VERTICAL WRAP COMPLETE

- 1- Determine quantity needed.
- 2- Select a fabric design and color for your Vertical Wrap. (Make sure your selection is suitable for Vertical Wraps. See the Recommended Applications at flair21.com.)
- 3- Determine desired mount (inside or outside) and stack (left, right or center split).
- 4- Determine exact blind width (headrail width) and length (from the top of the headrail to the bottom of the fabric).
- 5- For a quick estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, match that series number with blind width under the appropriate chart for the desired mount/stack.
- 6- Choose desired vane color (white, ivory or alabaster).
- 7- Choose desired control position (left or right). (The cord is the same length as the vane unless specified otherwise).
- 8- Choose desired valance. A faux wood or shirred sleeve valance can be ordered at no charge. A Hardwood Reeded Pole Valance is available as an upgrade (see page 28 for available finials and finishes).

NOTE: Pricing charts are according to the mount and draw chosen. Follow the instructions below, and go to the appropriate chart.

PRICE EXAMPLE: VERTICAL WRAP COMPLETE

- 1- Pricing for one system
- 2- Fabric: 03005 1/12-118 (Wide-Width)
- 3- Outside mount, stack left
- 4- 112" x 90 $\frac{1}{2}$ "
- 5- Series 10 (found in Fabric Pricing Guide). Go to the Outside Mount One-Way Vertical Wrap chart on page 101. Since the width is 112", you will need to go up to 120" on the chart. Go down the left side to series 10 and across to 120" = retail price of \$1362
- 6- Vane color: white
- 7- Control: left
- 8- Valance: Reeded fascia in mahogany color with returns. (7 $\frac{1}{2}$ " is the standard for wood valance return). Wood valance upgrade pricing is on page 28.
 - 112" + 7 $\frac{1}{2}$ " + 7 $\frac{1}{2}$ " = 127" or 10 $\frac{1}{2}$ ', so round up to 11' x \$25 = \$275
 - System price of \$1362 + valance upgrades at \$275 = \$1637 (Estimated) Total
 - If finials or end caps are used, take the face width (rounded up to the nearest foot) and add the cost of the finials/end caps.

VERTICAL WRAP OPENING, STACK BACK & TRACK SIZE NEEDED

Use the charts below to find the stack back and track size needed for your window/door opening. All measurements are in inches.

ONE WAY		
Opening To Clear	Stack Back	Track Size Needed
7 1/8	3	10
9 7/8	3 1/4	13 1/8
12 3/4	3 5/8	16 1/4
15 1/2	3 7/8	19 3/8
18 3/8	4 1/4	22 1/2
21	4 1/2	25 1/2

Maximum Width (Split Draw): 240"

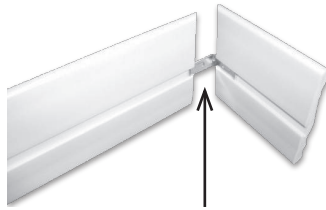

VALANCES FOR VERTICAL WRAP SYSTEMS

STANDARD FAUX WOOD -OR- SHIRRED SLEEVE VALANCE

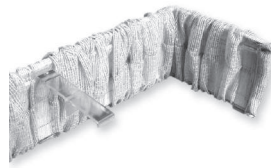

- The faux wood valance (in white or ivory) or shirred sleeve (in the same fabric as the wrap) is available at no charge.
- It is not necessary to give sizes, but you must fill in the appropriate information on the Vertical Wrap order form.
- The valance is 3 1/2" tall. For an outside mount, the standard return is 8 1/2" and 5 1/2" is the minimum. For an inside mount, the standard return is 2 1/2". Please specify if you do not want a return.

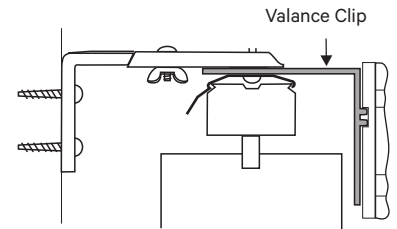

Faux Wood Valance

Returns are easily attached to the valance by sliding a small, L-shaped corner key into the groove on each corresponding piece.

Shirred Sleeve Valance

The valance is easily attached to the headrail by snapping the mounting clips (attached to the valance clips) onto the top of the headrail, then snapping the completed valance (with returns) onto the valance clips.

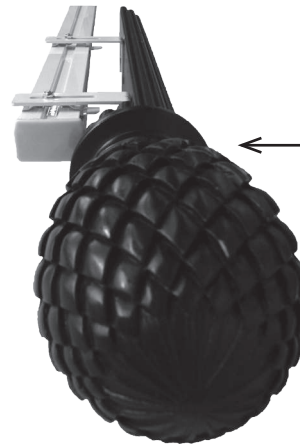

REEDED HARD WOOD VALANCE

- The hard wood valance fascia is available as an upgrade for Vertical Wrap complete systems in 16' reeded half-round poles.
- You have your choice of finials, end caps, or returns—available in four colors: Mahogany, Bronze, Black and Walnut.
- If no return is specified, the standard return on an outside mount is 7 1/2" and 3 1/2" on an inside mount.

Returns are hinged for easy installation.

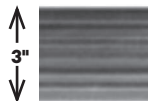

The valance easily snaps onto the top of the headrail.

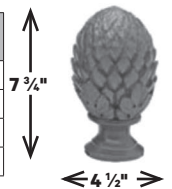

The finials screw into pre-drilled holes on both sides of the valance.

