COMMISSION ON HUMAN RIGHTS AND OPPORTUNITIES
CONTRACT COMPLIANCE REGULATIONS
NOTIFICATION TO BIDDERS

(Revised 09/17/07)

The contract to be awarded is subject to contract compliance requirements mandated by Sections 4a-60 and 4a-60a of the Connecticut General Statutes; and, when the awarding agency is the State, Sections 46a-71(d) and 46a-81i(d) of the Connecticut General Statutes. There are Contract Compliance Regulations codified at Section 46a-68j-21 through 43 of the Regulations of Connecticut State Agencies, which establish a procedure for awarding all contracts covered by Sections 4a-60 and 46a-71(d) of the Connecticut General Statutes.

According to Section 46a-68j-30(9) of the Contract Compliance Regulations, every agency awarding a contract subject to the contract compliance requirements has an obligation to “aggressively solicit the participation of legitimate minority business enterprises as bidders, contractors, subcontractors and suppliers of materials.” “Minority business enterprise” is defined in Section 4a-60 of the Connecticut General Statutes as a business wherein fifty-one percent or more of the capital stock, or assets belong to a person or persons: “(1) Who are active in daily affairs of the enterprise; (2) who have the power to direct the management and policies of the enterprise; and (3) who are members of a minority, as such term is defined in subsection (a) of Section 32-9n.” “Minority” groups are defined in Section 32-9n of the Connecticut General Statutes as “(1) Black Americans . . . (2) Hispanic Americans . . . (3) persons who have origins in the Iberian Peninsula . . . (4) Women . . . (5) Asian Pacific Americans and Pacific Islanders; (6) American Indians . . .” An individual with a disability is also a minority business enterprise as provided by Section 4a-60g of the Connecticut General Statutes. The above definitions apply to the contract compliance requirements by virtue of Section 46a-68j-21(11) of the Contract Compliance Regulations.

The awarding agency will consider the following factors when reviewing the bidder’s qualifications under the contract compliance requirements:

- (a) the bidder’s success in implementing an affirmative action plan;
- (b) the bidder’s success in developing an apprenticeship program complying with Sections 46a-68-1 to 46a-68-17 of the Administrative Regulations of Connecticut State Agencies, inclusive;
- (c) the bidder’s promise to develop and implement a successful affirmative action plan;
- (d) the bidder’s submission of employment statistics contained in the “Employment Information Form”, indicating that the composition of its workforce is at or near parity when compared to the racial and sexual composition of the workforce in the relevant labor market area; and
- (e) the bidder’s promise to set aside a portion of the contract for legitimate minority business enterprises. See Section 46a-68j-30(10)(E) of the Contract Compliance Regulations.

The following **BIDDER CONTRACT COMPLIANCE MONITORING REPORT** must be completed in full, signed, and submitted with the bid for this contract. Chimney Re-point / Rebuild

Re-pointing Masonry: Entire chimney as needed. Top 5' of Chimney requires rebuild.

- Rake out mortar to depths equal to 2 ½ times the joint width, but not less than ½ inch in order to expose sound mortar.
- Clean masonry surfaces within raked-out joints and provide reveals with square backs.
- Cut out old mortar by hand with chisel and mallet and or electric grinder.
- Rinse joint surfaces to remove dust and mortar particles, leaving surfaces damp but free of standing water.
- Apply the first layer of pointing mortar to areas where existing mortar was removed to depths greater than surrounding areas. After joints have been filled to uniform depth, place remaining pointing mortar in three (3) layers. Compact each layer and allow becoming “thumbprint” hard before applying next layer.
- When mortar is “thumbprint” hard, tool joints to match, as best possible existing joints.
- Cure mortar by maintaining a damp condition for a minimum of 72 hours.
- After mortar has fully hardened (30 days minimum) thoroughly clean exposed masonry surfaces via stiff nylon brushes and clean water applied with a minimum of force.

Mortar Mixes: Measure cementitious and aggregate materials in dry condition by volume or equivalent weight methods utilizing a clean batch mixer.

- Mixing Pointing Mortar; mix dry materials, and then add only enough water to produce a damp, unworkable mix that will retain its form when pressed into a ball. Maintain mortar in dampened condition for 1 to 2 hours. Add remaining water in small portions until reaching desired consistency. Mortar must be used within 30 minutes of this final mixing; **do not retemper or use partially hardened materials.**
- Motor pigments: Do not exceed a pigment-to-cement ratio of 1:10 by weight.
- Do not use admixtures of any kind in mortar.
- Pointing mortar for brick: 1 part Portland cement, 2 parts lime, and 6 parts colored – or natural-mortar aggregate.

NOTES:

- Brick removal: Carefully remove bricks that are visibly cracked / broken. Cut out units from joint to joint and in a manner that permits replacement with (new) full sized units.
- Support and protect remaining masonry that surrounds removal area. Maintain lintels and adjoining construction in undamaged condition.
- Re-flash all existing flashing to insure a weatherproof seal. Flashing must match existing copper, aluminum and lead in gauge and color.
- Salvage as many undamaged / whole bricks as possible.
- Remove mortar, loose particles and soil from salvaged brick.
- Clean remaining brick at removal areas of mortar, dust any and all loose particles.

Brick rebuilding:

- Install new match existing as best possible, and salvaged brick into bonding and coursing pattern of existing brick. If cutting is required. A motor driven wet saw is required.
- Lay brick with completely filled bed, head and color joints. Wet clay bricks should be evaluated for absorption rates (suction) to insure joint width matching to existing.
- All mortar joints require tooling to match existing.

The existing chimney clay liner* (Thimble) has been inspected and found to be intact. It can remain intact and be reused as part of the rebuild requested.

*Roof line to top of chimney.
