JACOBS LADDER™

Ultimate Fitness Experience

Unlike most cardio machines, Jacobs Ladder was engineered to provide the user with physiological benefits which makes it the perfect piece of cardio equipment for anybody.

Jacobs Ladder is a patented climbing machine with ladder-type rungs on a non-motorized continuous treadmill. It's self-paced, so the faster you go, the faster it goes. Jacobs Ladder is used by pro football teams, the FBI, the Army, the Navy, West Point and numerous Division I universities to improve their strength and conditioning programs.

The machine provides digital feedback on elapsed time, how many feet were climbed, rate of speed, and calorie burn.

Jacobs Ladder offers the option to exercise both your arms and legs so you get a superb cardiovascular workout, burning more calories in a relatively short amount of time.

The Ladder's 40° angle offers natural climbing motion, which takes stress off the lower back, hips and knees.

THE ELLIPTICAL WORKHORSE

The Landice E9 Commercial Elliptical offers multiple and varied workouts with just one machine. Its center-drive technology replicates the natural stride of outdoor running with zero-impact on your knees. Stand upright on the frame's stationary platform and isolate your workout to strengthen your upper body using the machine's variable resistance settings.

LANDICE

COMMERCIAL TREADMILLS

SUPERIOR STRENGTH AND DURABILITY

Our treadmills have been placed in the most demanding commercial environments around the world, where our fitness equipment has proven its strength and endurance. When using a Landice treadmill in a commercial facility, you can be confident of its long-lasting and reliable performance.

EXPERT CRAFTSMANSHIP SINCE 1967

A SMOOTH RIDE

Landice is the industry leader in treadmill shock absorption. Our standard VFX Shock Absorption System provides optimum comfort while reducing impact on your joints. It is 5 times softer than running on grass and great for runners and walkers seeking impact reduction.

THE FINEST TREADMILLS

Landice built its reputation on the quality and craftsmanship of its treadmills. Since 1967, we have continuously engineered the most innovative and durable fitness products in the industry, here in the USA.

COMMERCIAL WARRANTY

The LTD warranty covers products for less than 5 hours of usage per day in a non-pay-for-membership facility.

The Club warranty covers products for more than 5 hours of usage per day in any pay-for-membership facility.

CLUB

Designed specifically for high-volume usage in health club settings, the Club treadmills are ideal for walkers, joggers and serious runners alike. An aluminum frame and whisper quiet 4 HP continuous duty motor are just some of the features found on the Club. The L7 offers one of the lowest step-up heights in the industry while the L9 accommodates users over 6 feet tall with a spacious running surface.

LTD

Perfect for limited usage applications, the LTD treadmill series accommodates a variety of facilities. The L8 features a 22" wide and 63" long surface which allows even the tallest users to stretch out while exercising. The L7 provides easy deck access with the lowest step-up height in the industry.

Treadmill Club Retail Pricing

Heavy Use Treadmills

110VAC, 15A, 60Hz

Dear Customer:

Thank you for your interest in Landice. For 50 years, Landice has been supplying fitness equipment to the harshest commercial environments. Landice offers the L-Series Club treadmills, designed for heavy use environments where reliability and durability are not a concern but a necessity.

Warranty: The Club treadmills carry a 5 year parts and 1 year labor warranty. Wear items, specifically treadbelts and decks, carry a 2- year warranty. Executive touch-screen console and USB port are warranted for defects in material and workmanship for 3 years.

To validate this warranty the treadmill needs to be registered with Landice within 30 days of purchase and placed in the application for which it has been intended. Warranty is valid for "pay-for-membership" and commercial settings where usage is greater than 5 hours per day.

Bike Commercial Retail Pricing

Dear Customer:

Thank you for your interest in Landice. For 50 years, Landice has been supplying fitness equipment to the harshest commercial environments. The Landice Commercial Bike will accommodate all commercial applications including light commercial, rehabilitation, health clubs, and "pay-for-membership" facilities.

The R9 Recumbent and the U9 Upright are self-powered machines that are aesthetically designed with the user and facility in mind. Each bike comes with contact heart-rate, programs, fingertip controls for resistance, and a well-cushioned, adjustable seat. These are just a few attractive features found on our upright and step-through recumbent bikes.

Warranty: All commercial bikes carry a 5 year parts and 1 year labor warranty. High-wear items, such as pedal straps, carry a 90-day warranty against defects in material and workmanship.

To validate this warranty the bike needs to be registered with Lanice within 30 days of purchase and placed in the application for which it has been intended. This warranty is valid for all commercial applications including light commercial, rehabilitation, health clubs and "pay-for-membership" facilities.

R9 / U9 BIKES

The Landice R9 & U9 bikes offer a comfortable and safe rehabilitation option. The wide step-through design on the R9 allows for easy access along with superior back support. The U9 offers well-cushioned seating with adjustable height levels to support a personalized lower-body rehabilitation regimen.

NATURAL BIOMECHANICS - LOW IMPACT

E9 ELLIPTICAL TRAINER

Patients at any athletic level from beginner to professional will find physical benefits and rehabilitative functionality on a Landice.

The E9 offers one of the only fitness units that enables both upper and lower body exercise capabilities. Patients can stand upright on the frame's stationary footpads and perform an isolated workout to strengthen the upper body. This back-and-forth motion is considered a preferable position as opposed to a seated rotational movement.

For the lower body, the center-drive technology replicates the biomechanics of walking or running. The E9 provides a low impact alternative to treadmills.

The elliptical also features an accessible, safe, stable and patient-friendly exercise platform. Users can easily grab the side rails, step-up and safely start a workout. The pedals will move only when the patient engages the upper body handrails and/or foot pedals.

E9 ELLIPTICAL FEATURES