WOOD VALANCE PARTS

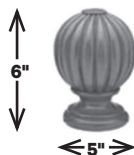

Part Number	Reeded Fascia 16'/Half Round	Retail Price
32-616-03	Mahogany	\$25 / Foot
32-616-17	Bronze	\$ 30 / Foot
32-616-45	Black	\$ 25 / Foot
32-616-55	Walnut	\$ 25 / Foot

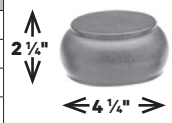

Part Number	Pine Cone Finial	Retail Price
34-115-03	Mahogany	\$54 Each
34-115-17	Bronze	\$66 Each
34-115-45	Black	\$54 Each
34-115-55	Walnut	\$54 Each

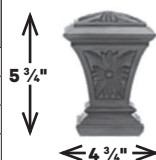

Part Number	Reeded Ball Finial	Retail Price
34-108-03	Mahogany	\$49 Each
34-108-17	Bronze	\$59 Each
34-108-45	Black	\$49 Each
34-108-55	Walnut	\$49 Each

Part Number	End Cap	Retail Price
33-140-03	Mahogany	\$20 Each
33-140-17	Bronze	\$25 Each
33-140-45	Black	\$20 Each
33-140-55	Walnut	\$20 Each

Part Number	Newport Finial	Retail Price
34-128-03	Mahogany	\$54 Each
34-128-17	Bronze	\$66 Each
34-128-45	Black	\$54 Each
34-128-55	Walnut	\$54 Each

PANEL GLIDE FOR EXISTING SYSTEMS

- A fabric panel treatment with Velcro® sewn across the top of the panel.
- On the top of every panel is a clear fabric protection shield to prevent damage due to rubbing on the hardware.
- There is a weight bar in the bottom of each panel for added stability.
- **Maximum length is 110"**. Extra Long panels are available, for pricing, please submit a quote request via fax or email.
- The size and number of panels will be determined by your existing hardware.

ORDERING PANEL GLIDE FOR EXISTING SYSTEMS

- 1- Select a fabric design and color for your Panel Glide. (Make sure your selection is suitable for Panel Glide. See the Recommended Applications at flair21.com.)
- 2- Determine whether the panel will be unlined, lined or self-lined, and select the design and color.
- 3- Specify number of panels.
- 4- Specify the exact length and width of each panel (maximum length is 110").
- 5- For a quick estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, match that series number with the panel width under the appropriate chart based on your lining and fabric width. For narrow-width fabrics, you will need to find your price based on the length and width.

PRICE EXAMPLE: PANEL GLIDE FOR EXISTING HARDWARE

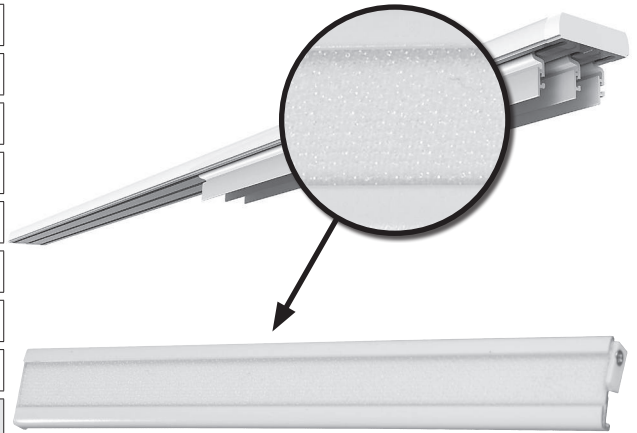

- 1- Fabric: 1215 0/972-118 (Narrow-Width)
- 2- Unlined
- 3- 5 Panels
- 4- 24" wide x 90" long
- 5- Series 12 (found in Fabric Pricing Guide). Go to the section for narrow-width fabrics and look at the chart for unlined panel glides on page 231. Go down the left side to series 12, 96" (rounding up) and across to 24" = retail price of \$151 per panel. Multiply by 5 for the number of panels = \$755 (Estimated) Total.

PANEL GLIDE COMPLETE

- A panel track up to 19' long with flat fabric panels that attach using Velcro®.
- The sliding metal profile with Velcro® strip is easily removed and reattached for convenient window access.
- There is a weight bar in the bottom of each panel for added stability.
- **Maximum width is 228". Maximum length (including headrail) is 112".** Extra Long panels are available, for pricing, please submit a quote request via fax or email.
- Choose wall or ceiling mount with a combination of 2 to 18 panels.
- One-way or center split; baton or cord drawn.
- **The average panel size is 20" to 30"**; the width of your panel is also the width of your stack back.
- With less than 3/8" space between panels, Panel Glide complete systems have a minimal mounting depth.
- The fabric panels can be unlined, lined or self-lined.
- On the top of every panel is a clear fabric protection shield to prevent damage due to rubbing on the hardware.
- All of the hardware required for installation is provided with every order.

PANEL GLIDE COMPLETE SPECIFICATIONS

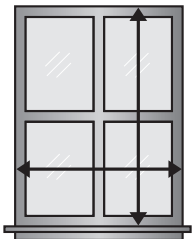

Headrail Height:	5/8"
Space from top of mounting bracket to top of panel:	13/16"
Minimum space from center of 1st channel to wall:	1/2"
Distance between channels (center to center):	11/16"
Maximum Width (single track):	19'
Maximum Width (2 tracks butt end to end must be ceiling mount):	38'
Minimum Width:	20"
Standard Baton Size (other sizes available):	45"
Space Required for Inside Mount (IB)	
Two Channels: (not available with motorization)	2 1/8"
Three Channels:	2 3/8"
Four Channels:	3 1/16"
Five Channels:	3 5/8"

A Velcro® strip is adhered to the hardware for the attachment of the fabric panel.

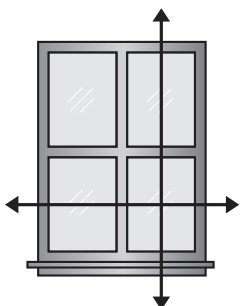

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

HOW TO MEASURE FOR PANEL GLIDE SYSTEMS

INSIDE MOUNT

- Measure the inside width of the window frame in three places: top, middle, and bottom. Then, measure the length in three places: both sides and the center. Use the smallest measurements.
- **flair21 will take 3/8" deduction for width and length.**

OUTSIDE MOUNT

- Measure the width and length you wish to cover (NOTE: This is typically 2"- 4" from the outside edge of the window—from the top of the headrail, to the bottom of the fabric panel).
- **flair21 DOES NOT make any deductions or additions.**

