Workmanship: - The Contractor shall, through the proper training of employees, experience, innovation, technology, manufacturer's recommendations, or other means, perform the required cleaning and related services at a level, which conforms to the AAPA "Custodial Level 2 Specifications" (exhibit A). These quality requirements represent the State's needs with regard to the custodial services at the specified location(s).

Performance: - Satisfactory performance at the AAPA Level 2 will be based on the State's evaluation of results achieved. The evaluation process will be based on three (3) components; tenant satisfaction, inspection by the State's designee and customer surveys. The Department of Administrative Services (DAS) or its authorized representative will have the final determination in all evaluations, protests and arbitrations.

- Tenant satisfaction shall be deemed acceptable in the absence of documentation to the contrary. Documentation will be in the form of the DAS Customer Feedback process. DAS Customer Feedback documents for reporting non-conformances are located on the DAS web site (www.das.ct.us ; e-procurement; customer feedback; agency vendor alert (exhibit B) or vendor performance; (exhibit C).
- Inspection by the State's designee will occur on a periodic schedule determined by the State's designee but not less than once per three (3) month period. The State's designee should prepare and file a DAS "Vendor Performance Report" at least semi-annually to document the Contractor's performance.
- Customer Surveys will be distributed by the Contractor's Supervisor (Crew Leader) at the rate of one (1) per shift. Completed surveys shall be returned to the State's Designee for review/evaluation/action/retention (Exhibit D).

Non-Conformance Process: - Contractor non-conformances will be based on a specific incident. Each specific incident will be addressed as follows:

- The first incident of a **specific** requirement within an evaluation period will produce a verbal discussion between the Contractor and the State's designee. Corrective action by the Contractor will be completed within 24 hours or within a mutually agreed (between the Contractor and the State's designee) time period. The State's designee will document the conversation by preparing and filing a DAS "Agency Vendor Alert" report form.
- The second incident of the **same specific** requirement within **the same evaluation period** will result in a discussion with the State's designee. The State's designee will review the non-conformance with the Contractor and file a DAS "Vendor Performance Report". The Contractor shall be assessed a \$100.00 penalty by the State's designee.

Custodial Services – Operational Specifications

- The third incident of the **same specific** requirement **within the same evaluation period** will result in a discussion with the State's designee. The State's designee will review the non-conformance with the Contractor and file a DAS "Vendor Performance Report". The Contractor shall be assessed a \$150.00 penalty by the State's designee.
- The fourth incident of the **same specific** requirement **within the same evaluation period** will result in a "face to face" discussion with the State's designee who will document the discussion, file a DAS "Vendor Performance Report" and request DAS to review all documented DAS performance reports then initiate a formal performance evaluation with the Contractor. An unsatisfactory outcome of this evaluation may result in termination of the contract.

For the purposes of this agreement an "evaluation period" is defined as three (3) consecutive months. Specific incidents from one evaluation period may not extend into another evaluation period. After two (2) consecutive evaluation periods the State may review the results of the Contractor's performance and may, at the State's option revise the length of the evaluation.

All payments of penalties must be endorsed and directed to the "Treasurer of the State of Connecticut", 55 Elm Street, Hartford CT 06106. The Contractor shall pay the penalty (ies) within thirty (30) days of assessment and shall provide the State's designee with a copy of the endorsed check.

Failure of the Contractor to comply with this process may result in termination of the contract.

To track requests and non-conformances, a sample "Custodial Services Log" (Exhibit E) is included.

Exhibit A

APPA CUSTODIAL SERVICE LEVELS

Level 1 - Orderly Spotlessness

Level 1 establishes cleaning at the highest level. It was developed for the corporate suite, the donated building, or the historical focal point. This is show-quality cleaning for that prime facility.

- Floors and base moldings shine and/or are bright and clean; colors are fresh. There is no buildup in corners or along walls.
- All vertical and horizontal surfaces have a freshly cleaned or polished appearance and have no accumulation of dust, dirt, marks, streaks, smudges, or fingerprints.
- Washroom and shower tile and fixtures gleam and are odor-free. Supplies are adequate.
- Trash containers and pencil sharpeners are empty, clean, and odor-free.

Level 2 - Ordinary Tidiness

Level 2 is the base upon which this study is established. This is the level at which cleaning should be maintained. Lower levels for washrooms, changing/locker rooms, and similar type facilities are not acceptable.