ORDERING PANEL GLIDE COMPLETE

- 1- Determine quantity.
- 2- Select a fabric design and color for your Panel Glide. (Make sure your selection is suitable for a Panel Glide system. See the Recommended Applications at flair21.com.)
- 3- Determine whether the panel will be unlined, lined or self-lined and specify the design and color. **NOTE: Interlining is recommended for select silks and faux silks** (see the Properties and Recommended Applications at flair21.com).
- 4- Specify the exact width of the headrail and total length of the treatment (maximum length is 112" from top of headrail to bottom of fabric panel).
- 5- Specify number of panels. **(See the suggested track configurations on pages 32 and 33).**
- 6- Determine stack: left, right or split draw.
- 7- Divide the width of the headrail by the number of panels and add your desired overlap for each panel. (4" is the standard overlap for glide panels, but you may specify if you want a different overlap size; this will determine the approximate width for each panel.)
- 8- For a quick estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the chart matching your fabric width (wide- or narrow-width) and lining selection. Match the series number with the panel width under the appropriate chart (for narrow-width fabrics, you will need to match the length with the width and series number). Multiply by the number of panels to determine your total panel price.
- 9- **See the hardware pricing chart at the bottom of this page to determine your Panel Glide hardware cost.** Add this to the total panel price for your grand total.
- 10- Determine mount: ceiling or wall.
- 11- Determine control: baton, cord left or cord right (specify cord length—standard is 1" shorter than the panel).

PRICE EXAMPLE: PANEL GLIDE COMPLETE

- 1- 1 system
- 2- Fabric: 00111 1/968-118 (Wide-Width)
- 3- Lining: 01000 0/10-118
- 4- 120" wide headrail and 92" overall length
- 5- 6 panels
- 6- Split Draw
- 7- $120" \text{ headrail} / 6 \text{ panels} = 20" + 4" \text{ overlap} = 24" \text{ wide panels}$
- 8- Series 26 (found in Fabric Pricing Guide). Go to the section for wide-width fabrics and look at the chart for lined Panel Glides on page 102. Go down the left side to series 26 and across to 24" = retail price of \$207 per panel. Multiply by 6 for the number of panels = \$1242 (Estimated) panel total
- 9- A split draw with 6 panels requires one 4-channel track. A 120" 4-channel track is \$435.
\$1242 total panel price + \$435 for hardware = \$1677 (Estimated) Total
- 10- Ceiling mount
- 11- Control: cord right

(See the suggested track configurations on pages 32 and 33)

Total Panels Needed: 8 | Total Tracks and Channels Required: One 5-Channel Track | Mounting Depth Required: 3 3/8"

Total Panels Needed: 10 | Total Tracks and Channels Required: Two 3-Channel Tracks | Mounting Depth Required: 4 1/8"

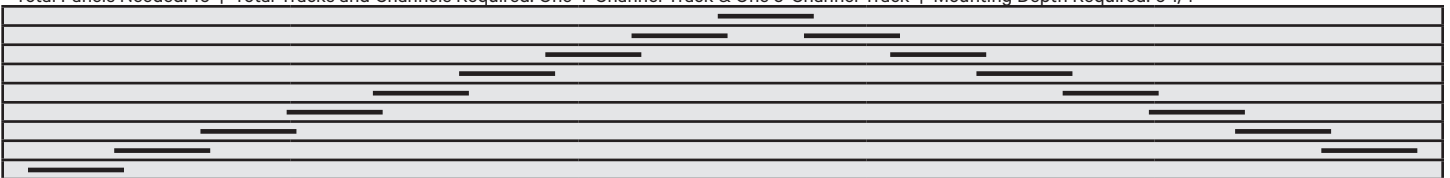

Total Panels Needed: 12 | Total Tracks and Channels Required: One 3-Channel Track & One 4-Channel Track | Mounting Depth Required: 4 3/4"

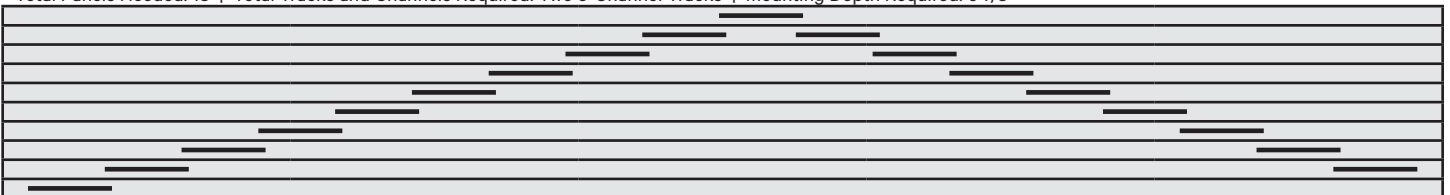

Total Panels Needed: 14 | Total Tracks and Channels Required: Two 4-Channel Tracks | Mounting Depth Required: 5 3/4"

Total Panels Needed: 16 | Total Tracks and Channels Required: One 4-Channel Track & One 5-Channel Track | Mounting Depth Required: 6 1/4"

Total Panels Needed: 18 | Total Tracks and Channels Required: Two 5-Channel Tracks | Mounting Depth Required: 6 7/8"

NOTE:

- Your order must indicate whether you want a one-way or split draw.
- For a split draw, the front left AND front right panel will be stationary unless otherwise specified.

PANEL GLIDE COMPLETE SUGGESTED TRACK CONFIGURATIONS

ONE-WAY DRAW (LEFT STACK SHOWN)

Total Panels Needed: 2 | Total Tracks and Channels Required: One 2-Channel Track | Mounting Depth Required: 1 1/2"

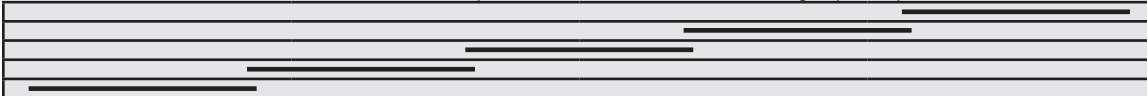

Total Panels Needed: 3 | Total Tracks and Channels Required: One 3-Channel Track | Mounting Depth Required: 2"

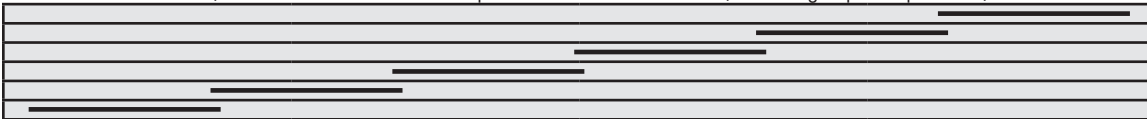

Total Panels Needed: 4 | Total Tracks and Channels Required: One 4-Channel Track | Mounting Depth Required: 2 5/8"

Total Panels Needed: 5 | Total Tracks and Channels Required: One 5-Channel Track | Mounting Depth Required: 3 3/8"

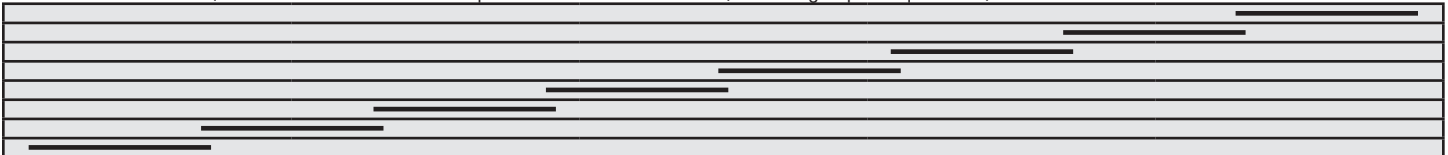

Total Panels Needed: 6 | Total Tracks and Channels Required: Two 3-Channel Tracks | Mounting Depth Required: 4 1/8"

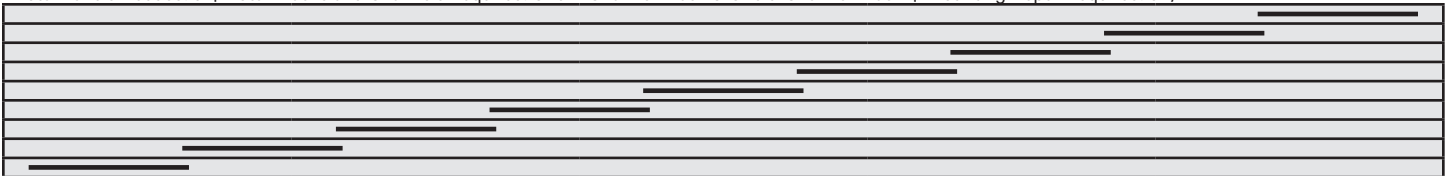

Total Panels Needed: 7 | Total Tracks and Channels Required: One 3-Channel Track & One 4-Channel Track | Mounting Depth Required: 4 3/4"

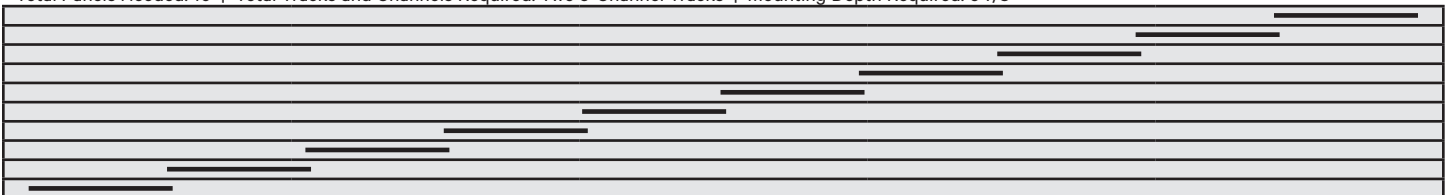

Total Panels Needed: 8 | Total Tracks and Channels Required: Two 4-Channel Tracks | Mounting Depth Required: 5 3/4"

Total Panels Needed: 9 | Total Tracks and Channels Required: One 4-Channel Track & One 5-Channel Track | Mounting Depth Required: 6 1/4"

Total Panels Needed: 10 | Total Tracks and Channels Required: Two 5-Channel Tracks | Mounting Depth Required: 6 7/8"

NOTE:

- Your order must indicate whether you want a one-way or split draw.
- For a left stack, the front left panel will be stationary unless otherwise specified.
- For a right stack, the front right panel will be stationary unless otherwise specified.

MOTORIZED PANEL GLIDE SYSTEMS

- The intelligent, built-in motor is self-learning, easy to program and offers aesthetic design integration.
- Motorization is compatible with home automation.
- The motorized system works on radio frequency that allows for wireless programming and operation from a distance.
- All motorized systems have a 12' long cord that plugs into the motor and a transformer on the other end that plugs into the wall.
- The intelligent motor automatically detects its power source for optimized energy efficiency.
- No extra modules are required for installation.
- **The minimum mounting depth required for an inside mount varies depending upon the number of channels.**
- **The maximum width of 19' is dependent upon the overall weight of the system—heavier fabrics may have a lower max width**
- The motor can only mount on the left side of the track.
- Each multi-channel remote can be paired to multiple systems and even different styles. With a single touch, you can operate every system in your home as long as each consecutive system is within 98' of the previous one.

MOTORIZED PANEL GLIDE SYSTEM SPECIFICATIONS

Maximum Width:	19'
Maximum Weight:	33 lbs.
Width of Motor:	8 ¹⁵ / ₁₆ "
Height of Motor:	1 ³ / ₈ "
Motor Depth	
Three Channels:	3 ¹ / ₄ "
Four Channels:	3 ¹⁵ / ₁₆ "
Five Channels:	4 ⁵ / ₈ "
Space Required for Inside Mount (IB)	
Two Channels not available with motorization	
Three Channels:	4 ¹ / ₄ "
Four Channels:	4 ¹ / ₄ "
Five Channels:	4 ¹⁵ / ₁₆ "

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

ORDERING MOTORIZED PANEL GLIDE SYSTEM

Simply add the surcharge (below) to the price for your complete panel glide system.