- Floors and base moldings shine and/or are bright and clean. There is no buildup in corners or along walls, but there can be up to two days worth of dirt, dust, stains, or streaks.
- All vertical and horizontal surfaces are clean, but marks, dust, smudges, and fingerprints are noticeable with close observation.
- Washroom and shower tile and fixtures gleam and are odor-free. Supplies are adequate.
- Trash containers and pencil sharpeners are empty, clean, and odor-free.

Level 3 - Casual Inattention

This level reflects the first budget cut, or some other staffing-related problem. It is a lowering of normal expectations. While not totally acceptable, it has yet to reach an unacceptable level of cleanliness.

- Floors are swept clean, but upon close observation dust, dirt, and stains, as well as a buildup of dirt, dust, and/or floor finish in corners and along walls, can be seen.
- There are dull spots and/or matted carpet in walking lanes, and streaks and splashes on base molding.
- All vertical and horizontal surfaces have obvious dust, dirt, marks, smudges, and fingerprints.
- Lamps all work and all fixtures are clean.
- Trash containers and pencil sharpeners are empty, clean, and odor-free.

Level 4 - Moderate Dinginess

Level 4 reflects the second budget cut, or some other significant staffing-related problem. Areas are becoming unacceptable. People beginning to accept an environment lacking normal cleanliness. In fact, the facility begins to constantly look like it requires a good "spring cleaning."

- Floors are swept clean, but are dull. Colors are dingy, and there is an obvious buildup of dust, dirt, and/or floor finish in corners and along walls. Molding is dull and contains streaks and splashes.
- All vertical and horizontal surfaces have conspicuous dust, dirt, smudges, fingerprints, and marks that will be difficult to remove.

- Less than 5% of lamps are burned out, and fixtures are dingy.
- Trash containers and pencil sharpeners have old trash and shavings. They are stained and marked. Trash cans smell sour.

Level 5 - Unkempt Neglect

This is the final and lowest level. The trucking industry would call this "just-in-time cleaning." The facility is always dirty, with cleaning accomplished at an unacceptable level.

- Floors and carpets are dirty and have visible wear and/or pitting. Colors are faded and dingy, and there is a conspicuous buildup of dirt, dust, and/or floor finish in corners and along walls. Base molding is dirty, stained, and streaked. Gum, stains, dirt, dust balls, and trash are broadcast.
- All vertical and horizontal surfaces have major accumulations of dust, dirt, smudges, and fingerprints, as well as damage. It is evident that no maintenance or cleaning is done on these surfaces.
- More than 5% of lamps are burned out, and fixtures are dirty with dust balls and flies.
- Trash containers and pencil sharpeners overflow. They are stained and marked. Trash containers smell sour.

Green Label Vacuums: Cleaner Carpet, Cleaner Air

[Printer Friendly Format](#)

Certifying Better Vacuums to Clean Your Carpet — and Protect Indoor Air Quality (IAQ)

High performance vacuum cleaners have a significant impact on improved indoor air quality (IAQ). At the same time, vacuums that effectively remove and contain soil while keeping the carpet looking good will help carpets last longer. So, ultimately, better performing vacuums provide a greater return on your investment and ensure a healthier indoor environment.

Recognizing the need to identify superior cleaning equipment, CRI introduced its Green Label Testing Program for vacuum cleaners in 2000. This program tests two general categories of vacuums: a) general purpose vacuums approved for use on all conventional carpet styles; and b) vacuums specifically approved for use on carpet with a low pile, or surface texture, measuring approximately 1/4 inch or less.

To qualify for the Green Label, these vacuums must go through a stringent testing process that measures three key performance factors:

- **Soil Removal** — The vacuum must remove a set quantity of soil from carpet in four passes
- **Dust Containment** — The vacuum must not release more than 100 micrograms of dust particles per cubic meter of air. This protocol evaluates the total amount of dust particles released by the brush rolls, through the filtration bag and via any air leaks from the system, and is more stringent than the National Ambient Air Quality Standards
- **Carpet Appearance Retention** — The vacuum should not affect the appearance of the carpet more than a one-step change based on one year of normal vacuum use

» [Searchable List of Green Label Approved Vacuums](#)

Vacuums meeting the above protocols, which have been peer reviewed by scientists, can display the CRI Green Label on packaging, merchandising displays and on the machine itself. Since the launch of this test in 2000, CRI has certified more than one hundred machines in the following categories: backpacks, canisters, central systems, and uprights.

Ultimately, proper carpet maintenance is assured and made significantly easier with high quality machines that are CRI Green Label-certified. This important testing program has raised the bar for all vacuum cleaners on the market, resulting in cleaner, longer-lasting carpet and improved IAQ.