MOTORIZED PANEL GLIDE SYSTEM SURCHARGE				
	Power	Package Description	Properties	Retail Price
Motorized Panel Glide	Transformer	DC motor, with wall plug transformer Multi-channel remote in Pearl White	Transformer comes with 12' long cable 32' extension cable available	\$600

Motor is built into the back of the headrail, and always on the left side, regardless of the stack.

FABRIC SHADES

- Available in 11 popular shade styles that can all be lined—with the exception of the **Austrian, which is always unlined.**
 - Roman shades fold up when raised, resulting in a decorative stack of folds on the bottom of the raised shade.
 - **Available in board mount or headrail mount**
 - **Weight limit for headrail mount shades: 13 pounds for manual operation and 9 ½ pounds for motorized shades.**
 - Depending on the dimensions of the shade and the weight of the selected fabric, a board mount might be required.**
 - For side-by-side shades that are ordered at the same time in the identical style, fabric, color, lining, height, lift system and mounting style, the fold alignment tolerance is guaranteed to be within ¼". (The order **MUST** indicate that the shades are to hang side-by-side.)
 - **Small needle holes may be visible through stitched areas on select shades—particularly where the pockets and rings are sewn. This is most noticeable with room-darkening lining. This is NOT a manufacturing defect and no credit will be issued.** flair21's flat and back slat shade styles feature a unique fabrication technique eliminating any stitch hole concerns.
- NOTE:** If you select a shade style with a shaped bottom, you can choose the length to be measured to the bottom of the scallop or to the bottom of the weight bar. You can also elect to have the shade straight on the bottom when the shade is in the closed position. In this case, the shape will reveal itself when the shade is raised.

FABRIC SHADE FEATURES

CHILD-SAFETY

- flair21 fabricates shades in compliance with the ANSI (American National Standards Institute) child safety regulations.
- Our clear, UV-stable rings and ring locks prevent dangerous cord loops. (Depending on the style, rings are sewn approx. 5", 6" or 7" apart.)
- The manually-operated control cord (bead chain) features a child-safe clutch system and wall-mounted tension device.

MOTORIZED OPERATION

- The ultimate in functionality and convenience.
- Control multiple shades with a single remote or integrate into an existing home automation system.

QUICK TURN AROUND

- Get custom shades in as little as 15 business days for in-stock fabrics.

EASILY ADJUSTABLE

- flair21 utilizes a unique cord adjuster orb, so you can easily level and adjust the overall height of your shades.

BLACKOUT

- In addition to using a true blackout lining (not dim out), our unique fabrication technique (on Flat and Back Slat Roman Shades) eliminates all pinholes for a more effective room-darkening shade.

MINIMAL DRESSING

flair21 shades are crafted to fall into a symmetrical stack with minimal to no dressing required (depending on shade style and fabric selection).

EXTENSIVE SELECTION

- Available in 11 different styles and over 225 high quality fabrics—all hand crafted to your exact specifications.

MANUAL BOARD MOUNT FABRIC SHADE

- Board mount shades are stapled to wood, referred to as a dust board.
 - Each dust board is covered with the same face fabric as the shade.
 - flair21 uses a 2" wide dust board, giving you a 2" return. (A 5 ½" dust board is available upon request.)
 - NOTE: Board Mount Fabric Shades with motorization require a 3 ½" board with a projection of 3 ½".**
- flair21 uses the child-safe RollEase® clutch system for board mounted shades with manual control.
 - This system requires 2" of space, and therefore, the return cannot be smaller than 2".**
- **The minimum width for a functioning board mounted shade is 24".**
- All of the hardware required for installation is provided with every order.

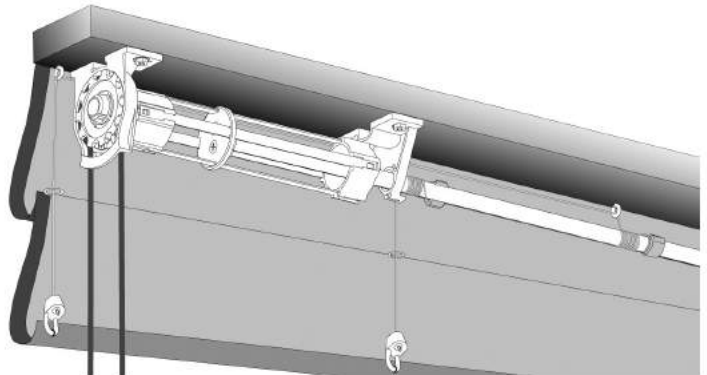

STANDARD FRONT MOUNT

- The shade mounts on the front edge of the dust board.
- The hardware is mounted on the bottom of the dust board, behind the shade.
- The beaded chain control cord is behind the shade so that it is not visible from the front of the shade.

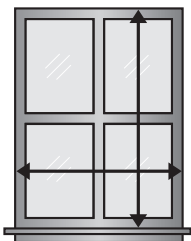

MANUAL BOARD MOUNT FABRIC SHADE SPECIFICATIONS

Maximum Width:	108"
Minimum Width:	24"
Maximum Length:	144"
Minimum Length:	27 ⅝"
Space Required for Inside Mount (IB):	2"
Maximum Weight:	30 lbs.

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

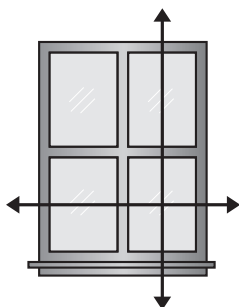

HOW TO MEASURE FOR FABRIC SHADES

INSIDE MOUNT

- Measure the inside width of the window frame in three places: top, middle, and bottom. Then, measure the length in three places: both sides and the center. Use the smallest measurements.
- **flair21 will take ¼" deduction off the width for an inside mount shade.**

OUTSIDE MOUNT

- Measure the width and length you wish to cover (NOTE: This is typically 2"– 4" from the outside edge of the window—from the top of the headrail, to the bottom of the fabric).
- **flair21 DOES NOT make any deductions or additions.**

MOTORIZED BOARD MOUNT FABRIC SHADE

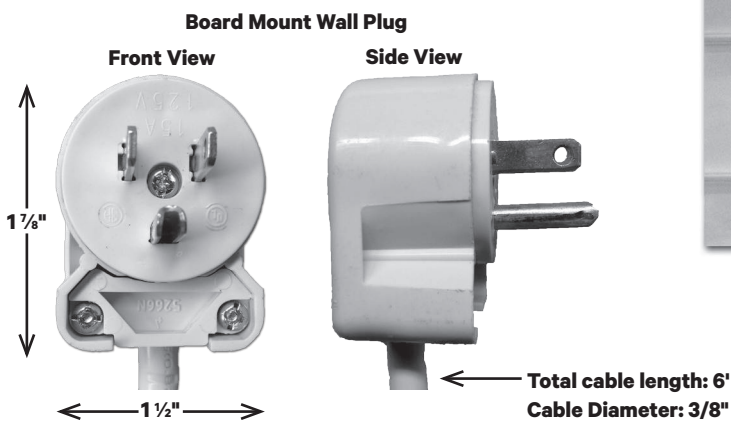

- Easy and efficient installation, programming and operation.
- The intelligent, built-in motor is self-learning, easy to program and offers aesthetic design integration.
- Motorization is compatible with home automation.
- The motorized system works on radio frequency that allows for wireless programming and operation from a distance.
- Board Mount Fabric Shades are only available with a wall plug.
- The intelligent motor automatically detects its power source for optimized energy efficiency.
- Motorized Board Mount Fabric Shades require a 3 1/2" board with a projection of 3 1/2".
- No extra modules are required for installation.
- No control cords.
- The motor is hidden inside the tube, which is mounted under the board.
- Each multi-channel remote can be paired to multiple systems and even different styles. With a single touch, you can operate every system in your home as long as each consecutive system is within 98' of the previous one.

MOTORIZED BOARD MOUNT FABRIC SHADE SPECIFICATIONS

Maximum Width:	141"
Minimum Width:	30"
Maximum Length:	137"
Width of Motor:	8 15/16"
Space Required for Inside Mount (IB):	3 1/2"
Maximum Weight:	41 lbs.

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

MOTORIZED BOARD MOUNT FABRIC SHADE SURCHARGE				
	Power	Package Description	Properties	Retail Price
Motorized Board Mount	Plug/Direct Connection	Tubular motor with built-in wall plug Multi-channel remote in Pearl White	Shade stapled to a 3 1/2" wood dust board Tubular motor will be mounted under board	\$800

Motor is built into the tube (for board mount).

ORDERING BOARD MOUNT FABRIC SHADES

- 1- Determine quantity.
- 2- Select fabrication style (e.g. Back Slat Roman Shade).
- 3- Select a fabric design and color for your fabric shade. (Make sure your selection is suitable for fabric shades. See the Recommended Applications at flair21.com.)
- 4- Specify the width and length of the shade (The length of the shade can vary depending on the style and where you want the bottom of the shade to hang. Refer to 'shade bottom' and 'length measured to' on the order form to determine the finished length.)
- 5- Determine whether the shade will be lined or unlined (**all Décor 54 shades are recommended lined only**), and select the design and color.
- 6- Indicate if interlining is desired. **NOTE: Interlining is recommended for select silks and faux silks** (see the Properties and Recommended Applications at flair21.com).
- 7- For a quick estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the section matching your fabric width (wide- or narrow-width), fabrication, and lining selections. Find the page with the chart for the series number you found, and find the price based on your width and length.
- 8- Specify control position: left or right.
- 9- Specify the mount and bracket: board mount with fabric cover or headrail mount with Velcro[®]; inside or outside brackets.
- 10- Specify any upgrades: you can order a 6" fabric valance for the front of your shade. The valance fabric can be the same fabric as the shade or out of a coordinating/contrasting fabric. You can also order a 6" back-mounted valance for the back edge of the dust board at no charge. This valance is made out of the same fabric as the lining of the shade. The purpose of this valance is to hide the hardware from the outside of the window.
- 11- *For motorization: add the surcharge to the shade price found in the charts.

PRICE EXAMPLE: MANUAL BOARD MOUNT FABRIC SHADE

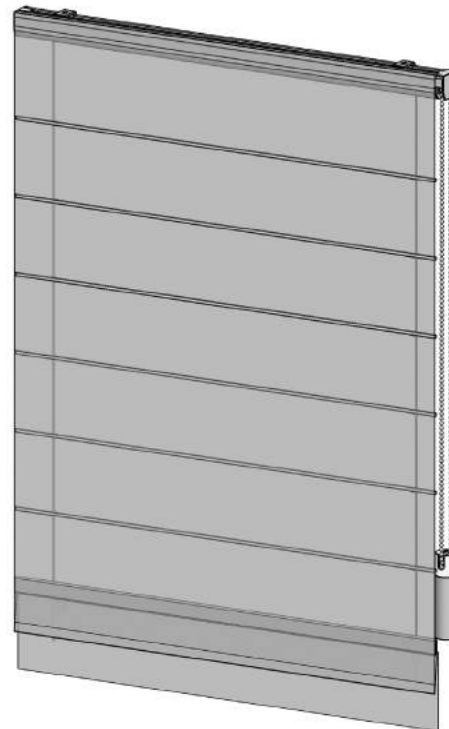

- 1- Quantity = 1
- 2- Back Slat Roman Shade
- 3- Fabric: 1202 0/682-59 (Narrow-Width)
- 4- 48" x 60"
- 5- Lining: 01000 0/10-118
- 6- No Interlining
- 7- Series 11 (found in Fabric Pricing Guide). Go to page 239 for Back Slat Lined Roman Shades using narrow-width fabric. Look at the chart for series 11, go down the left side to 60" and across to 48" = retail price of \$602 (Estimated) Total.
- 8- Control: left
- 9- Mount: board mount and outside brackets
- 10- No upgrades
- 11- Manual operation chosen

MANUAL HEADRAIL MOUNT FABRIC SHADE

- A new roman shade system, which uses a modern, slim, metal headrail design with Velcro®.
- The shade is attached to the front of the headrail using Velcro®, and can easily be detached and reattached for convenient cleaning.
- The headrail has a built-in, child-safe clutch system with quiet and efficient operation.
- Brackets with slim installation clips (and all other hardware required for installation) are provided with every order.
- **There is a strict weight limit of 13 pounds for manual operation headrail mount shades and 9 ½ pounds for motorized shades.**
 —Depending on the dimensions of the shade and the weight of the selected fabric, a board mount might be required.
- Installing Inside Mount (IB):
 —Minimum depth for IB flush mount: 1 ½"
 —Minimum depth for IB mount, not flush with the opening: 5/8"
- The minimum width for a functioning headrail-mounted shade with manual operation is 13".

MANUAL HEADRAIL MOUNT FABRIC SHADE SPECIFICATIONS

Headrail	
Depth:	1 ½"
Height:	1 3/8"
Maximum Width (Wide-Width Fabrics):	141"
Maximum Width (Narrow-Width Fabrics):	112"
Minimum Width:	13"
Maximum Length:	137"
Minimum Length:	22 5/8"
Maximum Weight:	13 lbs.
Space Range for Inside Mount (IB):	5/8"–1 ½"

***Specific limitations apply for individual shade styles and lining selection. (See note above each pricing chart).**

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

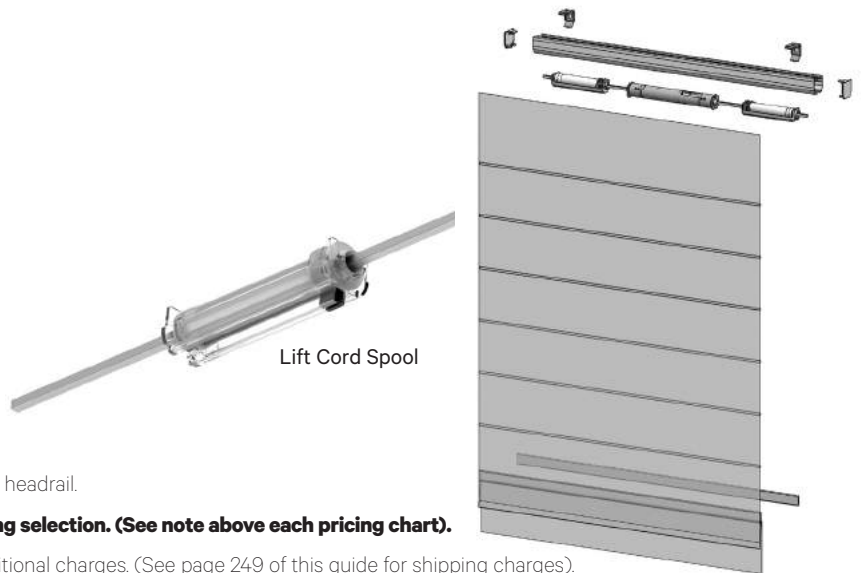

Lift Cord Spool

MOTORIZED HEADRAIL MOUNT FABRIC SHADE

- Easy and efficient installation, programming and operation.
- The intelligent, built-in motor is self-learning, easy to program and offers aesthetic design integration.
- Motorization is compatible with home automation.
- The motorized system works on radio frequency that allows for wireless programming and operation from a distance.
- All motorized systems have a 12' long cord that plugs into the motor and a transformer on the other end that plugs into the wall.
- The intelligent motor automatically detects its power source for optimized energy efficiency.
- No extra modules are required for installation.
- No control cords.
- The motor is hidden inside the headrail.
- Each multi-channel remote can be paired to multiple systems and even different styles. With a single touch, you can operate every system in your home as long as each consecutive system is within 98' of the previous one.

MOTORIZED HEADRAIL MOUNT FABRIC SHADE SPECIFICATIONS

Headrail	
Depth:	1 ½"
Height:	1 ⅜"
Maximum Width (Wide-Width Fabrics):	111"
Maximum Width (Narrow-Width Fabrics):	77"
Minimum Width:	24 ¼"
Maximum Length:	137"
Maximum Weight:	9 ½ lbs.
Space Range for Inside Mount (IB):	5/8"-1 ½"

No additional space is required for the motor since it is inside the headrail.

***Specific limitations apply for individual shade styles and lining selection. (See note above each pricing chart).**

Widths and lengths larger than 105" will be shipped LTL with additional charges. (See page 249 of this guide for shipping charges).

MOTORIZED HEADRAIL MOUNT FABRIC SHADE SURCHARGE				
	Power	Package Description	Properties	Retail Price
Motorized Headrail Mount	Transformer	Middle motor with wall plug transformer Multi-channel remote in Pearl White	Shade attached with Velcro to metal headrail Middle motor is mounted inside headrail	\$600

ORDERING HEADRAIL MOUNT FABRIC SHADES

- 1- Determine quantity.
- 2- Select fabrication style (e.g. Flat Roman Shade).
- 3- Select a fabric design and color for your fabric shade. (Make sure your selection is suitable for fabric shades. See the Recommended Applications at flair21.com.)
- 4- Specify the width and length of the shade (The length of the shade can vary depending on the style and where you want the bottom of the shade to hang. Refer to 'shade bottom' and 'length measured to' on the order form to determine the finished length.)
- 5- Determine whether the shade will be lined or unlined (**all Décor 54 shades are recommended lined only**), and select the design and color.
- 6- Indicate if interlining is desired. **NOTE: Interlining is recommended for select silks and faux silks** (see the Properties and Recommended Applications at flair21.com).
- 7- For a quick estimate: identify the fabric series number at flair21.com or in the appropriate Fabric Pricing Guide. Then, in this Chart Pricing Guide, find the section with your fabric width (wide- or narrow-width), fabrication, and lining selections. Look at the chart for the series number you found, and find the price based on your width/length.
- 8- Specify control position: left or right.
- 9- Specify the mount and bracket: board mount with fabric cover or headrail mount with Velcro®; inside or outside brackets
- 10- Specify any upgrades: you can order a 6" fabric valance for the front of your shade. The valance fabric can be the same fabric as the shade or out of a contrasting or coordinating fabric. You can also order a 6" back-mounted valance for the back edge of the dust board. This valance is made out of the same fabric as the lining of the shade. The purpose of this valance is to hide the controls from the outside of the window.
- 11- *For motorization: add the surcharge to the shade price found in the charts.

PRICE EXAMPLE: MOTORIZED HEADRAIL MOUNT FABRIC SHADE

- 1- Quantity = 1
- 2- Flat Roman Shade
- 3- Fabric: 00114 1/10-112 (Wide-Width)
- 4- 48" x 60"
- 5- No Lining
- 6- No Interlining
- 7- Series 26 (found in Fabric Pricing Guide). Go to page 108 for Flat Unlined Roman Shades using wide-width fabric. Look at the chart for series 26, go down the left side to 60" and across to 48" = \$563 (Estimated) Total.
- 8- Control: *no control with motorization
- 9- Mount: headrail mount with Velcro® and outside brackets
- 10- Motorization upgrade chosen
- 11- \$563 (Shade) + \$600 (Motorization) = \$1163 (Estimated) Total

WIDE-WIDTH FABRIC (102" – 130")

PRICING CHARTS

NOTE: Our price charts make it easy to estimate the price of your window treatment based on standard widths and lengths. If your measurements fall in-between two sizes, your actual price (stated on the order confirmation) will be based on the EXACT width and length of your order.

Pricing Charts do NOT reflect the additional yardage that may be required for pattern matching.

Shipping charges will be added at a \$20 flat-rate per order, with the exception of oversized/overweight shipments requiring LTL (see page 249 in this guide for additional information).

PLEATED DRAPERIES: 2.5 Fullness — Unlined

Maximum length 109" with Eurohem (exceptions may apply). Sizes and series numbers beyond what is listed in the charts below are available—please submit these quote requests via fax or email.

NOTE: For balloon style shades, please specify the length option: to the bottom of the scallop, to the bottom of the weight bar OR straight bottom

NARROW-WIDTH FABRIC (50" – 60")

PRICING CHARTS

NOTE: Our price charts make it easy to estimate the price of your window treatment based on standard widths and lengths. If your measurements fall in-between two sizes, your actual price (stated on the order confirmation) will be based on the EXACT width and length of your order.

Pricing Charts do NOT reflect the additional yardage that may be required for pattern matching.

Shipping charges will be added at a \$20 flat-rate per order, with the exception of oversized/overweight shipments requiring LTL (see page 249 in this guide for additional information).

PLEATED DRAPERIES: 2.5 Fullness — Unlined

Sizes and series numbers beyond what is listed in the charts below are available—please submit these quote requests via fax or email.

SHIPPING INFORMATION

Flat Shipping Rate

- flair21 is pleased to offer a flat ground shipping rate of \$20 per customer order confirmation in the United States.
- All orders ship from our plant in Spartanburg, South Carolina.
- Our \$20 flat rate is for small packages only. Larger packages are shipped via freight.

When Do We Ship Via Freight?

- Packages EXCEEDING 105" in length, 130" in total girth (length+width twice+height twice) and/or 150 lbs. in weight must be shipped via freight.
- Board mounted top treatments over 67" wide will also be shipped via freight. Board mounted top treatments exceeding 150" in width are crated to prevent damage in transit, and will incur a crating fee (see below).

Crating Charges for Oversized Board Mounted Treatments

150" – 199"	200" – 249"	250" – 299"	> 300"
\$50	\$80	\$110	\$150

Other Important Points:

- IF THERE IS ANY EVIDENCE OF LOSS OR EXTERIOR DAMAGE, DO NOT ACCEPT THE SHIPMENT UNTIL THE DELIVERING CARRIER'S AGENT HAS MADE A NOTATION (OF LOSS OR DAMAGE) ON THE PROOF OF DELIVERY RECEIPT.
- By knowing your shipping rate in advance, you can better prepare your quote accordingly.
- We prepay the freight charge and add it to your invoice.
- We do NOT charge an additional fee for residential delivery.

WORRY-FREE GUARANTEE

We strive to provide the highest quality products—engineered to last a lifetime. This starts with manufacturing fabrics using state-of-the-art techniques, and then hand crafting them into beautifully-functioning window treatments. We use only the highest quality materials in ISO-certified processes, which ultimately leads to reliable products. As an expression of the confidence we have in our products, flair21 fabrics come with a 5-year guarantee not to shrink, stretch or fade, and every finished product comes with the following limited lifetime warranty:

COVERED BY A LIMITED LIFETIME WARRANTY

- ✓ flair21 warrants its products for defects in materials, workmanship or failure to operate for as long as the original retail purchaser owns the product (unless shorter periods are provided below).
- ✓ Vertical Wrap vanes for 3 years from purchase date.
- ✓ Operational cords for 7 years from purchase date.
- ✓ Motorized components for 2 years from purchase date.
- ✓ All flair21 fabrics—except Décor 54 and those with natural fibers—are guaranteed not to shrink, stretch or fade during the first five years from the purchase date.
- ✓ Repairs and replacements will be made with like or similar parts or products.

NOT COVERED BY A LIMITED LIFETIME WARRANTY

- ✗ Any conditions caused by normal wear and tear (including but not limited to exposure to the sun).
- ✗ Alterations, abuse, misuse or accidents (including but not limited to wind, water/moisture damage) to the flair21 product.
- ✗ Failure to follow flair21 instructions regarding installation, measurements, cleaning or maintenance.
- ✗ Shipping charges; cost of removal and reinstallation.
- ✗ Due to the characteristics of natural fibers, fabrics such as (but not limited to) linens, silks and cottons do not carry the same 5-year guarantee against shrinking, stretching and/or fading.

FLAIR21 RESERVES THE RIGHT TO REPAIR PRODUCTS COVERED UNDER WARRANTIES RATHER THAN TO REPLACE THE PRODUCT.

To Acquire Warranty Service

Contact your original retail dealer for warranty assistance, or visit www.flair21.com to find the closest dealer.

Note: In no event shall flair21 be liable or responsible for incidental or consequential damages or for any other indirect damage, loss, cost, or expense. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.

Different warranty periods and terms apply for commercial products and applications.
